

Fearnleys Dry Bulk Weekly

Oct 1, 2025

Capesize/Newcastlemax

The market is correcting, in line with usual seasonal developments. The share of profitable steel mills suggests that iron ore consumption in China is peaking, as it has fallen from close to 70% to about 58% over the last month. However, significant drops in consumption usually do not happen unless the share of profitable mills falls below 50%.

Regarding the BHP story, there could be fewer cargoes than usual for a short period, but China buys approximately 250 million tons of BHP iron ore annually, out of a total of 1.2 billion tons. For that reason, the iron ore markets have not been spooked by the temporary ban, as China is dependant on BHP supply...

Cape/Newc Ballaster/Laden Vessel Ratio

Iron Ore Futures Spread, 1st Month Minus 3rd Month (3 Months Lead) vs BCI5TC 60 Days Rolling Average

China - Share of Steel Mills that are Profitable, 7 weeks lead, vs Daily Hot Metal Output

Cape/Newc Weekly Shipment Volumes 24 vs 25

Panamax/Kamsarmax

P5 correcting slightly, as China's Golden Week have set in and coal buying slows down. The range-bound market seems to continue, as suggested for a while by the coal futures curves.

Vessel supply in the South Atlantic has tightened, so if volumes increase, the markets there could be in for a rebound. So far, there is no sign in AIS data that Argentina's temporary tax exemptions are leading to higher vessel demand, however. Further, US volumes remain substantially lower than the same period last year.

Panamax / Kamsarmax Ballasting to Argentina

P5 vs Newcastle Coal Futures Curve Spread (Lead 2 Months)

Panamax/Kamsarmax Ballasting to the US, 24 vs 25

South Atlantic Vessel Tightness Indicator (Lead 1 Month), vs P6

Supramax/Ultramax

Last week, we wrote: *The Pacific is softening slightly, whereas tightness remains in the Atlantic, which probably will remain the case in the near term as vessels positioned in the basin have fallen further over the last week. Further, the Kamsarmax market could tighten in the South Atlantic.*

What we wrote last week still applies, though, and this suggests the headline indices will not see further highs towards year-end.

The divergence between the Atlantic and the Pacific keeps getting more extreme. Most of the volumes are in the Pacific/Indian Ocean, and as the markets there soften, how long can the Atlantic continue to rise? There will be a sudden and sharp correction there eventually, but extremes can get more extreme. In late 2023, for example, S4A peaked at over 40kpd, whereas the Pacific was then at 13kpd. Currently, we are at 35kpd vs 15.5 kpd...

Disclaimer

1. Introduction

The statistical and graphic information set forth in the analysis is compiled by Fearnresearch and based on the databases and time series supplied by Fearnresearch, the research division of Fearnleys AS, and other external sources of information. Fearnresearch compiles, processes and publishes data for the benefit of the brokering departments of Fearnleys AS and its clients. Its methodologies for collecting data, and therefore the data collected, may differ from those of other sources, and its data do not reflect all or even necessarily a comprehensive set of actual transactions occurring in the market. Certain estimates may be based on prevailing market conditions. There can be no assurance that such data reflect actual market conditions.

Data compilation, especially for earlier historical periods, is subject to limited audit and validation procedures. Both closed and open sources, interviews and market intelligence to gain information on different topics may be used. Accordingly, there can be no assurance as to the accuracy or completeness of the estimates, advice, statements and any other information contained in the analysis.

2. Risks

Research coverage of Fearnleys AS encompasses solely companies within the shipping sector. This sector is cyclical by nature and will over time presumably experience higher volatility than the overall market.

3. Confidentiality

Pursuant to Fearnleys' Code of Conduct, all employees of Fearnleys AS are subject to duty of confidentiality towards clients and with respect to handling inside information. All employees shall follow strict information handling procedures and other organizational procedures to minimize conflicts of interest within Fearnleys and between clients.

4. General Disclaimer of Liability

The analyses, estimates, advice, statement and any other information contained in the analysis are prepared and presented in good faith. However, neither Fearnresearch, Fearnleys AS nor any of their subsidiaries, associated companies, organisations, management personnel, employees, agents or independent contractors (collectively the "Fearnley Interests") shall under any circumstances be under any liability for any losses, damages or costs caused to any person, company or other legal entity arising or resulting directly or indirectly from reliance on any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information contained in the analysis resulting directly or indirectly from any negligent or gross negligent act(s) or omission (s), or wilful misconduct, committed by any of the Fearnley Interests.

In the event that a court or tribunal, notwithstanding the above liability exemptions, should hold any, some or all of the Fearnley Interests liable in damages for any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information, the liability shall not under any circumstances whatsoever exceed in total ten (10) times the fees payable for the analysis in question, or US\$ 100,000 (United States Dollar Hundred Thousand), whichever is the higher.

Under no circumstances whatsoever shall the individual or individuals who have caused the losses, damage or costs be held personally responsible or liable in any way. The Fearnley Interests shall under no circumstances whatsoever be liable for punitive damages.

The analysis is prepared to the benefit of the named addressee only. No other third party may rely on the analysis or any of its content without prior written approval of Fearnley Consultants AS.

Should any part of this clause be held unenforceable, non-operative or invalid by a court or tribunal, the remaining parts shall remain in full force.

5. Processing of Personal Data

The processing of personal data within Fearnleys AS is subject to strict rules and regulations. Our Privacy Policy describes the procedures for processing personal data according to the General Data Protection Regulation (GDPR). Please see our homepage for more information on this.
