MARKET SUMMARY

INDIA

- The market has come off drastically this week, reflecting heightened pressure and subdued activity.
- Local steel sales remain very poor, with demand virtually absent, further dampening overall market sentiment.
- Industry participants are growing increasingly cautious, adopting a wait-and-watch approach as uncertainty continues to dominate the outlook.

BANGLADESH

- The market remains soft, with steel demand continuing to fall and sentiment staying weak across the sector.
- Ongoing foreign exchange shortages are adding further strain, leaving many industry players cautious and hesitant to commit.
- Around 17 yards are already HKC compliant, while the others are still chasing NOCs, though fresh approvals from the Ministry look unlikely.

PAKISTAN

- The local market remains depressed, with smuggling of goods from Iran weighing heavily on prices and sentiment.
- Buying interest is extremely limited, with only a handful of buyers and breakers active in the market.
- Current offers are slipping further, with buyers now positioned closer to the USD 400 level.

TURKIYE

- The market recorded no change this week, with both prices and activity holding at the same levels.
- Such stability is not unusual for Türkiye, where the market often moves only when clear external triggers emerge.
