MARKET COMMENTARY

Today, Dalian iron ore futures opened lower but closed higher, fluctuating upward throughout the day. The most-traded I2505 contract finally settled at 817.5 yuan/mt, up 1.43% for the day. Traders were highly active in offering cargoes, while steel mills remained cautious in procurement, with a stronger wait-and-see sentiment. Market transactions were average today. In Shandong, mainstream transaction prices for PB fines were at 802-805 yuan/mt, up 10-15 yuan/mt from yesterday; in Tangshan, transaction prices for PB fines were around 810-820 yuan/mt, up 5-10 yuan/mt from yesterday.

Iron Ore Index Compilation Rationale and Data Exclusions

MMi iron ore indices are compiled from data provided by companies that are part of the iron ore supply chain and involved in spot market transactions. The indices are calculated using detailed transaction-level data submitted to MMi by these companies. This data is normalised to the appropriate specifications and screened to remove outliers before volume-weighted average prices are calculated from the remaining core set of data.

For more details on MMi's iron ore methodology please download the guide published on our website at: www.mmiprices.com

Data Exclusions*

	62%	58%	65%
Port Index	0	0	0
Seaborne index	0		0
Lump Index 62.5	0		

* Number of price submissions for iron ore indices that were excluded from index calculations today as they were anomalous and could not be verified

IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
