weekly market report

Week 42/2026 (12 Oct – 19 Oct)

Comment: Brazil's Crude Oil Exports

banchero costa
RESEARCH

BRAZIL CRUDE OIL EXPORTS

After a slight decline in 2024, when global crude oil loadings decreased by -0.2% y-o-y, things picked up in 2025, with full-year volumes increasing by +1.8% y-o-y.

In Jan-Sep 2026, global crude oil loadings decreased by -6.1% y-o-y to 1,547.6 mln tonnes, excluding all cabotage trade, according to vessels tracking data from LSEG.

Exports from the Arabian Gulf were down by -29.1% y-o-y to 464.5 mln t in Jan-Sep 2026, accounting for 30.0% of global seaborne crude trade, down from 39.8% in the same period of last year, reflecting the disruption from the ongoing war in the Persian Gulf.

Exports from Russian ports (including oil of Kazakh origin shipped via the CPC terminal) increased by +8.3% y-o-y to 187.1 mln t in Jan-Sep 2026, or 12.1% of global trade.

From South America, exports surged by +33.1% y-o-y to 212.3 mln t. From the USA, exports went up by +10.5% y-o-y to 150.5 mln tonnes in Jan-Sep 2026.

From West Africa, exports decreased by -10.2% y-o-y to 118.7 mln t. From ASEAN exports rose by +8.3% y-o-y to 86.2 mln t in Jan-Sep 2026 (this inevitably includes trans-shipped cargoes).

In terms of demand (measured by arrival at discharge ports), global seaborne crude imports totalled 1,549.2 mln t in Jan-Sep 2026, down -5.4% y-o-y.

The top single-country seaborne importer of crude oil in Jan-Sep 2026 was Mainland China, accounting for 18.8% of global trade, although the EU27 as a bloc was a larger buyer.

Volumes into China declined by -20.7% y-o-y to 291.8 mln t in Jan-Sep 2026, from 367.7 mln t in Jan-Sep 2025.

Imports into the EU27 increased by +1.3% y-o-y to 350.9 mln t, accounting for 22.6% of global trade. To ASEAN, imports decreased by -8.0% y-o-y to 198.7 mln t. To South Korea, imports declined by -10.7% y-o-y to 92.0 mln t.

Imports into the USA increased by +4.0% y-o-y to 96.8 mln t in Jan-Sep 2026. To Japan, imports declined by -13.5% y-o-y to 71.1 mln t.

Brazil is fast emerging as a significant exporter of crude oil, with volumes increasing rapidly in recent years.

In Jan-Dec 2023, volumes surged by +27.2% y-o-y to 88.2 mln tonnes. In Jan-Dec 2024, exports increased by a further +4.3% y-o-y to 92.0 mln t. In Jan-Dec 2025, exports rose by a further +18.7% y-o-y to 109.2 mln t.

In 2025, Brazil accounted for 4.9% of global seaborne crude oil exports.

2026 so far has been even stronger, with exports in Jan-Sep 2026 up by +22.8% y-o-y to 97.1 mln tonnes, up from 79.1 mln t in Jan-Sep 2025.

About 30 percent of international crude exports from Brazil in Jan-Sep 2026 were loaded at Acu, about 24 percent from Angra Dos Reis, about 19 percent from Santos, about 3 percent from Peregrino FPSO, about 2 percent from Sao Sebastiao, about 2 percent from Madre Deus, about 2 percent from Itaguai.

The vast majority of crude oil cargoes loaded in Brazil, 68 percent in Jan-Sep 2026, are loaded on VLCCs. About 25 percent of volumes are loaded on Suezmaxes, and 5 percent is loaded on Aframaxes.

In terms of destinations for crude oil shipments from Brazil, the major ones are in Asia, which results in a very strong contribution to shipping tonne-miles.

The number one destination is Mainland China, accounting for 39 percent of Brazilian shipments so far this year. In Jan-Sep 2026, Brazil exported 37.5 mln tonnes of crude oil to China, up +13.4% y-o-y.

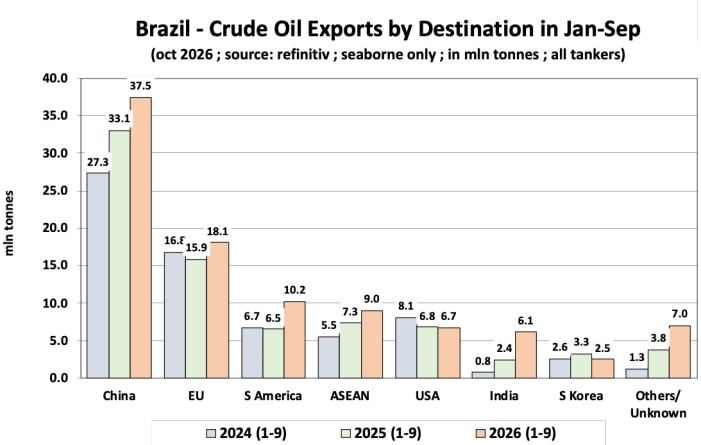

Direction Europe, about 18.1 mln tonnes (18.6 percent of the total) were shipped from Brazil to the European Union in Jan-Sep 2026, up +13.7% y-o-y from the 15.9 mln tonnes in Jan-Sep 2025. Of these, 5.7 mln t were shipped to the Netherlands, 4.6 mln t to Spain, 4.1 mln t to Portugal.

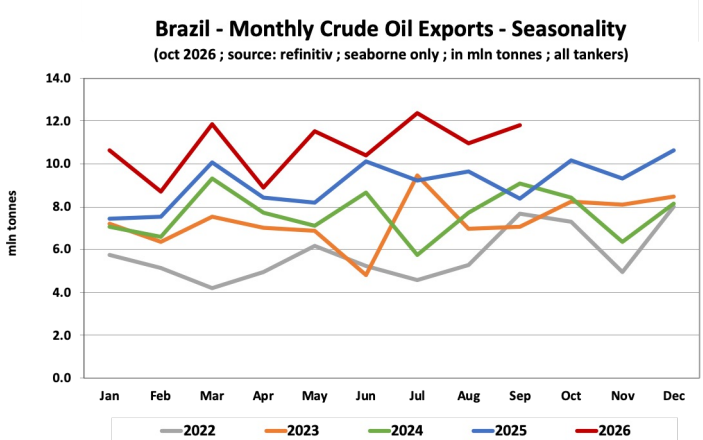

Shipments to the rest of South America surged by +56.3% y-o-y to 10.2 mln tonnes, including 6.8 mln t to Uruguay and 2.5 mln t to Chile.

To India volumes surged +150.3% y-o-y to 6.1 mln tonnes.

To South East Asia, volumes increased by +22.6% y-o-y in Jan-Sep 2026 to 9.0 mln tonnes, from 7.3 mln t in Jan-Sep 2025. Of these, 4.0 mln t were shipped to Singapore, and 2.1 mln t to Malaysia.

Exports to the United States were essentially flat at -1.4% y-o-y to 6.7 mln t, after declining by -16.0% y-o-y in the same period of last year.

COMMODITY NEWS – DRY BULK

China September iron ore imports rise on pre-holiday restocking

China's iron ore imports in September rose 1.2% from the previous month, data showed, as steelmakers restocked ahead of the week-long National Day holiday and expectations grew that steel demand would improve. The world's largest iron ore consumer brought in 109.82 million metric tons of the key steelmaking ingredient last month, data from the General Administration of Customs showed.

China's soybean imports fall 7.7% in September from a year earlier

China, the world's largest soy buyer, imported 11.88 million metric tons of soybeans in September, down 7.7% from the same month last year, data from the General Administration of Customs of China showed. Soybean imports in September fell from 12.87 million tons a year earlier and were down 2.1% from 12.14 million tons in August.

China buys 8-10 US soybean cargoes in first deals since Trump-Xi summit, sources say

Chinese state buyers purchased 8-10 Panamax cargoes of US soybeans this week, the first such deals since the September summit between Presidents Donald Trump and Xi Jinping in Washington, three trade sources told Reuters on Wednesday. The cargoes are for shipment from December onwards, they added.

Brazil soy output to hit record in 2026/27 despite slower area growth, Conab says

Brazil's 2026/27 soybean output is expected to reach a record 181.6 million metric tons, crop agency Conab said on Thursday, up 0.7% from the previous season, driven by a 1.4% increase in planted area to 49.3 million hectares (121.8 million acres). With planting underway in the world's largest soybean producer and exporter, Conab said the area expansion would be the smallest in 20 years as farmers face lower margins and uncertainty related to the El Niño weather pattern.

India customs scrutiny diverts Niger soybeans to Asia at steep discounts, sources say

Around 11,000 metric tons of Niger-origin soybeans bound for India were diverted to other Asian markets and sold at steep discounts as a widening customs probe into suspected import tax evasion deterred Indian buyers, four trade sources said on Thursday. After being diverted at sea, the soybeans were sold to buyers in Vietnam, Indonesia and Bangladesh at prices between $470 and $510 per ton, compared with more than $650 per ton agreed by Indian buyers, who refused to take delivery after customs authorities stepped up scrutiny, the sources said.

Zelenskiy asked neighbours to let grain cargoes through, Hungary PM Magyar says

Ukrainian President Volodymyr Zelenskiy has asked neighbours Poland, Romania, Slovakia and Hungary to allow the transit of Ukrainian grain cargoes because of a Black Sea blockade, Hungarian Prime Minister Peter Magyar said on Saturday. Magyar, who agreed with Zelenskiy to reset Ukraine-Hungary ties at talks on Friday, said he would have no objections to the measure if the Ukrainian grain cargoes only passed through Hungary to other destinations, private broadcaster RTL reported.

Argentina grain sales hit record 105 million tons so far in 2025/26

Argentine farmers have sold more than 105 million metric tons of grain so far in the 2025/26 season, a record for this point in the cycle, the Rosario grains exchange said on Friday. The exchange said the volume, which includes soybeans, corn, wheat, sorghum and sunflower, was 25% above the average of the last five years and nearly 6 million tons above the previous high.

China's corn harvest set to grow; US corn 'not an option yet,' COFCO Futures research director says

China's corn output is expected to rise this year while imports edge lower, with US supplies "not an option yet" because they remain uneconomical, Zhang Dalong, agricultural products research director at COFCO Futures, said on Tuesday. Speaking at a conference in the northeastern city of Dalian, Zhang said China's new-crop corn production would increase by 5 million to 8 million metric tons from last year, largely driven by gains in North China.

Failure to activate Hormuz fertilizer plan could trigger food crisis, UN official says

A failure by the United States and Iran to agree within weeks on a UN-backed plan for moving fertilizer through the Strait of Hormuz could cause a food security crisis in parts of Asia and Africa, an official overseeing the proposed scheme said on Wednesday. The United Nations set up a taskforce in March to facilitate passage of fertilizers through the strait. It is yet to implement the mechanism it drew up, but United Nations Under-Secretary-General Jorge Moreira da Silva said this could be activated within 7-10 days of an agreement between Washington and Tehran.

COMMODITY NEWS – CRUDE OIL & PRODUCTS

China's September oil throughput rises on month, boosted by fuel exports

China's official data showed the oil throughput rate at refineries in September rose slightly for a third straight month, as continued strong fuel exports supported demand after Beijing eased export curbs in mid-July, analysts said. The world's biggest oil buyer slashed oil imports by 21.5% year-on-year in September, while boosting domestic oil output and raising the throughput rate from the previous month to its highest since March this year amid the Iran war.

China's crude stocks slump despite slight rise in September import rate

China's September crude oil imports dropped 21.5% from a year earlier, customs data showed, with higher refinery runs and delayed crude arrivals contributing to the biggest monthly draw in the country's onshore crude inventories in analysts' records. The world's biggest oil buyer imported 37.1 million metric tons of crude oil in September, or 9.03 million barrels per day, with the daily import rate up 1.1% from the previous month, according to data from China's General Administration of Customs.

Saudi leads jump in OPEC+ oil output in September, despite Iran war disruption

Oil producer group OPEC+ posted a sharp gain in production in September, OPEC said on Tuesday, driven by an increase from Saudi Arabia despite ongoing disruptions to shipments through the Strait of Hormuz caused by the Iran war. OPEC+, which includes the Organization of the Petroleum Exporting Countries and allies such as Russia, pumped an average of 39.07 million barrels per day in September, OPEC said in a monthly report, up about 900,000 bpd from August.

IEA to speed up oil stocks release including over 20 million barrels of diesel

The International Energy Agency agreed on Thursday to release over 20 million barrels of diesel to the market and any oil remaining from a record emergency reserves release pledged in March to boost supply and cool soaring prices. US President Donald Trump has pressed European Union countries to draw down reserves or face a potential US diesel export ban as he seeks to lower prices ahead of November 3 midterm elections.

Mideast war alters global bunker buying patterns, industry execs say

The US-Israeli war on Iran has altered bunker buying patterns for shippers globally as they turned to more spot and shorter-term purchases to cope with volatile prices while exploring more alternative locations for supply security, industry executives said. More than seven months since the start of the conflict with Iran, prices of marine fuels remained well over 70% versus pre-war levels, according to data from bunker traders.

Ukraine hits Russian refinery as Zelenskiy says 'we're done' with Trump's energy truce

Ukraine struck a Russian oil refinery on Thursday after President Volodymyr Zelenskiy declared that Kyiv was abandoning a ceasefire covering energy sites announced by US President Donald Trump, and criticised Trump's willingness to strike deals with Moscow. By effectively walking away from Trump's demand that Ukraine halt attacks on Russian refineries and openly criticising the US leader, Zelenskiy risks deepening the biggest rift between Kyiv and Washington since Russia's February 2022 invasion of Ukraine.

Iran ships some LPG, jet fuel despite US blockade, data shows

Iran has managed to export some liquefied petroleum gas and jet fuel since July, despite a US naval blockade, shipping intelligence showed and people involved in security said. Tehran has in recent weeks been concealing such cargoes among a growing volume of ship-to-ship transfers by other Gulf producers off Oman, four people in maritime security who track Gulf oil movements told Reuters.

Global diesel shortages could persist well into 2027, IEA says

Global diesel markets could remain tight well into next year, with resulting high prices driving inflation and hurting economic growth, as conflicts curb output from the Middle East and Russia, the International Energy Agency said on Wednesday. The agency's warning comes on the eve of a meeting that will discuss the scale and timing of releases from the agency's emergency stocks aimed at calming energy markets.

Speed of Europe's diesel stock release in focus as IEA meets

The speed at which Europe plans to release its large diesel stocks will be the market focus when the International Energy Agency meets on Thursday, with analysts saying a rapid draw could push fuel prices lower but have little impact if spread over many months. The price of diesel, which powers transport, agriculture and industry, has surged to record highs in many markets as supplies from Russia and the Middle East have fallen, threatening to push inflation and the cost of living higher and adding to pressure on governments.

COMMODITY NEWS – NATURAL GAS & POWER

Guyana may scale back LNG plans as Exxon needs more gas for its wells, sources say

ExxonMobil has told Guyana it will need more offshore gas to maximize oil production than the government had expected, potentially leaving less for liquefied natural gas production and exports, two people close to the talks said. Guyanese officials are now weighing whether to shrink a planned LNG project or skip exports altogether and use the gas for domestic power and petrochemical facilities only. It would deal a blow to the South American nation's ambitions to become a regional energy powerhouse as it continues to grow oil and gas output.

Taiwan cites progress on Alaska LNG after Trump says it will buy 30% of output

Taiwan said it was making progress in talks to buy LNG from Alaska and would invest $4.4 billion in the project after US President Donald Trump told a rally in the state that Taipei would buy 30% of its output. Taiwan's economy ministry said state-owned energy firm CPC Corp has made significant progress with the project developer after nearly a year and a half of negotiations and evaluation.

Woodside natural gas project unit paused after Greenpeace protest off Western Australia

Woodside said operations remained paused on Sunday at a floating production unit, part of its $12.5 billion Scarborough natural gas project off the coast of Western Australia, due to a Greenpeace protest at the platform. Two activists from the environmental advocacy group slept overnight on the semi-submersible unit, located around 375 km (233 miles) off the state's northwest coast, in the protest that started on Saturday, Greenpeace said.

Venture Global inks deals with GE Vernova, Baker Hughes for power expansion

Venture Global said on Thursday it had signed deals with GE Vernova and Baker Hughes to support up to 16 new power generation units, advancing plans to develop off-grid power capacity that could support AI data centers and its LNG operations. The rapid growth of data centers has fueled interest in behind-the-meter power projects as developers seek to secure dedicated electricity supplies without adding strain to already constrained public power grids.

Turkey to send Black Sea gas platform offshore, aiming to double output

Turkey will send its first floating gas production platform to the Black Sea on Saturday, a move expected to roughly double output from its largest domestic gas field, Energy Minister Alparslan Bayraktar said on Thursday. The Osman Gazi platform is expected to begin production in early 2027, eventually raising daily output from the Sakarya gas field to 20 million cubic metres from the current 9.5 million, equivalent to 7.3 billion cubic metres (bcm) annually.

EU delays methane rules on oil and gas imports for a year

The European Commission proposed a one-year delay to the EU's methane emissions rules for oil and gas imports on Wednesday, after pressure from governments including France and the United States. The rules, due to take effect on January 1, 2027, would have required foreign oil and gas suppliers to the EU to monitor and report methane, a potent greenhouse gas.

Europe's battery boom has a dirty secret: Martin Vladimirov

Europe's battery boom is proving that storage can help lower peak power prices. But unless government policy changes, battery systems may simply profit from fossil-fuel use instead of helping to eliminate it. Battery energy storage systems have proliferated in recent years, reshaping how profits are shared in the electricity market. Global storage capacity grew 66% last year to almost 302 gigawatts (GW), up 150-fold in a decade. Falling production costs are changing batteries from expensive renewable add-ons into game changers that are revolutionizing the structure of the power market.

CAPESIZE MARKET

ATLANTIC AND PACIFIC BASIN

The Capesize market fell steeply in a thoroughly bearish week, abundant tonnage in both basins and successive declines in freight derivative (FFA) values tilting the market firmly in charterers' favour.

The Pacific stabilised only on the final session; both Atlantic routes fell throughout.

The Western Australia–Qingdao route (170,000 mt iron ore, plus/minus 10%) lost 80 cents/wmt to USD 13.40/wmt on 12 October, exchanges thinned by a Japanese public holiday and a dearth of fresh cargoes, a mining major fixing Dampier–Qingdao at about USD 13.40/wmt for 27–29 October laycan.

It shed a further 45 cents/wmt to USD 12.95/wmt on 13 October, three Capesizes being taken from Dampier at around USD 12.95/wmt, and 90 cents/wmt to USD 12.05/wmt on 14 October as owners cut offers aggressively despite spiking bunker prices; three more Dampier–Qingdao ships were fixed between USD 12.00/wmt and USD 12.10/wmt.

A further 80 cents/wmt took the route to USD 11.25/wmt on 15 October, matching a Dampier–Qingdao fixture at that level, before it rebounded 35 cents/wmt to close at USD 11.60/wmt on 16 October on firmer derivative values, down USD 2.60/wmt over the week.

Tubarao–Qingdao declined in every session, by 25 cents/wmt, 50 cents/wmt, 80 cents/wmt, USD 1.25/wmt and 50 cents/wmt, to close at USD 30.20/wmt, down USD 3.30/wmt.

South Atlantic cargo volumes were ample but concentrated on second-half November laycan, and participants repeatedly flagged a surplus of prompt ballasters threatening to spill into those dates; the curve remained in contango across November loading.

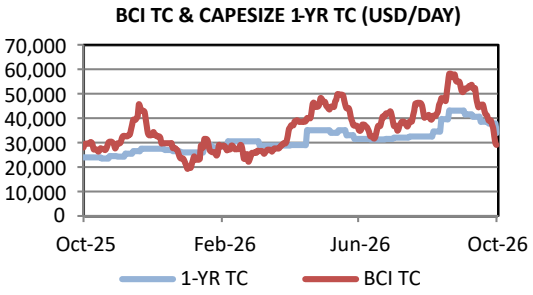

Reported fixtures fell from mid-USD 31/wmt for 10 November onward to about USD 30.00/wmt for 15–20 November.

A Capesize was also fixed Pointe Noire–Qingdao for second-half November, rate undisclosed.

Saldanha Bay–Qingdao fell by 75, 35 cents/wmt, USD 1.40/wmt, then 30 and 40 cents/wmt, to close at USD 22.55/wmt, down USD 3.20/wmt.

A Capesize was fixed Saldanha Bay–Qingdao at low-mid USD 23/wmt for 1–5 November laycan.

CAPESIZE	Unit	16-Oct	9-Oct	W-o-W	Y-o-Y

PANAMAX MARKET

ATLANTIC BASIN

The Atlantic market continued to strengthen, with ECSA tonnage commanding increasingly attractive levels, particularly for trips into the Continent and Mediterranean.

Fronthaul grain demand remained supportive, whilst fresh transatlantic business and firm coal rates helped reinforce the positive sentiment across the basin.

In ECSA, an 82,000 dwt newbuilding fixed for Skaw-Gibraltar redelivery at USD 39,000/day, setting a new high among the reported fixtures and highlighting strong demand for modern tonnage.

Fronthaul activity also remained healthy, with an 82,000 dwt 2016-built fixing for Singapore-Japan grains at USD 22,000/day plus USD 1.25m ballast bonus.

Several vessels were reported positioning towards ECSA for further employment, with transatlantic trips achieving USD 35,000–37,000/day APS, reflecting continued confidence in the route.

On the transatlantic coal side, a 75,000 dwt cargo from Newport News to East Coast India was quoted at USD 51.50/tonne fio, whilst another 82,000 dwt vessel fixed a two-leg voyage with redelivery Skaw-Gibraltar at USD 27,000/day.

These fixtures point to sustained demand for Atlantic coal movements, although the cargo rate and time-charter figures are not directly comparable.

PACIFIC BASIN

The Pacific market showed firmer levels across Australia and longer-haul Indonesian business, whilst NOPAC activity remained limited.

Australian fixtures were mostly concluded in the mid-USD 20,000s, and Indonesia/South Korea runs achieved up to USD 23,500.

Indonesian business strengthened, particularly on longer-haul routes to South Korea, with rates reaching USD 23,500: an 82,177 dwt 2011-built fixed USD 23,500 for Indo/South Korea, whilst an 82,029 dwt 2025-built achieved USD 20,750 for Indo/South China.

Further Pacific round-voyage business included a 74,492 dwt 2001-built at USD 16,000 and an 82,203 dwt 2026-built at USD 22,000, both for Indo/South China, whilst a 75,740 dwt 2006-built fixed USD 16,500 for Indo/China with metcoke.

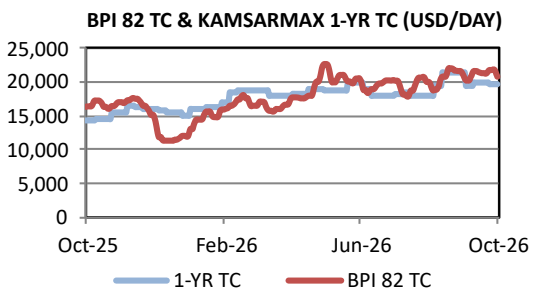

NOPAC activity was relatively limited compared with Australia and Indonesia, with one confirmed fixture reported: an 81,852 dwt 2012-built fixed USD 19,250 for a NoPac/Singapore-Japan round.

The limited number of fixtures makes it difficult to establish a broader market trend.

Australia remained the main source of Pacific activity, with most East Coast fixtures in the low-to-mid-USD 20,000s and some higher levels: an 84,998 dwt 2023-built fixed USD 25,000 for EC Australia/Singapore-Japan, whilst an 82,084 dwt 2017-built achieved USD 21,500 on the same route.

Further business included an 84,790 dwt 2016-built at USD 26,000–26,400 and an 81,290 dwt 2020-built at USD 24,000, both for EC Australia/Singapore-Japan, whilst an 84,986 dwt 2023-built fixed Port Kembla/India at USD 26,500 and an 85,020 dwt 2016-built achieved USD 27,000 for WC Australia/China.

PANAMAX	Unit	16-Oct	9-Oct	W-o-W	Y-o-Y

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

N/A

EAST COAST SOUTH AMERICA

The ECSA market continues to stagnate on Supras and Ultras, whilst growth in the Handy segment continues at a rapid pace.

Rates, however, remain fairly high despite the abundance of cargo.

On transatlantic runs levels remain supported: a 39,000 dwt unit fixed APS Santos to the Continent at USD 32,000/day, whilst a 36,000 dwt unit is fixed APS Santos to Morocco at USD 29,500/day.

Heading north to Norway, a 34,000 dwt unit open Venezuela secured USD 15,000/day plus USD 150,000 ballast bonus APS Vila do Conde.

In the period market, a large Handysize open South Brazil took a four/six-month charter, redelivery worldwide, in the low USD 20,000s/day.

NORTH EUROPE / CONTINENT

The Continent showed a slightly mixed tone this week: the Supramax/Ultramax sector seems to have peaked after the recent scrap boom, though overall levels remain strong, if slightly eased, whilst Handysize tonnage stayed solid and stable on a healthy cargo list.

On Handysize, sentiment remained firm across regional and long-haul runs, outbound business staying well supported, a 38k open Morocco fixing a long trip to Bangladesh in the very high teens; local and transatlantic flows also kept their steady footing without much pressure.

On Supras/Ultras, although the aggressive scrap rally calmed slightly, high numbers were still achieved: a modern 63k (2024) open Immingham was reported clean fixed for scrap at a TCE equivalent of USD 40,000/day and a 57k Supramax fetched USD 30,600/day APS Rotterdam for scrap to East Med, whilst transatlantic an Ultramax open Spain/USEC got around USD 20,000/day and a run ex Germany via the Russian Baltic to USEC commanded a solid premium at around USD 26,000/day.

BLACK SEA / MEDITERRANEAN

Ongoing attacks in the Black Sea region continue to keep many Owners away from the area, so many charterers have for some time been sourcing cargoes from the Baltic, the Continent or other regions.

Freight rates remain high, driven by the steep demands Owners make for loading in the area.

For Handysizes 35,000 dwt or more, intra-Med remains around USD 15,500/16,000 per day.

Transatlantic trips stayed generally stable: Rio de Janeiro-Recalada remained USD 11,000 and Boston-Galveston USD 14,500/15,000, slightly increasing, whilst the Supramax transatlantic improved to USD 16,500/16,750 per day.

Trips East began climbing again, at USD 25,000 on Supramaxes and around USD 26,000 daily for Ultramaxes.

SUPRAMAX & HANDYSIZE MARKET

MEG / INDIAN OCEAN

Indian Ocean Supramax and Ultramax rates opened firm over 12–16 October but reversed sharply late on, sentiment turning cautious as trading thinned.

The east coast of India held up early, helped by a handful of iron ore stems toward China, while the west coast drew support from tonnage tightness in South Africa; by the Friday, however, most October laycans were covered and charterers were pressing for lower numbers on November business.

Out of the Persian Gulf, the limestone trade was effectively flat.

Freight to move 50,000 mt of limestone from Mina Saqr to Paradip on the east coast of India held at USD 19.20/mt on 12 October, firmed to USD 19.35/mt and USD 19.40/mt by 14 October, then eased to USD 19.25/mt and USD 19.15/mt, down 5 cents/mt on the week.

South Africa gave back the previous week's gains.

Freight to carry 50,000 mt of coal from Richards Bay Coal Terminal to Port Qasim peaked at USD 24.85/mt on 12 October, slipped to USD 24.75/mt and USD 24.65/mt, then fell 55 cents/mt and a further 45 cents/mt to close at USD 23.65/mt, down USD 1.05/mt on the week.

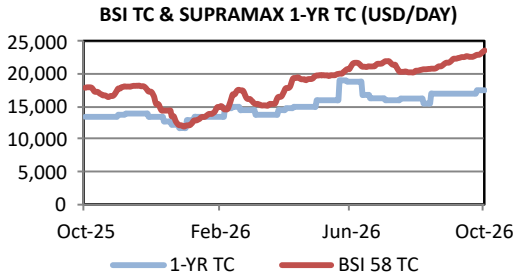

FAR EAST

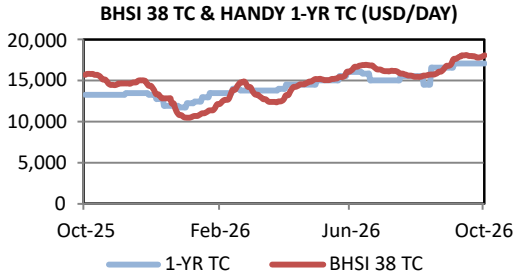

On Supramaxes/Ultramaxes earnings continued, led by Asia providing the support, with NoPac and backhaul still the more active areas: Zinovia (2026, 63,587) fixed dely Mizushima 22/27 October NoPac/Salalah at USD 27,000 with Pacific Basin, African Cardinal (2019, 61,226) dely Tianjin 15 October NoPac/Chittagong at USD 25,000 with Teambulk, a TBN fixed 65,000/10 coal Tanjung Kampeh/South China 25/30 October at USD 11 with HJ Shipping, a newbuilding 63,000-dwt dely Kunsan NoPac/Indonesia at USD 25,000, a newbuilding ex yard Zhoushan a TCT to the Med USD 29,250 and a 63,000-dwt dely North China a TCT to West Africa USD 24,000.

Handysize trading closed quietly with marked regional differences, continued NoPac and Australian demand helping Asian earnings firm in both northern and southern positions, whilst the Pacific firmed amid tight tonnage and healthy demand from the North Pacific and Australia, a 37,000-dwt open Port Kelang 11/13 October fixing Australia/China at USD 16,000.

CRUDE TANKER MARKET

The market took a breather, at least in the West.

VLCC

The tonnage list built up a little, turning the tide more in charterers' "favour".

The market closed at around WS 765 ex Gulf of Oman, WS 705 ex West Africa and below USD 70 million ex US Gulf, all to China.

Suezmax

Rates were firmer ex CPC (not very far from WS 1,100 to the Mediterranean), as November has a longer lifting programme, and in the East (up to WS 925 eastbound and WS 550 to Europe via Suez).

In the Atlantic, by contrast, the market softened towards WS 900 for West Africa/UKC-Med and towards WS 800 for 145,000 mt US Gulf/transatlantic.

Aframax

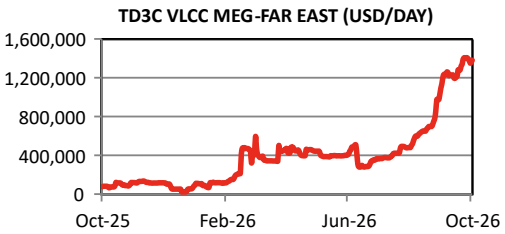

The cross-Mediterranean market eased to WS 715 for 80,000 mt, whilst the US Gulf/Europe market fell towards the WS 650 level for 70,000 mt.

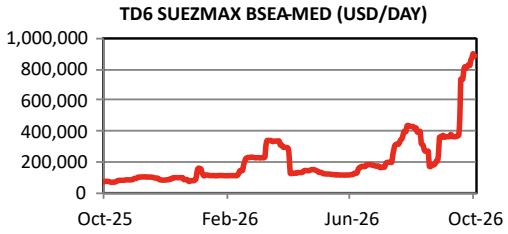

Delays for daylight-restricted tankers at the Turkish Straits are now at about four days northbound and two days southbound.

PRODUCT TANKER MARKET

CLEAN

Handies Cross-Med: Handies continue to climb without brakes, with the market gaining 20/30 points from fixture to fixture and naphtha-clean/Italian cabotage-suitable units giving an extra push. The list was extremely tight on prompt dates by the end of the week, with fresh tonnage not expected until late next week. 30,000 mt cross-Med was assessed at around WS 460 by Friday, with rates firmly heading towards WS 500.

Flexies ex Med: Although rates are still shadowing the firm Handy market, availability remained very limited throughout the week, with the few units opening in the Mediterranean either ex drydock or discharging ex Continent. At least a couple of vessels were also seen ballasting towards the US Gulf, leaving charterers with a list that was difficult to work. The outlook for the coming week looks slightly better, with a couple of naphtha-clean units expected to open in the Mediterranean, good candidates for Central Med/Italy loadings.

Intermediates / Small: The week started slowly in the Mediterranean but activity picked up from mid-week, leaving Western Mediterranean tonnage tight, whilst the Eastern Mediterranean and the Sea of Marmara remained better supplied. The Continent continues to be stronger, whilst demand is increasing for units willing to load into the Black Sea, considered by only a few Owners on a case-by-case basis.

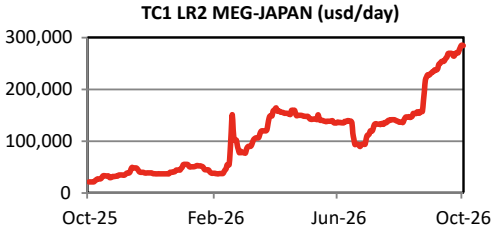

DIRTY

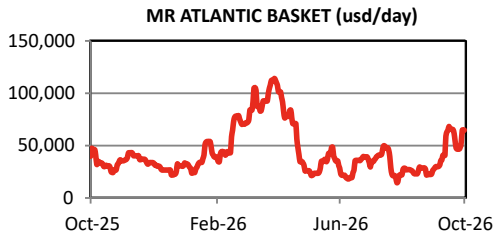

Handies: Mediterranean rates continued an almost senseless climb, closing the week at around WS 460 with a rather short prompt list, although availability looks slightly better at the beginning of next week. The Continent remains softer, with 30,000 mt cross North-West Europe reported at WS 360 by the end of the week.

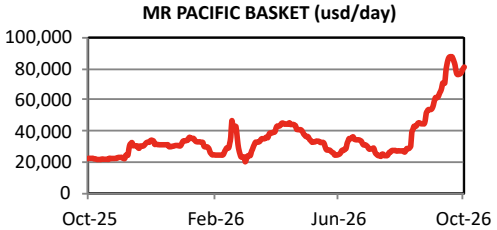

MRs: MR rates are also pushing higher, with cross-Med runs assessed at around WS 360.

CONTAINERSHIP MARKET

The container charter market remained resilient during Week 42, with activity levels and charter rates holding broadly steady across most vessel sizes.

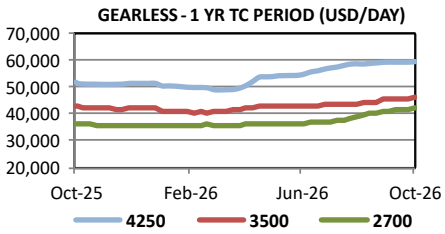

Demand for vessels capable of operating in sensitive trading regions continues to support the market, whilst ongoing geopolitical uncertainty is keeping sentiment positive.

Market participants remain optimistic, with Owners benefiting from limited tonnage availability and charterers continuing to secure tonnage for medium-term requirements.

Some reported fixtures:

EM CORFU, blt 2001, 2,556 teu, geared, Fixed to ESL for 12 mos at USD 62,500

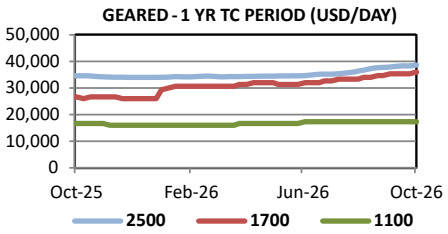

TAN CANG GLORY, blt 2005, 707 teu, gearless, Fixed to COSCO for 6 mos USD 10,000

NEWBUILDING ORDERS

Newbuilding activity this week was broad-based, with significant contracting across the container, tanker, bulk carrier and gas carrier sectors.

Chinese shipyards continued to secure a substantial share of the reported business, with Hengli Heavy Industries featuring prominently across several sectors.

In the container sector, Zhonggu Shipping reportedly contracted 2x 14,000 teu containerships at Hudong-Zhonghua, priced at approximately USD 155 million each, with deliveries scheduled for December 2029. The vessels will feature conventional propulsion.

A German owner was also reported to have contracted 4x 3,200 teu containerships at Hengli, priced at approximately USD 48 million each, with deliveries scheduled between June and December 2028.

In the bulk carrier sector, Yangzijiang Maritime reportedly contracted 4+2 82,000 dwt bulk carriers at Jiangsu Watts & Engineering, with deliveries scheduled for March and June 2028.

Eurodry also reportedly contracted 3x 82,000 dwt bulk carriers at Hengli Heavy Industries, priced at approximately USD 37 million each, with deliveries scheduled for September 2029.

The owner had previously placed two further vessels of this type at the same yard in April and May 2026, although these contracts had not been made public.

Tanker ordering was particularly notable this week.

Liquimar Tankers reportedly contracted 3x 157,000 dwt crude oil tankers at Jiangsu New Hantong, with deliveries scheduled between June 2029 and June 2030.

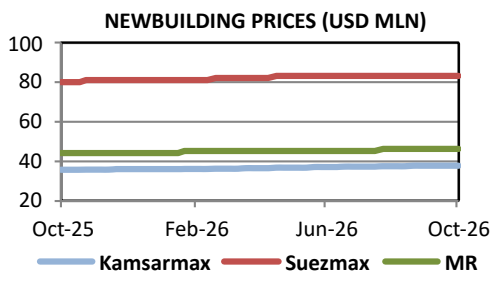

Top Ships reportedly contracted 4x 50,000 dwt tankers at Guangzhou Shipyard International, with deliveries scheduled for June 2029.

The vessels will feature Ice Class 1A specifications.

Emarat Maritime also reportedly contracted 5x 74,000 dwt tankers at Jiangsu Hantong Shipbuilding, priced at approximately USD 55 million each, with deliveries scheduled between June 2029 and December 2030.

SECONDHAND SALES

Another active week in the second-hand market, with a number of transactions reported across both the dry bulk and tanker sectors.

In the dry bulk sector, WEI HE 79,000 dwt 2012 Jinhai Heavy Industry was reportedly sold for a price in excess of $16 mln.

BULK GUATEMALA 61,000 dwt 2013 Iwagi Zosen was sold to Malaysia's Lianson Fleet Group for around $23 mln.

Among Supramax vessels, OAK and JUNIPER, both 57,000 dwt 2011 STX Dalian Shipbuilding, were reportedly sold for around $16.5 mln each, while EVER PROGRESS 57,000 dwt 2012 Jiangsu Hantong Ship Heavy Industry changed hands for around $16.2 mln.

JIN XING 55,000 dwt 2007 Oshima Shipbuilding was reportedly sold for around $14.6 mln.

In the Handysize segment, ASL CRYSTAL 39,000 dwt 2019 Tsuneishi Heavy Industries Cebu was sold to Thai interests (Thoresen Shipping) for around $27.7 mln.

LOCOMOTION 38,000 dwt 2013 Shimanami Shipyard changed hands for around $19.8 mln, while STELLAR ISABELA 38,000 dwt 2017 Shimanami Shipyard was reportedly sold for a price in excess of $24 mln.

ZBB SERENITY 37,000 dwt 2010 Huatai Heavy Industry was sold to Turkish interests for around $12 mln, while LIMA STRAIT 37,000 dwt 2012 Hyundai Mipo Dockyard changed hands for around $15.2 mln.

Among Suezmax tankers, NICOLAOS 165,000 dwt 2010 Hyundai Samho Heavy Industries was reportedly sold for around $90.8 mln, while MILITOS 165,000 dwt 2012 Hyundai Samho Heavy Industries changed hands for around $95.5 mln.

ADVANTAGE SUMMER 157,000 dwt 2010 Jiangsu Rongsheng Shipbuilding changed hands for around $97.5 mln.

Among Aframax/LR2 tankers, KASTOS 114,000 dwt 2025 Shanghai Waigaoqiao Shipbuilding changed hands to Middle Eastern interests for around $120 mln.

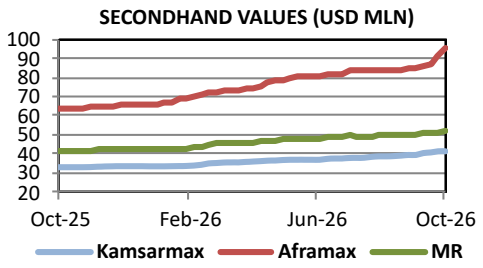

Among smaller tankers, ASEAN FORWARDER 75,000 dwt 2006 Sasebo Heavy Industries was reportedly sold for around $26.8 mln, while ASIAN PHOENIX 73,000 dwt 2006 Dalian Shipbuilding Industry No. 1 changed hands for around $20 mln.

In the MR segment, PRIVE ANGEL 51,000 dwt 2008 STX Shipbuilding - Jinhae was reportedly sold in the mid-to-high $24 mln range, while MATRAH 51,000 dwt 2008 STX Shipbuilding - Jinhae changed hands for around $18.5 mln.

SEYCHELLES PROGRESS 38,000 dwt 2005 Lindenau was reportedly sold for around $10.65 mln.

DEMOLITION SALES

While the ongoing conflict in the Middle East shows little sign of any resolution, sentiment across the Indian Subcontinent demolition market remains positive.

Despite a correction in dry freight, overall rates across all sectors continue to starve the market of any real activity.

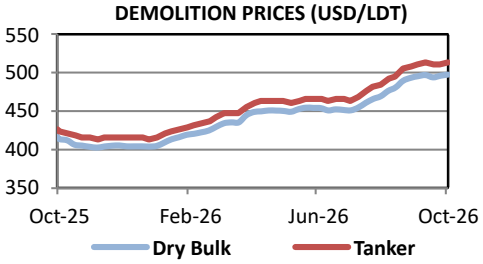

Bangladesh continues to hold on to the top spot in terms of pricing as local competition between Buyers heats up having lost tonnage to neighboring Pakistan over the summer months.

While the Indian market remains behind on pricing for conventional units local buyers continue to absorb specialist vessels including those with a more 'exotic' trading history.

A couple of recent sales this week include a 1998 blt vintage Panamax into Bangladesh, namely the MV LUNG HU (abt 9398LDT) for in the region USD 540 per LT/LDT (including a quantity of bunkers) highlighting the firm market. And also a laid up / under tow in Nigeria FSO the MT VIRINI PREM (abt 21,205 LWT) committed for an undisclosed price.
