Week 43/2026 (19 Oct – 26 Oct)

Comment: Indonesian Coal Exports

banchero costa
RESEARCH

INDONESIAN COAL EXPORTS

In Jan-Sep 2026, global seaborne coal loadings increased by +1.1% y-o-y to 976.0 mln t (excluding cabotage), based on vessel tracking data from AXS Marine.

In Jan-Sep 2026, exports from Indonesia declined by -6.3% y-o-y to 332.6 mln tonnes, whilst from Australia were up by +3.9% y-o-y to 264.0 mln t.

From Russia exports increased by +10.0% y-o-y to 145.8 mln t in Jan-Sep 2026, from the USA increased by +10.4% y-o-y to 64.0 mln t, from S Africa by +9.4% y-o-y to 51.7 mln t.

Shipments from Colombia were up by +12.6% y-o-y to 39.1 mln t in Jan-Sep 2026, from Canada marginally down by -0.4% y-o-y to 34.7 mln t, and from Mozambique up by +1.5% y-o-y to 16.1 mln t.

Seaborne coal imports into Mainland China declined by -5.0% y-o-y to 250.7 mln t in Jan-Sep 2026.

Imports to India declined by -9.2% y-o-y to 166.1 mln t, to Japan increased by +1.9% y-o-y to 118.6 mln t in Jan-Sep 2026, to S Korea up by +14.0% y-o-y to 90.1 mln t.

To the EU imports were up by +4.3% y-o-y to 49.6 mln t in Jan-Sep 2026, whilst to Vietnam volumes increased by +8.4% y-o-y to 53.3 mln tonnes.

Imports to Malaysia declined by -1.4% y-o-y to 29.8 mln t, whilst to Bangladesh they increased by +16.5% y-o-y to 14.1 mln t.

Indonesia is the world's largest seaborne exporter of coal, accounting for 34.1% of the global seaborne coal market so far in 2026.

Export volumes from Indonesia were relatively depressed during 2020 and 2021, due to disruption from Covid-19 and from government policies favouring domestic consumption, but bounced back to an all-time record high in 2022, and continued to grow further in 2023 and 2024, before correcting in 2025.

Total seaborne coal exports from Indonesia in 2023 reached 500.2 mln tonnes, +10.8% y-o-y, according to AXS Marine vessel tracking data.

In 2024, coal exports from Indonesia increased further by +7.4% y-o-y to 537.3 mln tonnes.

In 2025, however, exports from Indonesia declined by -8.0% y-o-y to 494.2 mln tonnes, and they were down a further -6.3% y-o-y in Jan-Sep 2026 to 332.6 mln t.

The vast majority of Indonesian coal exports are loaded in East Kalimantan and South Kalimantan (the island of Borneo), with some volumes also shipped from southern Sumatra island.

The main coal export terminals in Indonesia are:

Taboneo/Banjarmasin (58.0 mln t loaded in Jan-Sep 2026), Bunati (31.5 mln t), Balikpapan (30.3 mln t), Tanjung Bara (28.8 mt), Samarinda (24.6 mt), Muara Banyuasin (23.0 mt), Muara Pantai (21.4 mln t), Muara Berau (17.6 mt), Adang Bay (13.4 mt), Tanjung Pemancingan (12.3 mt), Tarahan (9.3 mln t), Sangkulirang (8.5 mt), Kaliorang (8.5 mt), Tarakan Island (6.9 mt).

The majority (54.0%) of coal volumes from Indonesia in 2025 were loaded on Panamax vessels, with 27.3% on Supramax vessels, 9.8% on Post-Panamax, and just 7.0% on Capesize tonnage.

Mainland China continues to be the top importer of Indonesian seaborne coal exports, accounting for 37.7% of shipments in Jan-Sep 2026.

In Jan-Sep 2026, shipments from Indonesia to Mainland China declined by -6.8% y-o-y to 125.5 mln tonnes.

About 17.6% of exports, or 58.6 mln tonnes in Jan-Sep 2026, were shipped to India, representing a correction of -20.4% y-o-y.

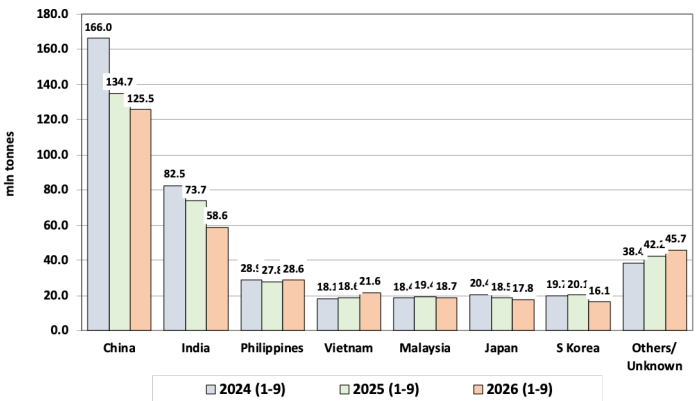

Shipments to the Philippines, on the other hand, increased by +2.6% y-o-y in Jan-Sep 2026 to 28.6 mln tonnes, with the Philippines accounting for 8.6% of Indonesian exports.

Exports from Indonesia to Vietnam increased by +16.1% y-o-y in Jan-Sep 2026 to 21.6 mln t, with Vietnam accounting for 6.5%.

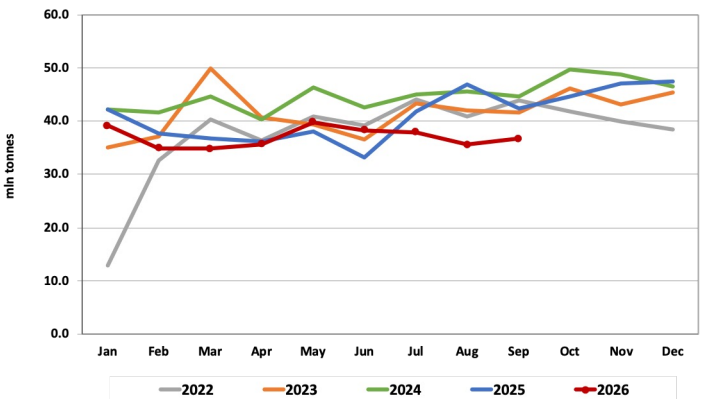

Malaysia imported 18.7 mln t of coal from Indonesia in Jan-Sep 2026, down -3.7% y-o-y.

Japan received 17.8 mln tonnes, down -4.0% y-o-y. Exports to South Korea declined by -19.9% y-o-y to 16.1 mln t. Shipments to Taiwan, CN, dropped by -26.0% y-o-y to 8.8 mln t in Jan-Sep 2026.

COMMODITY NEWS – DRY BULK

China's state iron ore buyer agrees new annual supply contract with Rio Tinto

China's state iron ore buyer has agreed a new supply deal for the key steelmaking ingredient with Rio Tinto, people with knowledge of the matter said. China Mineral Resources Group (CMRG) verbally notified some steel mills of the agreement on Wednesday without giving further details, they said. CMRG will start on Thursday to collect information on volumes that each mill needs to buy from the miner, two of the people said.

China's tug-of-war with Australian miners lurks beneath iron ore calm

But beneath the calm picture presented by imports of the main steel raw material is a tug-of-war between China, which buys about 75% of global seaborne supplies, and Australia's miners, which provide around two-thirds of China's needs. Beijing is attempting to gain more control of iron ore pricing, seeking to leverage its buying power to secure favourable terms. The problem is that Australian miners such as Rio Tinto, BHP Group and Fortescue have considerable market power of their own as China has no alternative sources that supply the volume of required iron ore.

US tariff war is fueling Vietnam's coal boom

A years-long trade war between the United States and China has helped shift manufacturing investment, factory output and export production into Vietnam, driving the Southeast Asian nation's coal-fired electricity generation to record highs. Vietnam's coal plants generated 132.9 terawatt hours (TWh) of electricity during the first nine months of 2026, which is a 15% jump from the same months last year and the highest for that period on record, according to data from Ember.

India stays net finished steel importer in April-September, government data shows

India remained a net importer of finished steel in the first half of the fiscal year as imports grew faster than domestic production, government data showed on Friday. Finished steel imports jumped 23.8% from a year earlier to 4.14 million metric tons during April-September, exceeding exports of 3.55 million tons. China and South Korea together accounted for nearly 63% of imports, while the United Arab Emirates and Vietnam were India's largest export destinations.

Nickel Industries says Indonesia cuts coming as Chinese producers weigh steep reductions

Australia-listed Nickel Industries says nickel producers in the Indonesia Morowali Industrial Park (IMIP), a key production base for the metal, will coordinate on output cuts as Chinese operators weigh steep reductions. "There will be coordinated cuts across all of the operations within the IMIP," Managing Director Justin Werner told analysts on an earnings call, without giving a percentage. "Certainly what we're seeing is the non-integrated producers ... are the ones that are going to suffer the hardest here."

Latvia emerges as top-five country used to ship Russian grain

Latvia, a member of the European Union and NATO, has emerged as one of the top five countries used to ship Russian grain this marketing season despite strained political ties, as Moscow redirects exports from the Azov-Black Sea basin to Baltic ports. Some 431,700 metric tons of Russian grain were shipped via Latvia between July and October, consultancy ProZerno said. The Latvian foreign ministry said in a statement that Russian grain imports have been banned in Latvia since 2024 and that while there is no transit ban in place yet, the government is working on that as either an EU or a national measure.

China snaps up Australian canola as improved ties, lower tariffs fuel demand

Chinese oilseed buyers have purchased around 1 million metric tons of Australian canola in recent deals, as improved Beijing-Canberra ties, lower tariffs and stronger processing margins boost demand, three Asia-based traders told Reuters. The cargoes, for arrival in early 2027, were bought at about $695 to $705 per ton, including cost and freight (C&F) to China, said one of the sources with direct knowledge of the deals.

Global sugar market supply deficit to grow sharply

The global sugar market supply deficit, or the gap between production and demand, was projected on Tuesday to grow to 6.28 million tons, 3 million tons more than a previous estimate, according to market analyst Green Pool Commodities. The analyst blamed poor production in major sugar-making regions like Brazil, India and the European Union for the revised outlook, as global agriculture struggles to cope with impacts from the El Niño weather anomaly.

COMMODITY NEWS – CRUDE OIL & PRODUCTS

Saudi Arabia to store oil in Singapore to bolster Asia supply security

Saudi Arabia plans to store crude oil at Singapore's Jurong Rock Caverns from the second half of 2027 to strengthen supply security in the region, energy ministers from both countries said. The move comes after the US-Israeli war with Iran severely disrupted energy supplies to Asia shipped through the Strait of Hormuz, prompting countries to draw down inventories and raising concerns about stockpile levels globally. Asia imported two-thirds of its oil supplies from the Middle East before the war.

Ship attacks in Strait of Hormuz hit record high in October

October has been the worst month for attacks on commercial shipping in the Strait of Hormuz and nearby waterways, according to data compiled by a Washington-based think tank that has tracked maritime security incidents worldwide since 2017. "October has seen the highest number of ship attacks on record," said Noam Raydan, a senior fellow at the Washington Institute for Near East Policy.

Trump invokes Cold War-era Defense Production Act for oil production, refining

US President Donald Trump determined on Thursday that petroleum production, refining, and related activities are essential to national defense, a move that could open up US funding for fossil fuel projects. In a presidential memo, Trump also invoked part of the Cold War-era Defense Production Act, allowing him to provide financial incentives for oil-related activities, pipelines and storage of liquid fuels.

North Dakota oil companies speed up well completions as prices rise, state regulator says

US oil and gas companies are accelerating well completions and boosting production in North Dakota, the nation's third-largest oil-producing state, encouraged by high crude prices, state officials said on Tuesday. "Operators are acting more quickly to move wells to production to capitalize on elevated oil prices," Richard Suggs, a geologist with North Dakota's Oil and Gas Division, said during a call to discuss the state's August production data, the latest available.

US coaxing refiners to produce more diesel as prices surge, energy officials say

Two top US Energy Department officials said on Tuesday they were working with refiners at home and abroad to boost fuel output as a diesel shortage has raised prices, driving dissatisfaction among voters with the White House ahead of the November midterm elections. Diesel prices have jumped to record highs because of disruptions from the Iran war and Ukrainian attacks on Russian refineries . Retail diesel prices averaged about $6.32 a gallon on Tuesday, according to motorist group AAA.

US refiners have run harder in 2026 as tight diesel supplies boost margins, EIA says

The US Energy Information Administration said on Thursday that US refiners have maintained higher-than-normal run rates this year, buoyed by strong margins stemming from tight global supplies of refined fuel products. Refinery utilization has averaged more than 95% of capacity between May and September, the highest for those months since 1998, the EIA said. US refinery utilization has averaged 92% from May to September since 1991, compared with 88% across the other seven months, the EIA said.

Trump's tax-exempt diesel draws skepticism from farmers, eludes others

US President Donald Trump signed an executive order this month to expand access to tax-exempt diesel as soaring prices frustrate voters ahead of midterm elections. But farmers say it is too risky to use the fuel on public roads, while some other drivers do not have access to it. Trump has sought to lower prices and boost his sagging approval ratings through a series of actions focused on fuel, including an $8 billion financial support program he announced on Monday to offset diesel costs for farmers during the autumn harvest.

Global diesel prices seen staying high despite Trump's deal with Russia

President Donald Trump's deal with Russia to supply diesel to US and global markets is unlikely to meaningfully lower diesel prices, market watchers and analysts said, noting that the promised volumes are too small to ease a global supply squeeze. Diesel prices have shot to record highs during the US-Israeli war on Iran, creating a political liability for Trump and his Republican Party as they campaign to maintain thin majorities in the US Congress in the November 3 midterm elections.

COMMODITY NEWS – NATURAL GAS & POWER

Russian energy officials urge Europe to reconsider ban on Russian gas imports

Senior Russian political and energy officials urged the European Union on Thursday to reconsider its plans to ban imports of Russian LNG, arguing the bloc's low storage levels had put Europe in a precarious position. The EU plans to halt imports of Russian gas completely by the start of next year in response to the war in Ukraine. However, those plans have been put in jeopardy due to unusually low gas stocks, while the European Court of Auditors said last month that the bloc was not investing enough to achieve its aims of fully replacing Russian energy with diversified fossil fuel supplies.

UK approves long-delayed Jackdaw gas field on energy security grounds

Britain on Wednesday approved the Jackdaw North Sea gas field, ending years of legal and political wrangling as the Labour government seeks to balance its climate goals with energy security concerns. Energy minister Miatta Fahnbulleh said the project would begin supplying gas by the end of this month, helping ease energy costs that have surged during the Iran war. Jackdaw, at its planned peak production of 40,000 barrels of oil equivalent per day, would cover just under 4% of Britain's daily gas demand, according to Reuters calculations based on government data.

Kinder Morgan to invest $4.7 billion in two gas pipeline projects as demand surges

US pipeline operator Kinder Morgan said on Wednesday it has approved a total of $4.7 billion as its share of investments in two major natural gas pipeline joint ventures, citing rising demand from power plants, data centers and LNG exporters. The projects helped lift Kinder Morgan's natural-gas project backlog to a record level, underscoring the industry's efforts to expand infrastructure to serve the new demand. Kinder Morgan would invest about $3.1 billion in Southern Natural Gas' Southeast Connector project and $1.6 billion in Natural Gas Pipeline Company of America's (NGPL) Permian Link project.

Europe's benchmark hits €90/MWh for first time since December 2022

Europe's benchmark gas contract traded above €90 per megawatt hour (MWh) for the first time since December 2022 on Tuesday amid increased global competition for supplies tightened by the US-Iran war ahead of winter. The Dutch front-month contract at the TTF hub, Europe's benchmark, hit an intraday high of €90.16/MWh, or $29.62 per million British thermal units, its highest level since December 22, 2022, ICE data showed.

EU still committed to keeping oil, coal and gas in ground in Arctic

The European Union remains committed to "ensuring that oil, coal and gas stay in the ground, including in Arctic regions," according to a new Arctic strategy presented by the European Commission and EU foreign policy chief Kaja Kallas on Tuesday. "Due to its specific vulnerabilities, the Commission will work with partners to protect the Arctic environment and prevent all hydrocarbon reserve developments that pose a threat to the Arctic ecosystem," the document also says.

Qatari electricity lifeline for Lebanon includes two power plants, LNG supply deal

Qatar plans to construct two power plants in Lebanon over the next three years and sign a 20-year liquefied natural gas supply deal under a proposal to revive the ailing Lebanese power sector, a document seen by Reuters showed. Lebanon's energy sector is at the centre of the country's financial and economic malaise, contributing tens of billions of dollars to the national debt since the country's 1975-1990 civil war even as it failed to deliver 24/7 power.

Northwest Europe gas storage may remain low for winter

Northwest European gas storage is likely to remain low for winter despite stronger Norwegian production unless Middle East LNG supplies pick up, Goldman Sachs said on Monday. Norwegian gas exports to NW Europe have climbed back to the 2022 highs, analysts at the bank said in a note.

EQT to buy Range Resources in $13 billion deal to create top US gas producer

EQT said on Monday it will buy Range Resources in a $13 billion all-stock deal to create the largest US natural gas producer, betting on rising demand from LNG exports and power generation. The deal combines two major Appalachian Basin producers, giving EQT greater scale and infrastructure to serve utilities, LNG exporters and industrial customers.

IEA flags concentration of clean energy supply chains as emerging challenge

The concentration of a small number of countries in clean energy supply chains is an emerging challenge for Southeast Asian countries, International Energy Agency Executive Director Fatih Birol said on Tuesday, amid fast-rising power demand in the region. "The age of electricity is coming. We will still use oil, still use natural gas including LNG, but electricity demand is growing very strongly," Birol told delegates at the Singapore International Energy Week conference.

CAPESIZE MARKET

ATLANTIC AND PACIFIC BASIN

The Capesize market rebounded strongly, recovering much of the previous week's slide as a sharp rally in freight derivative (FFA) values and the approach of Typhoon Champi tightened expectations of prompt tonnage supply. Gains eased only marginally into the weekend.

The Western Australia–Qingdao route (170,000 mt iron ore, plus/minus 10%) rose 65 cents/wmt to USD 12.25/wmt on 19 October, although exchanges were sluggish with many participants attending a Pilbara Ports forum in Perth.

It added 75 cents/wmt to USD 13.00/wmt on 20 October as anticipated typhoon delays gave owners leverage to lift offers, Dampier–Qingdao being fixed at mid-to-high USD 12/wmt for 3–5 November laycan, then jumped USD 1.20/wmt to USD 14.20/wmt on 21 October as Zhoushan and the Changjiangkou channel closed in adverse weather.

The route eased 5 cents/wmt to USD 14.15/wmt on 22 October, with east China ports still shut ahead of landfall and Dampier–Qingdao fixed at USD 14.15/wmt for 5–7 November and Port Hedland–Qingdao at low-USD 14/wmt, and slipped 15 cents/wmt to close at USD 14.00/wmt on 23 October as enquiry thinned, up USD 2.40/wmt on the week.

Tubarao–Qingdao advanced 80 cents/wmt to USD 31.00/wmt, USD 1.40/wmt to USD 32.40/wmt, USD 1.30/wmt to USD 33.70/wmt and 65 cents/wmt to USD 34.35/wmt before shedding 15 cents/wmt to USD 34.20/wmt, up USD 4.00/wmt.

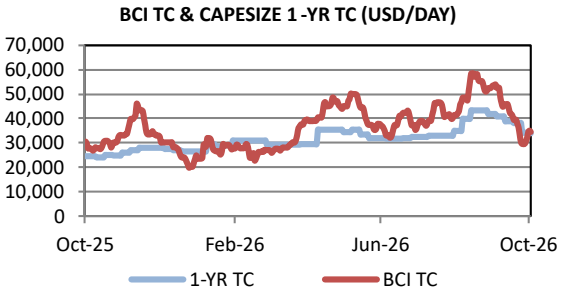

South Atlantic cargo volumes built steadily for second-half November laycan and owners raised offers despite ample prompt ballaster supply, leaving a marked contango across November loading, with bids around mid-USD 34/wmt for end-November.

Reported fixtures progressed from USD 31.00/wmt for 11 November onward to mid-USD 34/wmt for 20–26 November.

Saldanha Bay–Qingdao gained 60 cents/wmt, USD 1.00/wmt, 85 cents/wmt and USD 1.00/wmt before easing 15 cents/wmt to close at USD 25.85/wmt, up USD 3.30/wmt.

A Capesize was fixed Saldanha Bay–Dangjin at about high-USD 25/wmt for 13–17 November laycan.

PANAMAX MARKET

ATLANTIC BASIN

The Atlantic market showed a mixed but generally resilient tone, with solid demand for transatlantic employment and continued support from grain and coal movements.

ECSA activity remained relatively selective, whilst firm earnings on US Gulf and USEC routes continued to underpin Owners' expectations.

Meanwhile, fresh fixtures into Europe highlighted a market where positioning and vessel availability remain key factors.

On the ECSA side, an 82,000 dwt vessel fixed for Singapore-Japan grains at USD 23,000/day, whilst another similar-sized unit achieved USD 18,750/day on the same route, indicating a varied rate range depending on vessel position and timing.

The South American market also saw a coke cargo from Mamonal to Itaguai quoted at USD 36.50/tonne fio, adding further activity to the regional picture.

For US Gulf grain business, a 66,000 dwt cargo to China was quoted at USD 72.50/tonne fio, reflecting firm demand for long-haul grain movements.

Transatlantic and Atlantic redelivery fixtures offered further support: an 82,000 dwt vessel fixed from NCSA to Skaw-Gibraltar at USD 23,500/day, with no EU ETS included, whilst USEC/India employment achieved USD 35,000/day.

These levels underline the continued strength of longer-haul employment out of North America, particularly for vessels able to secure attractive backhaul or fronthaul options.

PACIFIC BASIN

The Pacific remained relatively active, Australia accounting for most reported fixtures, whilst Indonesia continued to attract solid demand on both Pacific round voyage and longer-haul employment.

NOPAC activity was more limited, with rates varying by vessel size and route.

Indonesia saw firm levels on South China and longer-haul routes: an 82,000 dwt 2010-built fixed Indo/South China at USD 23,000/day, whilst an 81,000 dwt 2015-built achieved USD 23,750/day plus USD 250,000 for an Indo round voyage.

South Korea business was reported at USD 22,000/day for a 76,000 dwt 2014-built, whilst an 83,000 dwt 2008-built fixed Indo/India at USD 23,250/day.

Further South China fixtures included a 76,000 dwt 2000-built at USD 18,000/day and a 76,000 dwt 2001-built at USD 19,000/day, and Indo/India business was also reported at USD 14,500/day for an 82,000 dwt 2006-built.

NOPAC activity included an 82,000 dwt 2024-built fixed at around USD 21,000–22,500/day for NoPac/Singapore-Japan; an 85,000 dwt 2016-built achieved USD 26,000/day on the same route, whilst further fixtures were reported at USD 19,000/day for an 81,000 dwt 2012-built and USD 18,000/day for an 82,000 dwt 2011-built.

An 82,000 dwt 2026-built also fixed NoPac/Singapore-Japan grains at USD 23,400/day.

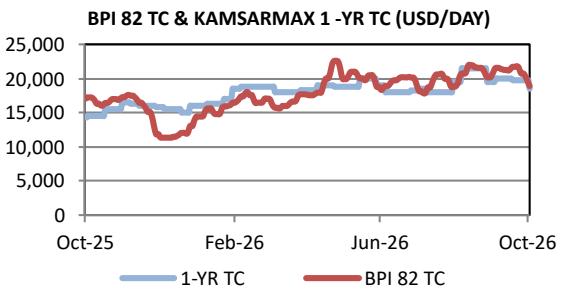

Australia remained the most active Pacific area, with East Coast fixtures covering China, South China, Japan, Singapore-Japan, Vietnam and India, and Singapore-Japan employment ranging from around USD 20,500/day to USD 24,500/day, with additional bonuses on some fixtures.

An 82,000 dwt 2019-built fixed EC Australia/China at USD 24,000/day, whilst an 82,000 dwt 2015-built achieved USD 24,500/day for EC Australia/Japan coal.

Further fixtures included an 88,000 dwt 2008-built at USD 20,500/day and an 81,000 dwt 2011-built at USD 22,250–22,500/day, both for EC Australia/Singapore-Japan.

A 95,000 dwt 2013-built fixed EC Australia/Vietnam at USD 24,000/day, whilst China-bound business included an 82,000 dwt 2018-built at USD 19,750/day and an 83,000 dwt 2023-built at USD 24,500/day.

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

The US Gulf was steady, though some activity was recorded across both Ultramax and Handy segments.

On Supras/Ultras transatlantic trading was active: to Med/Turkey, a 67k went on subs to East Med with coal USD 36,000, two 65k secured USD 34,000 and USD 31,000 for West Med grains and a 60k to Turkey with grains USD 31,500, whilst to UK-Continent two 63/64k fixed wood pellets USD 30,000.

On fronthaul, a 64k went on subs to India with petcoke USD 37,000–38,000.

On South American and regional runs, 61/64k tonnage fixed to NCSA/ECSA with grains and coal at USD 22,000 and a 59k to Brazil with coal USD 20,000.

On Handies, transatlantic and long-haul runs held steady: a 40k fixed via St. Lawrence to Egypt with grains USD 21,000 and another 40k to India with petcoke at USD 19,000, whilst regionally a 41k fixed to Atlantic Colombia with grains at USD 17,500.

EAST COAST SOUTH AMERICA

Growth in the South American Handysize market continues, rates well in excess of 30,000, whilst Supras/Ultras have seen a slight decline on both transatlantic and fronthaul.

A 63k Ultramax loading Recalada fixed to SE Asia at USD 20,500/day+USD 1m bb and a 58k Supramax open Douala secured USD 18,400/day+USD 840k bb APS ECSA/Chittagong.

On Handysize, Pacific and transatlantic runs command strong levels: a 38k open Santos is on subs APS Recalada/WCSA at USD 36,000/day, transatlantic saw a 40k open Vila do Conde fix APS Fazendinha/Algeria USD 30,500/day and a 39k APS Santos/Continent USD 32,000/day, whilst on long-haul runs to Africa and Asia a 32k open Cotonou took USD 25,000/day APS Paranagua/East Africa and another 32k open Abidjan fixed APS Recalada grains to Indonesia USD 22,750/day.

Period interest remains solid, a 38k open Imbituba fixing 4/6 months at USD 22,500/day and another 38k dely Upriver taking 5/7 months at USD 19,500/day.

NORTH EUROPE / CONTINENT

The Continent stayed largely in line with last week, holding firm overall despite slightly quieter activity on larger units.

A major driver continues to be the strong US East Coast market, particularly attractive for Handysize ballasters and helping keep regional freight well supported across the board.

On Handysize, rates stayed very healthy on both transatlantic and outbound legs: repositioning runs to the US Coast remained high, a 39k (2016) open Antwerp fixing DOP via Bremen to USG with steels USD 19,500/day, whilst outbound to West Africa saw strong numbers, a 34k (2010) open Liverpool fixing via Continent to Douala USD 24,000/day.

On Supras/Ultras, tone and levels remained close to the previous week's: transatlantic business into the US East Coast kept paying solid figures, a 61k (2014) open Aviles fixing APS Garrucha/USEC with gypsum USD 20,000/day, whilst premium trade out of the Baltic stayed active, a 55k (2006) open Dunkirk fixing via the Russian Baltic to USEC with fertilisers USD 22,000/day.

BLACK SEA / MEDITERRANEAN

The Black Sea and Mediterranean market has reported very slow activity, with most cargoes being sourced elsewhere and Owners still refusing to call the area, not all of them but most.

For Handysizes of 35,000 dwt or more, intra-Med is decreasing to USD 15,000 per day.

Transatlantic trips are decreasing a little: the route to Rio de Janeiro-Recalada is at USD 10,000, whilst the trip to Boston-Galveston is at USD 14,500.

The Supramax transatlantic remained stable at USD 16,500/16,750 per day.

Trips East remained stable at USD 25,000 on Supramaxes and around USD 26,000 daily for Ultramaxes.

SUPRAMAX & HANDYSIZE MARKET

MEG / INDIAN OCEAN

Indian Ocean Supramax and Ultramax rates were broadly flat over 19–23 October, South Africa steady and India under pressure.

The 19 October daily was unavailable, so movements are measured from 16 October.

The week opened firm on lively enquiry, led by Indonesia–India coal, but weak iron ore prices then curbed exports from both Indian coasts, leaving few cargoes and bearish sentiment; a Supramax on the east coast of India asking USD 18,000/day for Indonesia–India business was reported down to the USD 15,000s/day.

Period rates toward India, Bangladesh and the coastal trades nonetheless held up, owners favouring clinker to Chittagong at a premium.

Out of the Persian Gulf, the limestone trade edged up.

Freight to move 50,000 mt of limestone from Mina Saqr to Paradip on the east coast of India held at USD 19.25/mt on 20–21 October, eased to USD 19.20/mt, then closed at USD 19.30/mt, up 15 cents/mt on the week.

South Africa was rangebound on scarce fixing information.

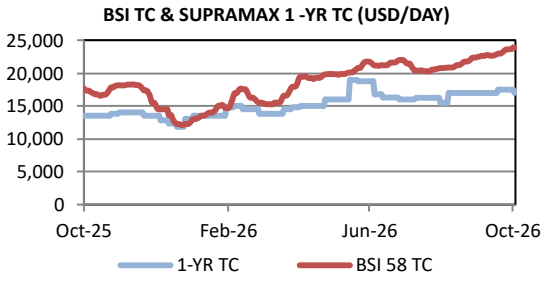

Freight to carry 50,000 mt of coal from Richards Bay Coal Terminal to Port Qasim moved within a USD 23.55–23.80/mt band, closing at USD 23.60/mt, down 5 cents/mt on the week.

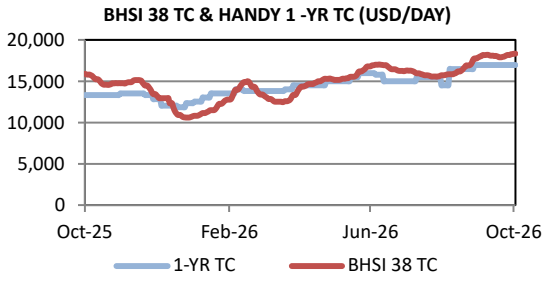

FAR EAST

On Supramaxes/Ultramaxes it was a rather slow week, Asia again the driver, NoPac easing but backhaul and Indonesia active, the firm market leaving Operators keen to take period tonnage to cover backhaul: Viet Thuan 56-02 (2006/55,709) fixed dely Dongfang prompt a TCT clinker to Bangladesh USD 32,000, Askio (2020/63,464) dely passing CJK a TCT West Africa USD 25,750 with Chinaland, a 63,000-dwt North China/West Africa USD 27,500, Indigo Jugem (2015/61,254) dely CJK a TCT steels to USG USD 18,500 for the first 75 days, USD 23,500 thereafter, St Ajisai (2022/61,105) dely Singapore 26/31 Oct Indo/Thailand USD 24,750 with Norden and a 64,000-dwt dely Busan min 4/about 6 months USD 24,250. Handysize slowed after several weeks but the Pacific stayed positive despite limited activity, period activity still evident, Paiwan Hero (2026/39,654) fixing dely Caldera prompt NoPac/Continent clean cargo USD 23,000 and a 40,000-dwt dely CJK spot a TCT ECI USD 22,000.

CRUDE TANKER MARKET

Rates were generally softer, with the exception of Aframaxes in the Atlantic.

VLCC

Rates kept on falling, down to WS 570 ex Gulf of Oman, WS 550 ex West Africa and USD 57 million ex US Gulf, all to China.

Suezmax

The Western market eased to the WS 725 level for West Africa to Europe and WS 735 for Guyana to Europe, but was steady at WS 1,075 for CPC to the Mediterranean. From the Gulf of Oman, rates were down to WS 800 eastbound and WS 440 westbound, and easing.

Aframax

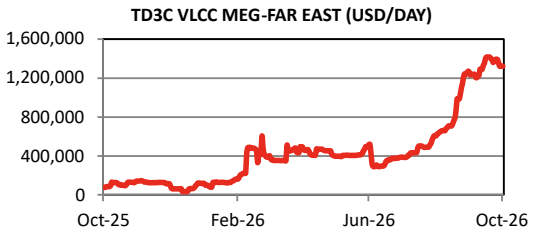

The cross-Mediterranean market jumped to at least WS 840 for 80,000 mt, and rates for US Gulf to Europe bounced back towards the WS 730 level for 70,000 mt.

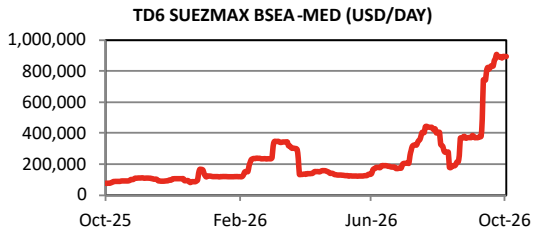

Delays for daylight-restricted tankers at the **Turkish Strait**s are now at about 3.5 days northbound and 2.5 days southbound.

PRODUCT TANKER MARKET

CLEAN

Handies Cross-Med

Rates moved up and down throughout the week but still gained around 45 points overall, closing at around WS 530.

The list began to lengthen towards the end of the week, with rates remaining particularly load port sensitive.

Flexies ex Med

A steady week overall for the smaller vessels, with most activity focused on Med/Continent trades rather than pure cross-Med runs, apart from a small market parcel ex France to Italy with a couple of suitable candidates.

Rates held steady on both sizes, although Flexi activity kept, as always, a low profile and some units struggled to find employment over the last days of the week.

Intermediates / Small

Likewise a steady week, with most activity focused on Med/Continent trades rather than pure cross-Med runs, apart from the small market parcel ex France to Italy, and rates held steady on both sizes.

DIRTY

Handies

Activity was stronger on Handies, with overall availability remaining tight enough to support rates at around WS 470/475.

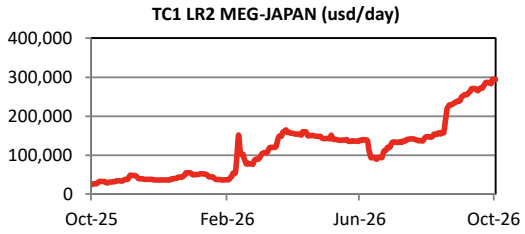

MRs

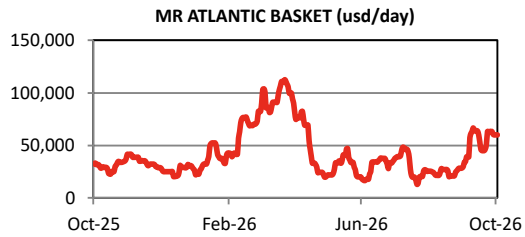

Activity was quieter on MRs, as most of the available tonnage had already been fixed the previous week, whilst some other units were sitting on the Continent.

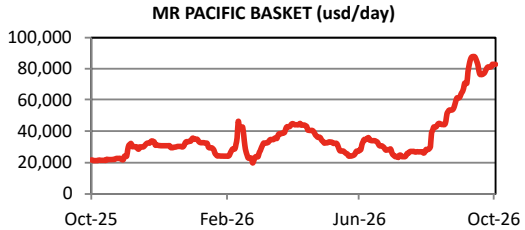

Overall availability nevertheless remained tight, with MR cross-Med assessed at around WS 450.

CONTAINERSHIP MARKET

The container charter market remained firm during Week 43.

Sentiment was supported by a standout 12-month fixture in the 2,500 TEU sector, whilst tight tonnage availability and continued demand for feeder tonnage kept rates firm across all segments.

Smaller sizes remained well supported by demand linked to Red Sea and Persian Gulf trades.

Some reported fixtures:

CAPE CITIUS, blt 2021, 2,756 teu, geared, Fixed to OOCL for 35-37 months at USD 32,950

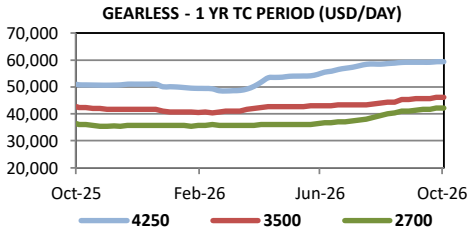

SEATRADE CHILE, blt 2024, 1,781 teu, gless, Fixed to DEL MONTE for 23-25 months at USD 29,000

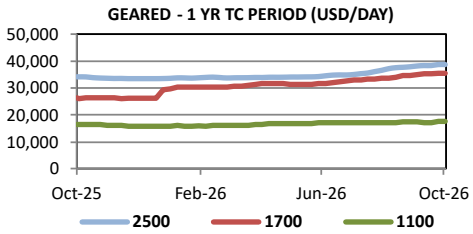

M. ALBERT, blt 2026, 1,056 teu, gless, Fixed to TS LINES for 11-13 months at USD 17,800

NEWBUILDING ORDERS

Newbuilding activity this week was broad-based, with significant contracting across the bulk carrier, container, tanker, gas carrier and offshore sectors.

The bulk carrier sector was particularly notable for a major grain transportation programme involving COSCO Shipping Bulk.

In the bulk carrier sector, COSCO Shipping Bulk reportedly arranged a programme for 16x 87,000 dwt bulk carriers at Fujian Mawei, priced at approximately USD 49.5 million each, with deliveries scheduled between March 2029 and September 2035.

In the container sector, HMM reportedly contracted 7x 13,000 teu containerships at Hyundai Samho, priced at approximately USD 180.1 million each, with deliveries scheduled for March 2028.

Danaos Shipping also reportedly contracted 2x 9,200 teu containerships at Shanghai Waigaoqiao, priced at approximately USD 109 million each, with deliveries scheduled for June and December 2029.

Global Car Carriers was active in the car carrier sector, reportedly contracting 2x PCTCs at Zhoushan Changhong International, with deliveries scheduled for June and October 2030.

The vessels will feature LNG dual-fuel propulsion and are designed by Shanghai-based SDARI.

Tanker ordering continued across the product and crude oil segments.

Nanjing Tanker reportedly contracted 4x 115,000 dwt LR2 tankers at Dalian Shipbuilding Industry, with deliveries scheduled between February 2029 and July 2030.

No price reported so far.

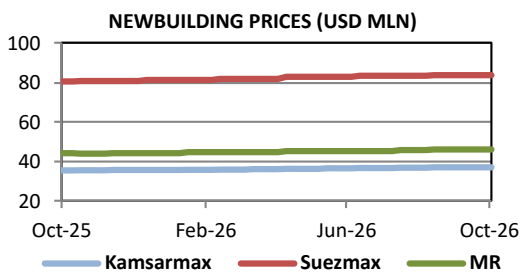

In the gas carrier sector, BGN International reportedly contracted 4x 93,000 cu.m.

LPG carriers at Hyundai, priced at approximately USD 118 million each, with deliveries scheduled between August 2029 and February 2031.

Alpha Gas also reportedly contracted 2x 88,000 cu.m. LPG/ammonia carriers at Hengli Heavy Industries, with deliveries scheduled for June 2029.

SECONDHAND SALES

Another active week in the second-hand market, with a number of transactions reported across both the dry bulk and tanker sectors.

In the dry bulk sector, MARITIME KING 96,000 dwt 2011 Imabari was reportedly sold for around $19 mln.

PABAL 76,000 dwt 2012 Taizhou Kouan Shipbuilding changed hands for around $17 mln, while LIBRA CONFIDENCE 63,000 dwt 2019 New Dayang was sold for around $33.5 mln.

Among Supramax vessels, KRISTINITA 58,000 dwt 2011 Tsuneishi Zhoushan was reportedly sold for around $21 mln.

SALTWIND EXPLORER 56,000 dwt 2011 Hyundai Vinashin changed hands for around $16.5 mln, while YASA UNSAL SUNAR 56,000 dwt 2007 Mitsui Tamano was reportedly sold for around $15.1 mln.

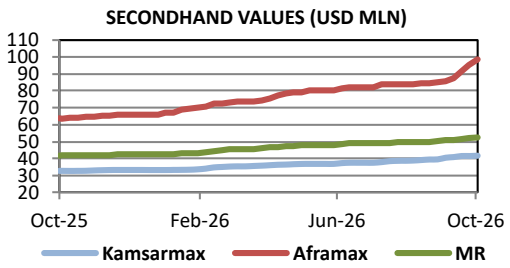

JIN XING 55,000 dwt 2007 Oshima Shipbuilding was sold to Chinese interests for around $14.6 mln, while SHENLI 56,000 dwt 2004 Mitsui Tamano changed hands for around $9.8 mln.

In the tanker sector, ZOUZOU N. 150,000 dwt 2010 New Times was reportedly sold to ADNOC for around $103.3 mln.

AEGEAN HARMONY 116,000 dwt 2007 Samsung changed hands for around $55 mln, while AFRA MARE 105,000 dwt 2008 Hyundai was reportedly sold for around $59 mln.

DEMOLITION SALES

While the ongoing conflict in the Middle East shows little sign of any resolution, sentiment across the Indian Subcontinent demolition market remains positive.

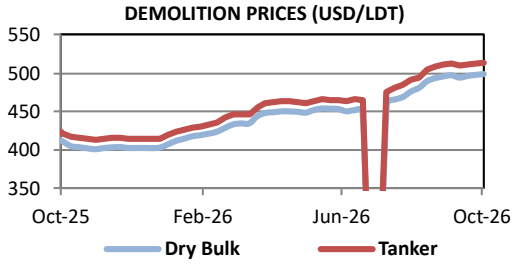

Strong freight rates in all sectors continue to starve the market of any real activity with with less than a handful of sales reported each week. In terms of order, Bangladesh retains its top spot on pricing with numbers comfortably in the USD 500s per LT/LDT for delivered tonnage while Pakistan remains competitive and India continues to be the go to destination for specialist tonnage such as stainless steel and gas carriers.

While Indian Buyers have found a way to quietly absorb sanctioned tonnage the Cash Buyers and market players alike are closely monitoring reports of a recent U.S. Government circular concerning the potential removal of OFAC sanctions on certain vessels which could create additional and much welcomed recycling opportunities.

Little to report in the way of notable sales this week, a vintage 1998 blt small handysize bulker the MV LIAN YI DA 2 HAO has reported been sold at region USD 512 LT/DLT in to the Bangladesh market.
