MARKET SUMMARY

INDIA

- The Indian market remains reasonably stable; however, activity is limited by a continued lack of available recycling tonnage under current conditions.
- Local recyclers remain interested in acquiring units within their target price levels, though they are unable to compete with the stronger pricing offered in Bangladesh.
- Ongoing geopolitical tensions in the Middle East, along with restricted vessel movement and the unresolved Strait situation, continue to impact supply and sentiment.
- Market participants remain cautious, with meaningful activity likely only if buyers are able to match prevailing regional price levels.

BANGLADESH

- The market remains firm, with overall sentiment positive despite a slight softening in local market.
- Buyers continue to demonstrate strong interest in acquiring new tonnage, particularly for prompt delivery.
- Demand fundamentals remain solid, supporting a relatively high market compared to regional competitors.
- Market participants are closely monitoring upcoming national budget developments and geopolitical conditions for further direction.

PAKISTAN

- No significant change in market conditions, with continued inactivity and no reported transactions.
- Ongoing geopolitical tensions and the Middle East conflict are severely impacting import activity, particularly from the UAE.
- Market sentiment remains uncertain and highly volatile, with price indications fluctuating daily.
- Buyers remain on the sidelines, awaiting greater clarity and stabilization before re-engaging.

TURKIYE

- The Turkiye market remains largely unchanged from last week, with price levels holding steady.
- Supply has slowed further, limiting fresh market activity and available opportunities.
- Buyer sentiment remains stable, though overall movement continues to be muted.
- With no major change in fundamentals, the near-term market direction is expected to remain steady unless fresh supply emerges.

BRENT CRUDE: (96.12 ⟶ 105.48) **+9.36**

WTI CRUDE: (91.04 ⟶ 95.44) **+ 4.4**
