

Fearnleys Dry Bulk Weekly

Apr 30, 2025

Capesize/Newcastlemax

Last week, we wrote:

The market rallied around this time of year both in 2023 and 2024. China's imported iron ore consumption is up 4.5% month-on-month, a level that ranks amongst the highest seen in the last three years. This strongly suggests the market will rise in the coming weeks.

Looking further ahead, the market could soften in June as the VLOCs will be back to take Brazil cargoes. Further, there are indications that China's iron ore consumption will drop over the next few months as we are in the peak season, and as Trump's trade war has hurt sentiment and the export sector.

China's imported iron ore consumption increased further last week, and is now higher than at any point last year (but still slightly below the 2023 peak). The fact that the market is not up more already indicates that there is not much strength to trace, except for China's iron ore (and Bauxite) consumption. We still think further gains are likely over the coming weeks, and that a correction in June looks likely.

Panamax/Kamsarmax

Last week, we wrote:

The count of ballasters heading to Indonesia has rebounded since the March low. However, further upside could be limited as the number is now on par with 2022 and 2023 levels. The levels of last year are not likely to be reached, primarily because of the high inventories in China.

We expect a stable to slightly rising market until late May or early June, as by then the ECSAM grain season should wind down, and downside risks increase. Further, Canada and US grains volumes have been higher this year than both 2023 and 2024, but seasonality means these volumes will trend down over the next months.

The count of vessels heading to Indonesia has dropped since last week, and Canadian and US grains are in seasonal decline. We therefore do not expect much upside going forward, although continued high volumes from ECSAM should provide support.

Last week, we wrote:

Since then, the index has stayed below 13kpd. We do not see much reason to expect the market to go much higher than that over the next month. The Pacific is quite firm, but signs of weakness are appearing in the Atlantic. The macroeconomic backdrop is not exactly supportive these days either.

Fleet growth in this segment is running at 5% year on year, whereas shipment volumes are slightly higher than last year. We do not see any sign of a positive demand growth development in the coming months, so the lower year-on-year market is highly likely to continue.

Disclaimer

1. Introduction

The statistical and graphic information set forth in the analysis is compiled by Fearnresearch and based on the databases and time series supplied by Fearnresearch, the research division of Fearnleys AS, and other external sources of information. Fearnresearch compiles, processes and publishes data for the benefit of the brokering departments of Fearnleys AS and its clients. Its methodologies for collecting data, and therefore the data collected, may differ from those of other sources, and its data do not reflect all or even necessarily a comprehensive set of actual transactions occurring in the market. Certain estimates may be based on prevailing market conditions. There can be no assurance that such data reflect actual market conditions.

Data compilation, especially for earlier historical periods, is subject to limited audit and validation procedures. Both closed and open sources, interviews and market intelligence to gain information on different topics may be used. Accordingly, there can be no assurance as to the accuracy or completeness of the estimates, advice, statements and any other information contained in the analysis.

2. Risks

Research coverage of Fearnleys AS encompasses solely companies within the shipping sector. This sector is cyclical by nature and will over time presumably experience higher volatility than the overall market.

3. Confidentiality

Pursuant to Fearnleys' Code of Conduct, all employees of Fearnleys AS are subject to duty of confidentiality towards clients and with respect to handling inside information. All employees shall follow strict information handling procedures and other organizational procedures to minimize conflicts of interest within Fearnleys and between clients.

4. General Disclaimer of Liability

The analyses, estimates, advice, statement and any other information contained in the analysis are prepared and presented in good faith. However, neither Fearnresearch, Fearnleys AS nor any of their subsidiaries, associated companies, organisations, management personnel, employees, agents or independent contractors (collectively the "Fearnley Interests") shall under any circumstances be under any liability for any losses, damages or costs caused to any person, company or other legal entity arising or resulting directly or indirectly from reliance on any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information contained in the analysis resulting directly or indirectly from any negligent or gross negligent act(s) or omission (s), or wilful misconduct, committed by any of the Fearnley Interests.

In the event that a court or tribunal, notwithstanding the above liability exemptions, should hold any, some or all of the Fearnley Interests liable in damages for any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information, the liability shall not under any circumstances whatsoever exceed in total ten (10) times the fees payable for the analysis in question, or US\$ 100,000 (United States Dollar Hundred Thousand), whichever is the higher.

Under no circumstances whatsoever shall the individual or individuals who have caused the losses, damage or costs be held personally responsible or liable in any way. The Fearnley Interests shall under no circumstances whatsoever be liable for punitive damages.

The analysis is prepared to the benefit of the named addressee only. No other third party may rely on the analysis or any of its content without prior written approval of Fearnley Consultants AS.

Should any part of this clause be held unenforceable, non-operative or invalid by a court or tribunal, the remaining parts shall remain in full force.

5. Processing of Personal Data

The processing of personal data within Fearnleys AS is subject to strict rules and regulations. Our Privacy Policy describes the procedures for processing personal data according to the General Data Protection Regulation (GDPR). Please see our homepage for more information on this.
