MARKET SUMMARY

INDIA

- The Indian market showed some recovery last week, with renewed buying interest offering a sense of improvement.
- However, with Bangladesh continuing to pay notably higher prices, most sellers remain inclined to divert tonnage there, leaving India with limited activity.
- The arrival of sanctioned vessels at substantially lower levels could challenge the competitiveness of other local yards in the near term.

BANGLADESH

- The Bangladeshi market has softened slightly, though it continues to attract firm buyer interest, especially for tankers, where sentiment remains relatively positive.
- In contrast, bulk carrier prices have weakened further, reflecting a more cautious approach among recyclers.
- Despite the softer tone, Bangladesh retains a clear lead over regional competitors, maintaining stronger price levels and consistent momentum.

PAKISTAN

- The Pakistani market remains largely unchanged, with dull sentiment and limited activity persisting for another week.
- However, the government's plan to establish a new green ship recycling yard at Port Qasim has drawn industry attention, as it could bring much-needed modernization, environmental compliance, and renewed investor confidence to the sector in the longer term.

TURKIYE

- Market sentiment and price levels have remained stable over the past few weeks, showing no major movement in either direction.
- The ongoing shortage of available tonnage has kept activity subdued, as limited supply continues to restrict new transactions.
- The Central Bank of Türkiye has projected year-end inflation at around 31%, indicating that price pressures in the economy remain elevated.
