Comment: United States LPG Exports

banchero costa
RESEARCH

UNITED STATES LPG IMPORTS

Global LPG (liquified petroleum gas) trade had been growing steadily for four consecutive years, but 2026 has broken the trend.

Total seaborne exports of LPG in 2025 increased by +4.8% year-on-year to 154.7 mln tonnes, according to vessel tracking data from LSEG.

This follows the +3.4% y-o-y growth recorded in 2024, and the +2.4% y-o-y growth in 2023.

In Jan-Sep 2026, however, global seaborne LPG exports declined by -11.7% y-o-y to 102.7 mln tonnes.

These totals mask significant differences in export volumes from different exporters, as well as in demand from the various importers.

In Jan-Sep 2026, LPG exports from the USA increased by a further +6.3% y-o-y to 56.9 mln tonnes, and now account for 55.4% of all global seaborne LPG exports.

LPG exports from the GCC, on the other hand, collapsed by -57.0% y-o-y in Jan-Sep 2026, to 12.1 mln tonnes, including 3.5 mln t from the UAE, 2.8 mln t from Saudi Arabia, 2.4 mln t from Qatar, 2.2 mln t from Oman, 1.1 mln t from Kuwait.

Shipments from the GCC accounted for just 11.8% of global exports in Jan-Sep 2026, down sharply from 24.2% in the same period of 2025.

Exports from the EU increased by +5.9% y-o-y in Jan-Sep 2026 to 4.3 mln t.

In terms of imports, the top destination for LPG in Jan-Sep 2026 was still Mainland China, accounting for 18.6% of global imports. Imports to China declined by -28.1% y-o-y in Jan-Sep 2026 to 18.8 mln tonnes. Imports to the EU declined by -3.3% y-o-y in Jan-Sep 2026 to 16.3 mln t. The EU accounted for 16.0% of global seaborne LPG imports.

Volumes into India declined by -26.4% y-o-y to 12.2 mln tonnes.

Imports to Japan were essentially unchanged at -0.1% y-o-y at 7.2 mln tonnes in the same period. Imports to South Korea in Jan-Sep 2026 declined -15.5% y-o-y to 5.3 mln t.

Let's now focus on the **United States**, which is now the largest exporter of LPG in the world, accounting for 55.4% of global volumes in Jan-Sep 2026.

As already mentioned above, LPG exports from the USA in Jan-Sep 2026 increased by +6.3% y-o-y to 56.9 mln tonnes. This followed a +6.1% y-o-y increase in 2025, a +11.1% y-o-y increase in 2024, and a +15.0% y-o-y increase in 2023.

Top LPG loading ports in the United States in Jan-Sep 2026 were: Houston (24.4 mln t in Jan-Sep 2026), Beaumont (16.2 mln t), Freeport (6.9 mln t), Marcus Hook (5.1 mln t), Corpus Christi (1.6 mln t), Ferndale (1.1 mln t), Geismar (0.5 mln t), Paulsboro (0.3 mln t).

79.6% of volumes in Jan-Sep 2026 were loaded on VLGCs (70+ cu.m.), with 4.8% on LGCs (25-70k cu.m.), 11.2% on MGCs (13-25k cu.m.), and 4.3% on SGCs (0-13k cu.m.).

Surprisingly, given the ongoing political tensions, the major destination of American LPG is still Mainland China.

Mainland China accounted for 16.4% of the USA's total seaborne LPG exports in Jan-Sep 2026, well down from the 29.5% peak of 2024.

Volumes on this route went through the roof in the first half of the decade, but have corrected sharply since.

Whilst LPG trade from the USA to China grounded to a halt in 2019 (it was just 0.3 mln tonnes!), already in 2020 the United States emerged as the number one supplier of LPG to China with 6.2 mln tonnes.

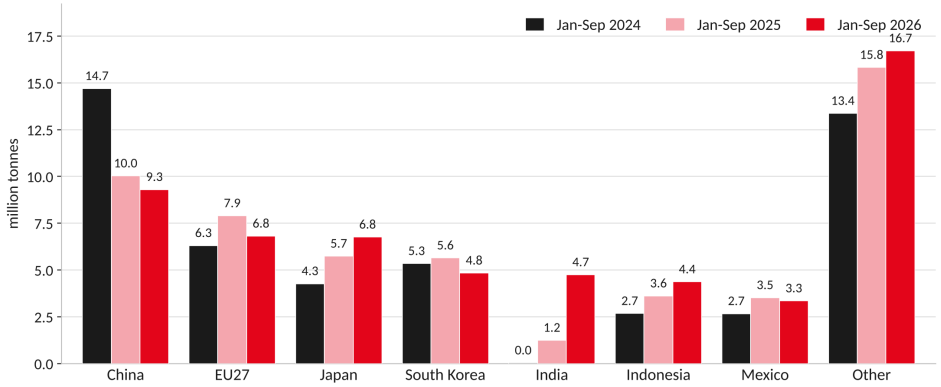

This went up to 6.9 mln t in 2021 (+11.9% y-o-y), 9.2 mln t in 2022 (+32.7% y-o-y), 16.3 mln t in 2023 (+77.2% y-o-y), and a peak of 19.7 mln t in 2024 (+20.5% y-o-y).

In 2025, however, volumes from the USA to China fell by -39.9% y-o-y to 11.8 mln t, and in Jan-Sep 2026 they declined by a further -7.2% y-o-y to 9.3 mln t.

In second place is the European Union, which accounted for 12.0% of USA LPG exports in Jan-Sep 2026. In Jan-Sep 2026, the USA exported 6.8 mln tonnes of LPG to the EU, down -13.7% y-o-y. This followed a +24.8% y-o-y increase in 2025, and a +20.7% y-o-y increase in 2024.

The USA also exported 6.8 mln t to Japan in Jan-Sep 2026, up +17.8% y-o-y, and 4.8 mln t to South Korea, down -14.3% y-o-y. Shipments to India surged by +282.1% y-o-y to 4.7 mln tonnes, whilst volumes to Indonesia rose by +20.8% y-o-y to 4.4 mln t.

US SEABORNE LPG EXPORTS BY DESTINATION, JANUARY-SEPTEMBER 2024-2026

COMMODITY NEWS – DRY BULK

Indonesia says coal sold to its off-grid power plants no longer subject to 'domestic market obligation'

Indonesia's coal miners will no longer be able to meet domestic sales obligations by supplying coal to off-grid power plants, a government official said on Thursday, in a move designed to alleviate on-grid power shortages. Indonesia is the world's top exporter of thermal coal and most of its electricity is powered by coal.

China's aluminium producers push abroad as domestic growth hits ceiling

Chinese aluminium producers are pushing abroad as part of an expansion spree that could tip the world market for the metal into surplus even as the wave of investment faces greater scrutiny from Beijing. At least 15 million metric tons a year of primary aluminium smelting capacity is planned or has been announced by Chinese investors across Southeast Asia, the Middle East, Central Asia and Africa, a Reuters review of company disclosures and government filings showed.

Cochilco cuts Chilean copper forecast for 2026, 2027

Chile's copper commission Cochilco on Friday sharply lowered its forecast for Chilean copper production this year and forecast a milder-than-expected recovery for 2027. The entity expects 2026 output to fall 8.4% versus a prior estimate of a 2.6% decline, before recovering next year with a 3% rise, slimmer than previously anticipated.

India's soybean imports surge to record as domestic prices rally

India's soybean imports in 2025/26 surged to a record 1.1 million metric tons from negligible volumes a year earlier, as a rally in domestic prices prompted mills to step up overseas purchases, a leading trade body said. The South Asian nation imported about 2,000 tons in the previous year, data from the Soybean Processors Association of India shows.

Argentina sees EU soymeal opportunity as deforestation rules threaten Brazil trade

Brazil's soybean industry fears the European Union's new anti-deforestation regulations (EUDR) could curb soymeal exports to the bloc, creating an opening for rival supplier Argentina, which says it is better placed to comply with the incoming rules. Brazil is the EU's largest supplier of soybean meal for animal feed, accounting for about half of the bloc's imports last year, according to data from the European Feed Manufacturers' Federation (FEFAC).

Russia issues permits for first grain vessels to leave Sea of Azov since July, sources say

Russian authorities have issued permits for vessels carrying grain for export to leave the Sea of Azov for the first time since July 10, when they closed maritime traffic in the area due to Ukrainian drone attacks, seven industry sources told Reuters. The sources said permits to pass through the Kerch Strait, which links the Sea of Azov and the Black Sea, would be issued for a period through November 15.

Russia turns to Arctic WW2 route to export grain

Russia, the world's largest wheat exporter, has turned to an Arctic World War II shipping route to export grain for the first time as the conflict in Ukraine stalls Black Sea trade and officials warn of risks in the NATO-controlled Baltic Sea. Russia and Ukraine have been attacking each other's ports and vessels since the new grain marketing season started in July, bringing the once booming Black Sea agriculture trade to a standstill.

Romanian Constanta port shipping stable despite insurance spike after Black Sea attacks

Shipping through Romania's Black Sea port of Constanta was stable and grain exports had increased by end-September, the port authority said, despite a spike in marine insurance premiums driven by increased attacks on cargo vessels. In September, London's marine insurance market widened the area in the Black Sea it lists as high risk, as Russia's war in Ukraine escalated, with only the territorial waters of Georgia, Bulgaria, Romania and Turkey exempted.

Russian wheat export prices fall amid hopes for Black Sea peace

Russian wheat export prices fell last week in line with global futures, which reacted to hopes of a Black Sea peace resolution, analysts say. Consultancy IKAR said that, by the end of last week, export prices for wheat with 12.5% protein content shipped from the Russian ports of Vysotsk and Ust-Luga were at $264 a metric ton free on board for delivery in December, down $3 from the previous week.

Strong El Niño could trim Brazil soy crop by about 10%, Serasa says

Brazil's 2026/27 soybean crop could fall to 163.6 million metric tons under a strong El Niño scenario, compared with 181.2 million tons under neutral weather conditions, a study by Serasa Experian projected on Tuesday. The study drew on historical El Niño events in Brazil's soybean-growing regions to estimate the potential impact on production.

COMMODITY NEWS – CRUDE OIL & PRODUCTS

Asia's crude oil imports back to pre-war levels but refined fuels lag

Asia's imports of crude oil recovered in October to match levels prior to the Iran conflict, but in a sign that the real stress in energy markets is in refined products, imports of fuels such as diesel and gasoline remained soft. The top energy-importing region saw crude arrivals of 26.39 million barrels per day (bpd) in October, up from 24.24 million bpd in September, according to data compiled by commodity analysts Kpler.

Russia oil exports through western ports forecast to fall in November, traders say

Crude oil exports from Russia's Baltic and Black Sea ports are forecast to fall next month as domestic refiners plan to increase their output after the end of maintenance and to produce more diesel to meet the demands of a deal struck this month between Washington and Moscow, two traders said. Russian seaborne crude exports including Kazakh oil transit through Russia's pipeline system may fall by some 0.1-0.2 million barrels per day (bpd) in November from the previous month, the traders added, citing preliminary lifting plans.

Black Sea CPC Blend daily oil exports set to drop 2% in November from October, sources say

Caspian Pipeline Consortium (CPC) plans to cut oil exports by 2% in November from October to about 6.4 million metric tons, or 1.69 million barrels per day, two industry sources told Reuters. The loading plan points to broadly stable exports after oil output recovered and disruptions from attacks on tankers eased, the sources said. CPC does not comment on its commercial operations.

OPEC+ keeps December oil output targets steady ahead of tougher call for 2027

OPEC+ oil-producing countries kept December production targets steady on Sunday, confirming expectations that more policy adjustments will not occur until next year, as the group continues to struggle with export disruptions from the Iran war. Seven core OPEC+ members — Saudi Arabia, Russia, Iraq, Kuwait, Algeria, Kazakhstan and Oman, made the decision in an online meeting on Sunday, OPEC said in a statement.

OPEC+ oil producers set to keep output targets steady at Sunday meeting, sources say

OPEC+ oil-producing countries are likely to keep their December oil output targets steady on Sunday, three people with knowledge of the matter told Reuters, in line with expectations that further output policy adjustments are unlikely until next year. The online meeting of seven core OPEC+ members — Saudi Arabia, Russia, Iraq, Kuwait, Algeria, Kazakhstan and Oman — comes as Gulf members have been boosting exports that have been disrupted for months by the Iran war. Most, however, are still pumping well below their output targets.

Soaring freight rates add $5.4 billion to Shell's debt, squeeze Total's margins

Shell said on Thursday that soaring freight rates have added $5.4 billion to its shipping lease costs in the third quarter compared with the previous three months, feeding its net debt, while TotalEnergies sees them cut into the prices it gets for its liquid fuels. Spot rates for oil tankers hit an all-time high in early October as Middle East producers ramped up exports using a shuttle service and ship-to-ship transfers to move oil out the Strait of Hormuz, which tied up vessels.

Russian refiners ramp up diesel output after US deal, sources say

Russian refiners are raising diesel production in October after the government granted export quotas following the Kremlin's supply agreement with the United States, said two industry sources close to the matter. US President Donald Trump said on October 9 that Russian President Vladimir Putin had agreed to a deal to supply diesel from Russia to the United States and global markets, with the US temporarily lifting its sanctions on Russian fuel.

China issues nearly 4 million tons of fuel export quotas in fourth batch for 2026, sources say

China issued a fourth batch of fuel export quotas for gasoline, diesel and jet fuel, a rare additional issue that brings the 2026 total in line with 2025 despite curbs earlier in the year, three people familiar with the matter said on Wednesday. The government approved around 3.7 million metric tons of fuel exports under the new issue, mostly for state-owned oil majors, two of the people said, while the third person put the figure at nearly 4 million tons.

COMMODITY NEWS – NATURAL GAS & POWER

QatarEnergy buys US, other LNG to hedge future Hormuz disruptions

QatarEnergy is buying long-term supplies of liquefied natural gas from the US and other producers as part of a trading strategy designed to generate revenue if exports through the Strait of Hormuz are disrupted in the future, CEO Saad Sherida Al-Kaabi told Reuters on Thursday. Kaabi's remarks reveal for the first time how Qatar, one of the world's largest LNG producers, plans to offset lost income from the Iran war and protect revenue against future disruptions in the Strait of Hormuz.

China set to lose LNG import crown to Japan on weak demand

China is set to cede its position as the world's largest liquefied natural gas importer to Japan this year, say analysts, as forecasts of a mild winter and the energy shock from the war in the Middle East curb demand, underscoring the persistent weakness in one of the world's largest markets. Consultancy ICIS and Kpler both forecast Japanese LNG demand will narrowly exceed China's this year.

US energy firms to produce record natgas in 2026 as global demand soars

US energy companies expect 2026 to mark a second consecutive year of record natural gas production, as global demand for liquefied natural gas exports and fuel to power massive data centers grows. Three of the biggest US gas producers — Expand Energy, EQT and Range Resources — will report third-quarter earnings after the market close on Tuesday. All three companies have signaled they will spend roughly the same or less in 2026 as last year while squeezing more gas from the ground, positioning themselves to capture rising demand as new LNG export capacity and data-center power needs reshape the US energy landscape.

Germany must do more to boost gas reserves as storage levels hit record low, lobby group says

Germany must review and improve the mechanism for filling its gas caverns, gas storage industry association INES said on Sunday, as storage levels in Europe's top economy remained at record lows ahead of the winter season. As of November 1, gas storage levels stood at 61.03%, well below an 80% target Germany has set for the start of the month, raising fears about supply shortages even though Berlin has said there will not be any bottlenecks.

Dutch gas prices touch €100/MWh on Houthi attacks and QatarEnergy force majeure

The benchmark Dutch front-month wholesale gas price touched €100/MWh for the first time since December 2022 , as Houthi attacks intensified with a strike on an oil refinery in Saudi Arabia and as QatarEnergy extended a force majeure on liquefied natural gas (LNG) deliveries. The benchmark Dutch front-month contract at the TTF hub was up by €4.094 at €100.10 euros per megawatt hour (MWh) by 1444 GMT, ICE data showed.

US agency approves deepwater port license application for $8.2 billion ST LNG project

The Maritime Administration has approved a deepwater port license application for the $8.2 billion ST LNG project, US Transportation Secretary Sean Duffy said on Wednesday. The project could further expand US liquefied natural gas export capacity. President Donald Trump's administration has promised to ease permitting in a bid to speed up energy infrastructure development.

EQT to buy Range Resources in $13 billion deal to create top US gas producer

EQT said on Monday it will buy Range Resources in a $13 billion all-stock deal to create the largest US natural gas producer, betting on rising demand from LNG exports and power generation. The deal combines two major Appalachian Basin producers, giving EQT greater scale and infrastructure to serve utilities, LNG exporters and industrial customers.

IEA flags concentration of clean energy supply chains as emerging challenge

The concentration of a small number of countries in clean energy supply chains is an emerging challenge for Southeast Asian countries, International Energy Agency Executive Director Fatih Birol said on Tuesday, amid fast-rising power demand in the region. "The age of electricity is coming. We will still use oil, still use natural gas including LNG, but electricity demand is growing very strongly," Birol told delegates at the Singapore International Energy Week conference.

Natural gas is losing its grip across key power markets

Natural gas was supposed to be the dominant bridge fuel between legacy generation systems and a clean-powered future. But across key markets in Europe and Asia, power producers appear to be increasingly bypassing the fuel in favour of other options. Total electricity generation from gas-fired power plants has contracted this year from 2025 in the United Kingdom, the Netherlands, Turkey, Japan, South Korea and China, according to data from think tank Ember.

Source: Reuters / LSEG

CAPESIZE MARKET

ATLANTIC AND PACIFIC BASIN

The Capesize market extended its recovery, easing on Monday before advancing in every subsequent session.

The South Atlantic led, surging from midweek on heavy fixing for second-half November and early-December loading, while the Pacific firmed more modestly against a long tonnage list.

The Western Australia–Qingdao route (170,000 mt iron ore, plus/minus 10%) slipped 10 cents/wmt to USD 13.90/wmt on 26 October, an elevated tonnage list offsetting support from poor weather forecast for central and southern China; a miner fixed at about USD 13.90/wmt for 9–11 November laycan.

The route edged 5 cents/wmt higher to USD 13.95/wmt on 27 October after the previous session's heavy fixing, a Capesize being taken at about USD 13.80/wmt for 11–13 November, then gained 30 cents/wmt to USD 14.25/wmt on 28 October on robust iron ore and coal demand, with ample east-coast Australia coal stems for second-half November.

It added 15 cents/wmt to USD 14.40/wmt on 29 October despite notably quiet trading and 20 cents/wmt to close at USD 14.60/wmt on 30 October, when a Newcastlemax was fixed Cape Preston–Qingdao at about low-USD 14/wmt for 15–17 November.

The route finished 60 cents/wmt above its 23 October level.

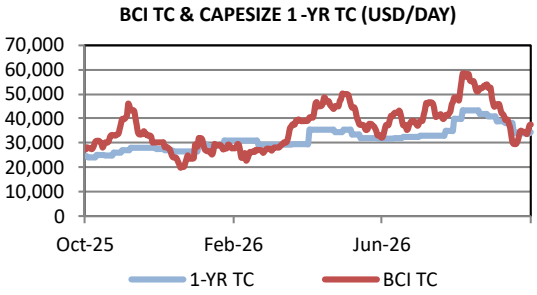

Tubarao–Qingdao fell 60 cents/wmt to USD 33.60/wmt on 26 October, recovered 35 cents/wmt, then surged USD 1.85/wmt to USD 35.80/wmt on 28 October as multiple Brazil–China fixtures were concluded between USD 34.00/wmt and USD 35.00/wmt.

Gains of 70 cents/wmt and 30 cents/wmt took it to USD 36.80/wmt, up USD 2.60/wmt on the week, matching a Tubarao–Qingdao fixture for 26–30 November laycan.

Owners held high offers against few bids, and the route remained in contango between late November and early December, with positional tightness reported for early-December dates.

Saldanha Bay–Qingdao lost 75 cents/wmt to USD 25.10/wmt before rising 30, 55 and 40 cents/wmt and a further USD 1.40/wmt to close at USD 27.75/wmt, up USD 1.90/wmt; a 190,000 mt cargo was covered at mid-USD 27/wmt for 16–25 November laycan.

PANAMAX MARKET

ATLANTIC BASIN

The Atlantic market continues to show contrasting signals, with ECSA grain activity providing a steady flow of fixtures whilst North American routes remain supported by competitive long-haul business.

Owners are still looking for attractive returns on fronthaul employment, although rate levels vary according to vessel position, timing and destination.

In ECSA, a 75,000 dwt vessel fixed for Singapore-Japan redelivery at USD 18,000/day plus USD 800,000 ballast bonus, whilst an 82,000 dwt unit was reported at USD 20,000/day for Singapore-Japan grains, with the final bonus details still unclear.

Another 82,000 dwt vessel achieved USD 17,500/day on the same route, reflecting the range of rates currently seen for South American grain employment.

On the stronger side, a scrubber-fitted 79,000 dwt vessel fixed ECSA grains with redelivery Skaw-Gibraltar at USD 25,000/day, highlighting the premium available for European redelivery.

North Atlantic business also attracted attention, with an 82,000 dwt vessel fixing Quebec to Singapore-Japan at USD 28,350/day, providing a positive indication for long-haul employment out of North America.

In the cargo market, an 80,000 tonne coal cargo from Convent to Bahodopi was quoted at USD 52.00/tonne fio, adding further activity to the Atlantic-to-Asia trade.

PACIFIC BASIN

Pacific Panamax rates turned lower over the week to 30 October, having firmed early on.

Monday and Tuesday brought modest gains on fresh enquiry, but sentiment deteriorated thereafter as cargo replenishment proved lacklustre, tonnage lists lengthened and charterers with time in hand kept pressure on owners.

A softening East Coast South America market weighed on confidence and discouraged Pacific owners from ballasting west.

By Friday, weak Australian demand against stable supply had pushed owners closer to charterers' ideas, with brokers describing the market as quiet and unsure whether a floor had been found.

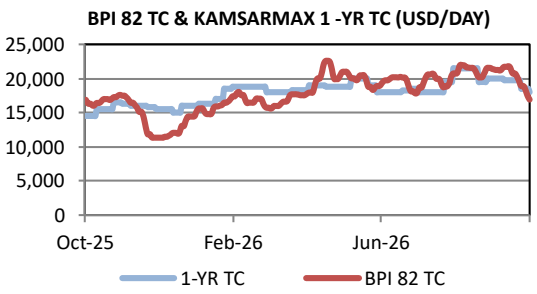

The Hay Point/Paradip metallurgical coal assessment (75,000 mt) eased from USD 25.10/mt on 23 October to USD 25.00/mt, while Hay Point/Qingdao fell from USD 22.05/mt to USD 21.80/mt.

Dalrymple Bay/Visakhapatnam (80,000 mt) was fixed at USD 25.95/mt for 21–30 November laycan, Abbot Point/Paradip in the mid- to high USD 23s for 1–15 November, and Hay Point/Paradip at about USD 23.95/mt for 15–24 November.

Indonesian rounds fell sharply. Samarinda/Guangzhou (65,000 mt) dropped from USD 11.45/mt to USD 10.70/mt, with Banjarmasin/Krishnapatnam and Banjarmasin/Mundra down to USD 13.90/mt and USD 15.60/mt.

Richards Bay/Paradip bucked the trend at USD 24.05/mt.

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

The US Gulf was a bit steady and lost some momentum on an increasing tonnage list and lower activity.

Supra/Ultra transatlantic: 64k APS SW Pass/UK pellets USD 31,000; 63k APS Lake Charles on subs East Med grains around USD 34,000; 56k Skaw-Otranto around USD 27,000 APS; another 56k East Med grains USD 24,500; 63k APS USG/UK-Continent wood pellets USD 30,000; 63k NCSA/East Med coal USD 35,000.

Fronthaul and long-haul: 64k open Barranquilla rumoured India petcoke mid-USD 30s APS; 64k took petcoke to China around USD 31,500; 63k Savannah/USG to India petcoke USD 31,750; another 63k open Barranquilla reported fronthaul India petcoke.

Handies: 37k (2023) open Tampa dely DOP to Med coal USD 20,000; 40k open Freeport APS Savannah/ Continent pellets USD 23,000; 39k open Wilmington APS Savannah/ Continent pellets USD 21,000; regionally 39k open NOLA dely WWR/EC Mexico grains USD 17,000 and 33k open Mobile dely APS Houston/Venezuela grains USD 16,750.

EAST COAST SOUTH AMERICA

The ECSA market shows a downward trend, which began early last week, with the decline more pronounced on Supras/Ultras but also significant on the smaller vessels, after the peaks reached in October.

In the Ultramax sector, fronthaul business saw a 64,000 dwt unit open San Antonio fix APS Recalada to the Far East at USD 19,750/day plus USD 975,000 ballast bonus.

In the Handysize market, transatlantic trades stay active, with a 28,000 dwt unit fixing delivery Recalada to the Continent/ARAG range at USD 25,250/day.

On period cover, a 37,000 dwt unit open Paranagua secured USD 20,800/day DOP for five to seven months with Atlantic redelivery.

NORTH EUROPE / CONTINENT

The Continent held its firm posture this week.

On Handysize, whilst not many fixtures were reported, levels stayed firm and well supported across the area, mainly owing to a tight supply of prompt tonnage.

On Supras/Ultras, scrap business to the Eastern Mediterranean remained the main driver for regional tonnage, with Owners securing strong numbers on an APS basis: a 61,000 dwt (2012-built) fixed APS ARAG to East Med at USD 33,000/day, whilst another 61,000 dwt (2016-built) open Netherlands fetched USD 32,000/day APS for a similar scrap run to the East Med.

Older Supramaxes also held solid levels, a 58,000 dwt (2008-built) open Antwerp fixing scrap to the East Med at USD 30,000/day APS.

On long-haul trips, a 57,000 dwt (2009-built) open Gibraltar fixed via the Cape of Good Hope to Chittagong at USD 25,000/day.

BLACK SEA / MEDITERRANEAN

The Black Sea and Mediterranean market remains very slow on activity, owing to the current situation in the Black Sea and the very few cargoes in the Western Mediterranean.

Handysizes of 35,000 dwt are asking USD 15,000/16,000 per day for calling the Black Sea, with fixtures heard on a voyage basis below the USD 14,000 mark time-charter equivalent.

Transatlantic trips are stable to up: the route to Rio de Janeiro-Recalada is at USD 10/11,000, whilst the trip to Boston-Galveston is at USD 16,000.

The Supramax transatlantic remained at USD 16,500 per day.

Trips East remained stable at USD 25,000 on Supramaxes and around USD 26,000 daily for Ultramaxes, whilst on Handies the level is around USD 18/19,000 per day.

SUPRAMAX & HANDYSIZE MARKET

MEG / INDIAN OCEAN

Indian Ocean rates diverged again over 26–30 October.

South African coal recovered while the Indian coasts stayed under pressure, cargo availability thin and fresh iron ore enquiry absent.

Sentiment on the east coast of India turned openly bearish by the Friday, one operator expecting more owners to concede to lower bids given the tonnage build-up and very slow cargo replenishment; spot rates for ships positioned there were already reported falling.

Out of the Persian Gulf, the limestone trade was unchanged. Freight to move 50,000 mt of limestone from Mina Saqr to Paradip on the east coast of India rose 10 cents/mt to USD 19.40/mt on 26 October and held at that level for the remainder of the week, up 10 cents/mt overall.

South Africa regained ground on scant fixing information.

Freight to carry 50,000 mt of coal from Richards Bay Coal Terminal to Port Qasim dipped to USD 23.55/mt on 26 October, then climbed to USD 23.65/mt, USD 23.85/mt and USD 24.15/mt, closing unchanged at that level, up 55 cents/mt on the week.

No fresh South African fixtures or enquiries were reported in the period.

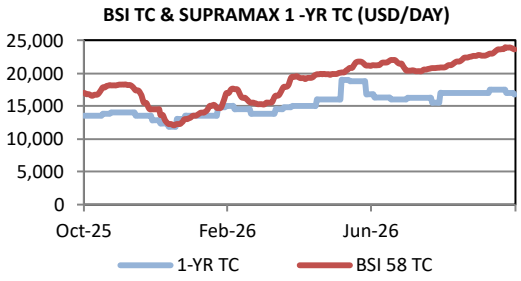

FAR EAST

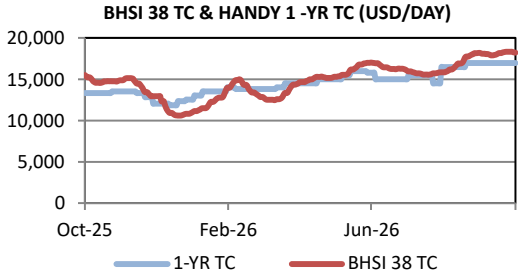

On Ultramaxes/Supramaxes most routes posted small declines but Asia stayed firm, the North still the driving force and the South Pacific slower: a 63,000-dwt ex drydock China fixed a TCT to West Africa with generals USD 28,000, a 63,000-dwt open South China fixed min 3/about 6 months USD 24,000, Gooby (2012/57,949) fixed dely passing Singapore a TCT Thailand/Australia with clinker USD 20,000, A Dolphin (2025/64,000) open China fixed 12 months USD 21,500, Montrachtet (2026/63,500) ex yard Shanghai end November fixed 14/17 months USD 21,000 and ASP Frontier (2010/57,298) Fangcheng 7/13 November fixed 4/6 months around USD 21,300 with PWSL.

Handysize had a slow finish on Friday after a week slow throughout, with limited news from the Pacific, where routes were positive and held previous levels but trades and fixtures were scarce, the North Pacific remaining the driving force, a 39,000-dwt dely South Korea fixing a TCT to WCCA USD 19

CRUDE TANKER MARKET

The VLCC market was up again, whilst it has been steady to softer on the smaller sizes.

VLCC

The market bounced back to WS 670 ex Gulf of Oman (and much higher from the Red Sea), WS 640 ex West Africa and USD 63 million ex US Gulf, all to China.

Suezmax

Rates eased down to the WS 700 level for West Africa to Europe and for Guyana to Europe, and to the WS 950 level for CPC to the Mediterranean.

From the Gulf of Oman, the market remained at WS 440 westbound but eased to the WS 700 level eastbound.

Aframax

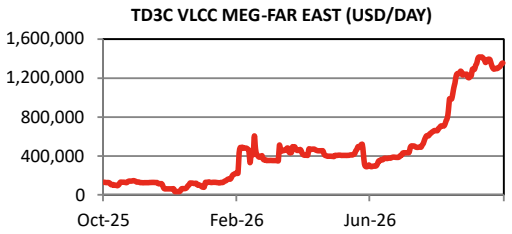

The cross-Mediterranean market "crashed" down to the WS 675 level for 80,000 mt, whilst rates for US Gulf to Europe closed below the WS 700 level for 70,000 mt.

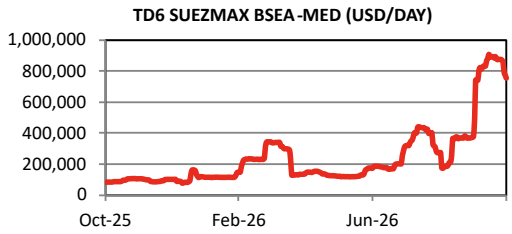

Delays for daylight-restricted tankers at the **Turkish Straits** are up to about 4.5 days northbound and 3.5 days southbound.

PRODUCT TANKER MARKET

CLEAN

Handies Cross-Med

A somewhat mixed week in the Mediterranean, with fixtures ranging between WS 520/530 and the market assessed at around WS 525 overall.

The list began to lengthen towards Friday, helped by a few ballasters in the Western Mediterranean/ Gibraltar.

Flexies ex Med

The list was longer than usual, giving traders the chance to choose natural-size units for cargoes across the area, although these opportunities did not really materialise into much activity.

By the end of the week most of the tonnage was still unemployed, with a couple of vessels already spot at the beginning of Monday.

Intermediates / Small

A definitely busier week for the smaller sizes, with both market and private cargoes reported ex Mediterranean.

Tonnage was rather unbalanced, with the Western Mediterranean much better supplied, although a couple of units opening in the Eastern Mediterranean/Adriatic and willing to reposition west could be competitive for westbound cargoes.

DIRTY

Handies

The Handy market moved higher again, with WS 490 repeated several times during the week and rates eventually reaching WS 500.

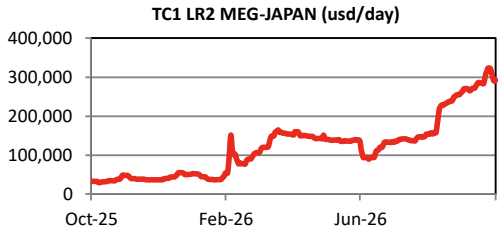

Tonnage remained rather tight on both sizes.

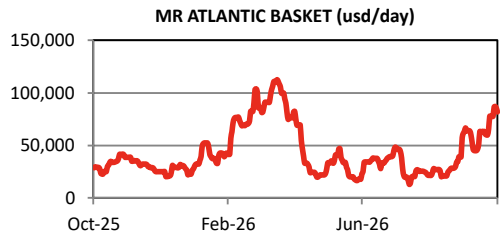

MRs

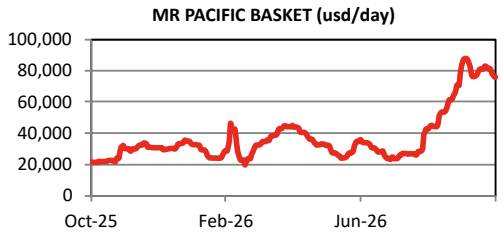

With tonnage rather tight on both sizes, a few MR relets were quickly clipped away, and 45,000 mt cross-Med was tested at WS 445 as a split of an Aframax cargo, as on many other occasions over the past few months.

CONTAINERSHIP MARKET

The container charter market remained firm this week, with sentiment supported by continued demand across both the feeder and larger vessel segments.

Charter rates generally moved higher, underpinned by limited tonnage availability and Owners maintaining firm rate ideas.

Activity was reported across a broad range of sizes, with several long-period fixtures concluded, reflecting charterers' willingness to secure tonnage forward.

Demand remained particularly healthy in the feeder sector, whilst larger vessels also attracted strong interest and achieved improved levels.

Some reported fixtures:

AUSTRALIAN, blt 2008, 6,661 teu, geared, Fixed to SEACON for 11-13 months at USD 115,000

AUSTRIAN, blt 2009, 4,944 teu, geared, Fixed to EMIRATES for 10-12 months at USD 80,000

MACAO, blt 2008, 1,793 teu, geared, Extended with 16-18 months at USD 31,000

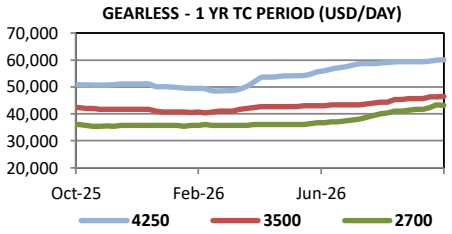

MARTI SPIRIT, blt 2010, 1,338 teu, geared, Extended with for 22-25 months at USD 21,500

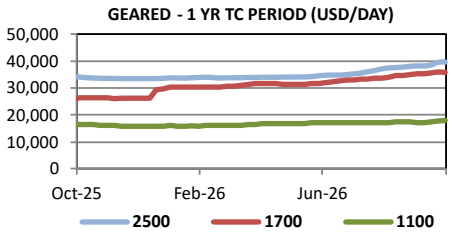

ATHOS I, blt 2023, 1,096 teu, gearless, Fixed to SITC for 11-13 months at USD 22,800

NEWBUILDING ORDERS

Newbuilding activity remained exceptionally strong this week, with a total of 51 vessels ordered across a broad spectrum of sectors including bulk carriers, containers, tankers and car carriers.

Container and tanker contracting accounted for the majority of activity, while Chinese shipbuilders continued to dominate order intake, reflecting their leading position in the global newbuilding market.

In the bulk carrier sector, Greek owner Lavinia Ship Management reportedly contracted 4x 212,000 dwt Newcastlemax bulk carriers at Zhoushan Changhong, with deliveries scheduled between March 2030 and September 2031.

Fellow Greek owner Meadway Bulkers reportedly contracted 6x 64,500 dwt Ultramax bulk carriers at Nantong Xiangyu, with deliveries scheduled for 2029-2030

In the container sector, MSC reportedly returned to Shanghai Waigaoqiao for a further 3x 22,000 teu LNG dual-fuel containerships priced, with deliveries scheduled between March and December 2029.

Korean operator KMTC reportedly contracted 6x 3,100 teu feeder containerships at Huangpu Wenchong for delivery between April 2028 and September 2030, while Namsung Shipping reportedly ordered 2x 7,100 teu containerships at Dalian Shipbuilding Industry for delivery in September 2030.

Additional feeder activity was reported at Chengxi Shipyard with an unidentified German owner ordering 4x 3,700 teu vessels, while Harbour Link Group contracted 2 coastal container vessels at Malaysia's Sapor Shipyard.

In the car carrier sector, Wallenius Wilhelmsen reportedly contracted 4x 9,900 ceu PCTCs at China Merchants Jinling.

The LNG dual-fuel vessels form part of the company's SHAPER-class fleet renewal programme and are scheduled for delivery during 2030.

The agreement also includes options for a further eight vessels.

Tanker ordering remained highly active across the crude, product and chemical segments.

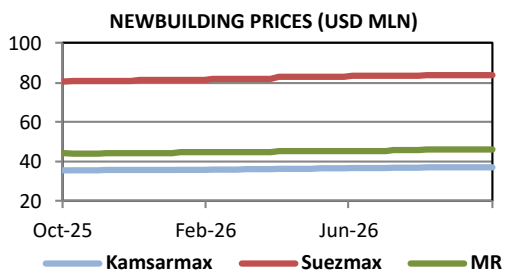

Nanjing Petroleum Transport reportedly contracted 4x 115,000 dwt LR2/product tankers at Dalian Shipbuilding Industry, with deliveries due in 2029.

Venergy Maritime reportedly entered the VLCC sector with an order for 2x 306,000 dwt VLCCs at Hengli Heavy Industries, while Bahri reportedly placed 3x 320,000 dwt VLCCs at the newly commissioned IMI Shipyard in Saudi Arabia.

In the chemical tanker segment, Transocean Maritime reportedly ordered 2x 50,000 dwt MR tankers at Guangzhou Shipyard International, while Veritas Tankers reportedly contracted 4x 13,000 dwt stainless steel chemical tankers at Nantong Rainbow Offshore.

SECONDHAND SALES

Another active week in the second-hand market, with a solid number of reported transactions across both the dry bulk and tanker sectors.

Activity was concentrated in the Japanese-built dry bulk segment, while tanker sales continued to demonstrate firm appetite for modern tonnage despite a more selective bidding environment.

In the dry bulk sector, CAPE ALLIANCE 206,000 dwt 2007 Imabari was reportedly sold to Winning Shipping for around USD 35.5 mln.

PANORAMA 81,500 dwt 2012 Hyundai Samho was reportedly sold for approximately USD 19.8 mln, while DELMAX66 66,600 dwt 2026 Tsuneishi Cebu changed hands to Greek buyers for around USD 47 mln.

CHARADE 58,000 dwt 2013 Tsuneishi Cebu was reportedly sold for approximately USD 22.5 mln, and UNITY MELODY 55,700 dwt 2012 Hyundai Mipo was reported sold for around USD 18.5 mln.

Further activity was seen in the Handysize segment, with UNION TAYLOR 37,700 dwt 2014 Shimanami reportedly changing hands for about USD 22 mln, ASTRO POLARIS 37,100 dwt 2014 Onomichi sold to Greek interests for around USD 20 mln, and BAO SHINE 32,200 dwt 2013 Jiangmen Nanyang reportedly sold for approximately USD 13 mln.

In the tanker sector, KAMOME VICTORIA 74,900 dwt 2011 Minaminippon was reportedly sold to Greek interests for around USD 39.5 mln.

LEON WISDOM 50,000 dwt 2008 Hyundai Mipo reportedly changed hands to Union Maritime for approximately USD 26 mln, while LS NEPTUNE 50,500 dwt 2007 SPP Plant & Shipbuilding was sold for around USD 20.2 mln.

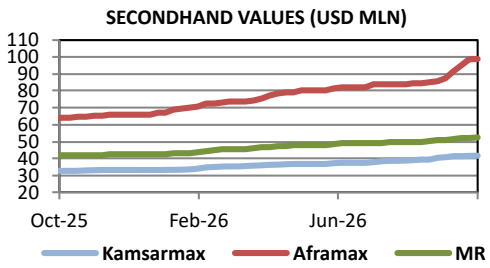

NEW FUTURE 50,000 dwt 2007 STX Jinhae was reportedly acquired by Greek buyers for about USD 20 mln and ROSE MAKIS 45,800 dwt 2005 Shin Kurushima changed hands for approximately USD 19 mln.

Among smaller tankers, FG ROTTERDAM 20,000 dwt 2012 Usuki Shipyard was reportedly sold to Chinese interests for around USD 24 mln, while OM BORNEO 29,000 dwt 2007 Guangzhou Shipyard International was reported sold for approximately USD 12 mln.

In the stainless chemical sector, the sister vessels GOLDEN OAKTREE, GOLDEN PINE and GOLDEN POPLAR, each 18,500 dwt and built in 2026/2027 at Fujian Southeast Shipyard, were reportedly sold for around USD 36.5 mln each.

DEMOLITION SALES

The status quo continues across the Indian Sub-Continent demolition markets which remains starved of fresh tonnage.

Despite continuing improvements in demolition prices post monsoon season - charter markets across all sector continue to keep Owners happy and looking anywhere but the sub continent as their next destination.

Sentiment across all three sub-continent destinations remains positive, in Bangladesh a potentially important development emerged with the reported decision to reclassify ship recycling from the red to orange environmental category.

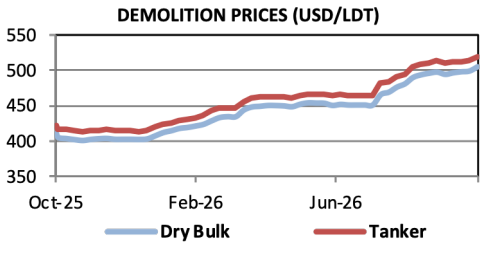

The change is expected to simplify approval procedures for new yards and reduce regulatory delays, encouraging investment and expansion within the industry.

In Pakistan buying interest remains strong, with restricted steel imports following the reported closure of the Iran - Pakistan border providing additional support to the local recycling market.

In terms of sales this week, a vintage 1994 blt panamax bulk carrier "OCEANIC STAR" 9,818 lwt, is said to have seen a price in the region USD 540 per LT/LDT basis a Bangladesh delivery (the inflated price allowing for what is reported to be about 200 MT of bunkers ROB).
