Week 41/2026 (05 Oct – 12 Oct)

Comment: China's Iron Ore Imports

banchero costa
RESEARCH

CHINA IRON ORE IMPORTS

2025 was another positive year for global seaborne iron ore trade.

In Jan-Dec 2025, global loadings of iron ore increased by +3.5% y-o-y to 1,732.0 mln tonnes, based on AXS Marine vessel tracking data.

2026 has remained on a positive, albeit slower, note, with export volumes up by +1.0% y-o-y in Jan-Sep 2026 to 1,279.2 mln tonnes.

Exports from Australia increased in Jan-Sep 2026 by +2.2% y-o-y to 713.0 mln tonnes.

From Brazil, exports declined by -1.5% y-o-y in Jan-Sep 2026 to 284.3 mln t.

From Canada there was a -8.0% y-o-y decline to 43.7 mln tonnes.

From South Africa volumes were essentially flat, -0.1% y-o-y, at 41.0 mln t.

India saw an increase of +3.2% y-o-y in Jan-Sep 2026 to 20.1 mln t.

From Norway exports increased by +2.2% y-o-y to 16.0 mln t.

Demand is still driven primarily by Mainland China, which accounts for 75% of imports.

Iron ore imports into China increased by +4.1% y-o-y in Jan-Sep 2026 to 967.8 mln tonnes.

Imports into Japan declined by -3.6% y-o-y to 69.2 mln t.

To the EU, imports declined by -3.1% y-o-y to 53.1 mln t.

Volumes into South Korea increased by +3.7% y-o-y to 55.3 mln t.

Imports into Malaysia increased by +6.2% y-o-y to 19.2 mln tonnes.

To Vietnam volumes were up by +20.2% y-o-y to 20.8 mln t.

To Oman, volumes were down -22.7% y-o-y to 8.3 mln t, to Saudi Arabia down by -70.6% y-o-y to 2.5 mln t, to Bahrain -78.8% y-o-y to 2.0 mln t.

Mainland China is by far the largest importer of iron ore in the world.

China accounted for 74.6% of global iron ore imports in Jan-Dec 2025.

Imports into China increased +4.0% y-o-y in Jan-Dec 2024 to 1,256.4 mln tonnes.

They have further increased by +1.8% y-o-y in Jan-Dec 2025 to 1,279.4 mln t, which is a new all-time record.

As already mentioned, in Jan-Sep 2026, imports into China increased by +4.1% y-o-y to 967.8 mln t.

This was driven primarily by a very strong +11.3% y-o-y surge in 1Q26, whilst growth moderated to +1.1% y-o-y in 2Q26 and +0.5% y-o-y in 3Q26.

The vast majority (71%) of iron ore volumes into China in Jan-Sep 2026 were loaded on Capesizes (130,000-220,000 dwt), with a further 21% carried on VLOCs (over 220,000 dwt), whilst just 3% was carried on Post-Panamaxes, 2% on Panamaxes, and 3% on Supramaxes.

The main iron ore import terminals in Mainland China are: Caofeidian (115.6 mln t discharged in Jan-Sep 2026), Tangshan/Jingtang (91.3 mln t), Lanshan (81.0 mln t), Ningbo/Zhoushan (80.9 mln t), Tianjin (64.1 mln t), Rizhao (58.2 mln t), Lianyungang (57.2 mln t), Dongjiakou (54.4 mln t), Huanghua (45.1 mln t), Fangcheng (39.5 mln t), Zhanjiang (38.8 mln t).

In terms of sources for China's iron ore imports, Australia remains by far the top source country, with a 62.7% share in Jan-Sep 2026.

Iron ore imports from Australia to China in Jan-Sep 2026 have increased by +1.9% y-o-y to an all-time high for the period of 606.5 mln tonnes, from 595.0 mln t in Jan-Sep 2025.

The top loading port in Australia for iron ore cargoes to China is Port Hedland (354.2 mln t in Jan-Sep 2026).

Brazil remains in second spot with a 21.5% share in Jan-Sep 2026.

Imports to China from Brazil increased by +5.1% y-o-y in Jan-Sep 2026 to 208.3 mln tonnes, from 198.2 mln t in Jan-Sep 2025.

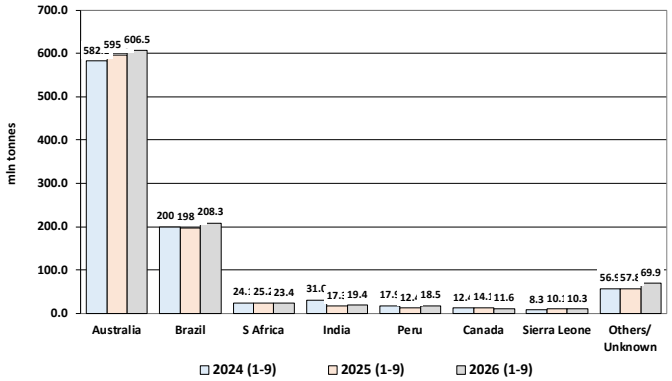

The top port in Brazil for cargoes to China was Ponta da Madeira (78.2 mln t in Jan-Sep 2026).

Volumes from South Africa to China declined by -7.1% y-o-y to 23.4 mln t in Jan-Sep 2026.

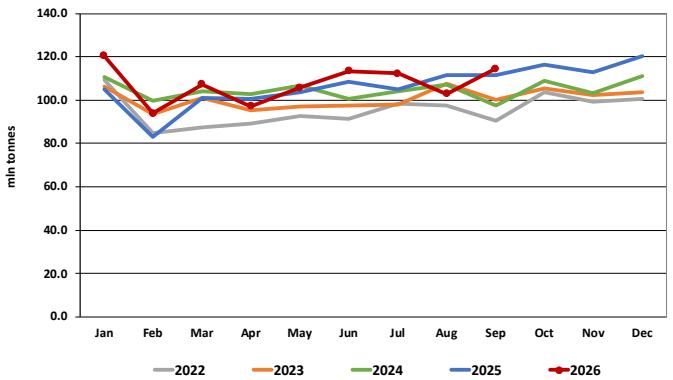

From India volumes increased by +12.4% y-o-y to 19.4 mln t.

From Peru volumes surged by +49.6% y-o-y to 18.5 mln t.

COMMODITY NEWS – DRY BULK

World Steel cuts 2026 demand outlook, now sees slight contraction

Global steel demand is expected to shrink slightly this year, with the World Steel Association on Monday cutting its forecast as weaker demand in China and disruption from the US-Israeli war with Iran weigh on consumption. The industry body now expects global steel demand to fall 0.1% in 2026, compared with a forecast in April for growth of 0.3%.

Cheap coal and expensive gas set stage for year-end coal export surge: Maguire

Global exports of thermal coal are currently on track to register a second consecutive annual contraction. But thanks to thermal coal's widest price discount to LNG in four years, coal shipments look set for a late-year resurgence. Benchmark Australian thermal coal export prices are currently around 80% cheaper than liquefied natural gas for delivery in Asia, which cements coal's place as the most affordable power generation fuel in the region.

MMG accuses EU antitrust regulators of ignoring evidence backing Anglo American deal

Hong Kong-listed mining and metals company MMG accused EU antitrust regulators on Thursday of ignoring evidence that its bid for Anglo American's Brazilian nickel business would not divert supplies from Europe to China. The comments came after a day-long hearing at which MMG and Anglo American defended the $500 million deal before EU antitrust regulators, including the European Commission's top merger official, Guillaume Loriot.

State-backed Shanghai Port in talks to buy LME warehouse firm

State-backed Shanghai International Port Group is in talks to buy London Metal Exchange-approved warehousing firm H&M Metal Warehousing with Chinese government approval, two people familiar with the negotiations told Reuters. The acquisition would further boost the presence of China, the world's largest consumer and producer of industrial metals, within the trading infrastructure of the LME, the world's largest and oldest forum for industrial metals.

Russian Baltic ports boost grain export capacity by 170% as Black Sea disrupted

Russia's Baltic Sea ports boosted their annual capacity to handle grain exports to 23.5 million metric tons in October from 8.6 million tons in July, a senior Russian Railways executive estimated. Russia and Ukraine, both major grain producers and exporters, have been pounding each other's grain terminals and vessels in the Black Sea in recent months.

Ukraine wants to use German ports for farm exports, minister says

Ukraine, whose key seaports are blocked due to Russian attacks, wants to use German ports for agricultural exports, Ukrainian Agriculture Minister Taras Vysotskyi said on Thursday. "Ukraine is working to fully restore its maritime export route and expand alternative routes," he said. "In particular, the use of Germany's port infrastructure is being considered. According to the ministry's estimates, this could potentially add around 1 million tons of export capacity per month," Vysotskyi added.

India holds soybean cargoes over doubts about Niger origin

Indian customs authorities have withheld clearance of soybean cargoes declared as originating in Niger this month as importers failed to provide documents proving the oilseeds were sourced there to qualify for duty-free entry, sources said. About 1,500 metric tons of soybeans, or 60 containers, were stranded at Jawaharlal Nehru Port near Mumbai, sources from the customs department told Reuters.

New Trump rules will make it harder for farmers to access US funds for energy projects

President Donald Trump's looming changes to a rural energy program that has distributed billions of dollars in recent years will make it harder for many farmers to access funds for such things as solar arrays and energy efficiency projects, farmers, energy companies and analysts said. It is Trump's latest move to slash government support for renewable energy. While working on the changes, the administration had halted applications this year for the Department of Agriculture's Rural Energy for America Program, or REAP.

US farm debt is at a record. Official data might be undercounting it

American farmers are borrowing more money than ever before to operate — but the rise in non-traditional and vendor credit has created some gaps in the federal government's current ability to measure and track farm debt, US Department of Agriculture officials told Reuters. Financial pressure is mounting across farm country, where growers have already faced years of tight margins due to slumping prices and high input costs. More recently, farmers have struggled with disruptions to export markets from Washington's trade fights with top buyers including China, while the US-Israeli war with Iran has driven up the cost of fertilizer and fuel.

COMMODITY NEWS – CRUDE OIL & PRODUCTS

Hormuz transits at lowest in over two months after attacks, data shows

The number of vessels transiting the Strait of Hormuz fell to the lowest in more than two months after attacks on tankers in the key waterway reached their highest last week since the start of the US-Israeli war with Iran, shipping data showed. Seven commodity vessels passed through the strait on Tuesday, for the lowest figure since July 23, data from analytics firm Kpler showed.

The world has nearly burned through its oil stockpile buffer, executives say

The amount of oil in storage that is accessible to the global market is running low, industry executives said at a forum in London this week, making the market more fragile and putting upward pressure on prices. Governments and energy companies have drawn oil from stockpiles to alleviate pressure in a global oil market facing unprecedented supply disruptions this year due to the wars in the Middle East and Ukraine.

IEA to accelerate oil reserve release, says 100 million barrels still to come

The International Energy Agency agreed on Wednesday to accelerate the release of oil stocks and to prioritise diesel supplies under a plan launched in March, as governments seek to tackle record fuel prices and supply disruptions caused by the Iran war. Wars in Iran and Ukraine have damaged refineries and disrupted tanker traffic, helping drive diesel prices to record highs in many markets and turning the fuel into a major political and economic concern worldwide.

Soaring freight rates threaten Asia's appetite for US crude

Tanker freight rates soaring to record highs are putting US crude oil out of reach for Asian refiners, pushing them to seek alternatives from the Middle East and Latin America, according to multiple traders and shipbrokers who track those markets. The cost of chartering a very large crude carrier (VLCC) to carry 2 million barrels of US oil from the Gulf of Mexico to China in November hit $80 million this week, according to data from shipbrokers Simpson, Spence & Young on LSEG.

Americas have glut of heavy oil due to freight squeeze; Asia, Europe scramble for barrels

Dense heavy crude, which oil refiners around the world favor for its typically low cost, is piling up in the Americas as soaring freight rates have stifled exports and US refiners have been running close to their limits. The glut in North and South America has opened an unusual split in the global oil market, as buyers in Asia and Europe struggle with supply shortages and benchmark prices hold above $100 a barrel.

Shell expects record refining margins as Iran war boosts fuel markets

Shell expects third-quarter refining margins to jump to $42 a barrel, a record high and sharply above $24 a barrel in the previous quarter, the oil major said on Wednesday, as the Middle East conflict tightened fuel supplies, driving up prices. Global benchmark Brent crude prices surged after the US and Israel attacked Iran in late February, prompting Tehran to effectively shut the Strait of Hormuz and attack Gulf neighbours.

Trump says Russia to supply diesel to US and global markets

President Donald Trump said on Friday that Russia had agreed to supply diesel to global markets in an effort to lower fuel prices, and his administration temporarily lifted US sanctions on Russian fuel that were designed to deprive Moscow of revenues for its war on Ukraine. Prices for diesel, used for agriculture, heating homes and trucking, are near a record and risk for Trump's fellow Republicans ahead of the November 3 congressional elections that will determine whether they maintain thin control of Congress. Diesel prices fell after the announcement, but analysts said the deal may not be enough to keep them down.

China to resume October fuel exports after holiday pause, sources say

China is set to resume October refined fuel exports after a brief halt during its Golden Week holiday, a move that will help ease tight global diesel, gasoline and jet fuel markets, four traders familiar with the matter said on Friday. China has approved October exports of the three fuels at around 3.7 million metric tons combined, according to two other industry participants.

US Gulf producers shut in more oil and gas as Isaias nears landfall

US producers in the Gulf of Mexico shut in about 1.5 million barrels per day of oil production and 1.3 billion cubic feet per day of natural gas, an increase from Thursday, as Hurricane Isaias churned toward the coast ahead of an expected landfall along the Florida Panhandle late on Friday. The shut-ins represent nearly 72% and 59% of US oil and natural gas production in the Gulf, respectively, according to the Marine Minerals Administration.

COMMODITY NEWS – NATURAL GAS & POWER

US natural gas output and demand to hit record highs in 2026 and 2027, EIA says

US natural gas supply and demand will both rise to record highs in 2026 and 2027, the US Energy Information Administration said in its Short-Term Energy Outlook on Tuesday. The EIA projected dry gas production will rise from a record 107.6 billion cubic feet per day in 2025 to 112.2 bcfd in 2026 and 116.1 bcfd in 2027.

High gas prices could make US LNG uncompetitive, says Fulcrum LNG chief

Liquefied natural gas projects in the US could become uncompetitive if domestic natural gas prices continue rising, the CEO of developer Fulcrum LNG, Jesus Bronchalo, said on Tuesday. Speaking at a panel discussion at Rice University's Baker Institute, Bronchalo said natural gas prices are likely to increase more in the US, already one of the most expensive places in the world to produce LNG.

Europe set for another year of high gas prices as reserves hit lows

European households and industries face at least another year of high gas prices, even if the Iran war is resolved and winter proves mild, as the continent will need to restock gas storage reserves depleted to record lows. European benchmark gas prices have jumped more than 150% this year as shipping disruptions through the Strait of Hormuz trapped almost 20% of global liquefied natural gas exports from Qatar and the United Arab Emirates, most of which are destined for Asia.

US, Russia explore gas sale to Europe amid Ukraine war, say sources

Top Russian and US officials, including US Special Envoy Jared Kushner, have held talks about bringing a US investor into the Nord Stream pipelines that delivered gas to Germany before Russia invaded Ukraine, five people with knowledge of the situation said. The discussions included Kirill Dmitriev, a close adviser to Russian President Vladimir Putin, and Kushner, the son-in-law of US President Donald Trump, the people said.

Europe's LNG demand, growing fleet size to pressure shipping rates in winter

Strong European demand for liquefied natural gas is expected to cap shipping costs this winter by keeping more cargoes within the Atlantic basin, though a resurgence in buying from Asia could constrain vessel availability and lift freight costs. Both Atlantic and Pacific freight rates have fallen back to levels seen before the US-Israeli war on Iran, as more newbuild vessels join the global fleet and a greater share of US cargoes have been heading to Europe rather than Asia, shortening voyage distances and boosting ship availability.

Emerging Asia's power-driven LNG demand at risk as renewables gain ground

Emerging Asia is losing its appetite for liquefied natural gas to generate power as geopolitical shocks, equipment shortages and cheaper renewables derail projects, disappointing industry hopes the region would drive the next wave of demand. Countries including Vietnam and the Philippines had planned new LNG import terminals and power plants to meet rising demand and transition from coal, but the market shocks of Russia's 2022 Ukraine invasion and the ongoing US-Iran war sent prices soaring, exposing the risks of LNG reliance.

Cheap coal and expensive gas set stage for year-end coal export surge: Maguire

Global exports of thermal coal are currently on track to register a second consecutive annual contraction. But thanks to thermal coal's widest price discount to LNG in four years, coal shipments look set for a late-year resurgence. Benchmark Australian thermal coal export prices are currently around 80% cheaper than liquefied natural gas for delivery in Asia, which cements coal's place as the most affordable power generation fuel in the region.

Shell partially restarts Pearl gas-to-liquids plant in Qatar

Shell said on Thursday it had partially restarted its Pearl gas-to-liquids plant in Qatar, as traders said QatarEnergy returned Pearl-GTL naphtha cargoes to the spot market six months after the facility was damaged during the Iran war. Shell said the move would allow it to build a limited amount of product inventory in storage, while its ability to ship product remains subject to the regional security situation.

CAPESIZE MARKET

ATLANTIC AND PACIFIC BASIN

The Capesize market split sharply over the week.

The Pacific steadied and rallied midweek on persistent demand from Western Australian miners before giving way on Friday, while both Atlantic routes fell heavily under an abundance of ballasters.

The Western Australia–Qingdao route (170,000 mt iron ore, plus/minus 10%) eased 20 cents/wmt to USD 14.05/wmt on 5 October, exchanges thinned by public holidays in China and South Korea and the closure of Jingtang and Caofeidian on strong winds; late fixing saw Port Hedland–Qingdao taken at around low-USD 14/wmt and Dampier–Qingdao at high-USD 13/wmt.

The route held at USD 14.05/wmt on 6 October as the bid-offer spread narrowed, then rebounded 55 cents/wmt to USD 14.60/wmt on 7 October amid a fixing frenzy — Port Hedland–Qingdao at around USD 14.60/wmt, Dampier–Qingdao at USD 14.40/wmt and Newcastlemaxes from Stanley Point at around USD 14.60/wmt.

It added 10 cents/wmt to USD 14.70/wmt on 8 October, Dampier–Qingdao being fixed at USD 14.70/wmt, before sliding 50 cents/wmt to close at USD 14.20/wmt on 9 October as enquiry dried up and freight derivative (FFA) values fell sharply.

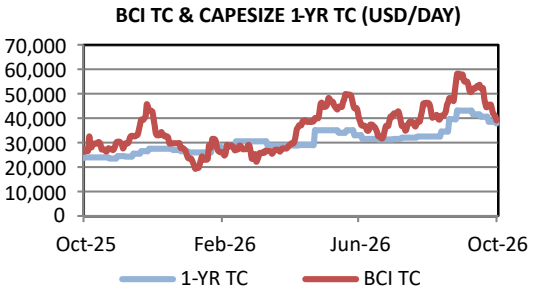

The route ended 5 cents/wmt below its 2 October level.

Tubarao–Qingdao lost ground in every session, shedding 90 cents/wmt to USD 36.80/wmt and 45 cents/wmt to USD 36.35/wmt as the ballaster list lengthened, then USD 2.00/wmt to USD 34.35/wmt on 7 October and 50 cents/wmt to USD 33.85/wmt on 8 October, fixtures being reported at around USD 34.25/wmt and USD 34.00/wmt for end-October to early-November laycan.

A further 35 cents/wmt took it to USD 33.50/wmt, down USD 4.20/wmt on the week, although participants noted contango from late October through November, with bids above the low USD 35s/wmt for second-half November loading. Sept-Îles–Qingdao was fixed at around low-mid USD 48/wmt for 24–30 October laycan.

Saldanha Bay–Qingdao fell by 70, 35, 45, 40 and 55 cents/wmt respectively to close at USD 25.75/wmt, down USD 2.45/wmt.

CAPESIZE	Unit	9-Oct	2-Oct	W-o-W	Y-o-Y

PANAMAX MARKET

ATLANTIC BASIN

The Atlantic market continued to show strong momentum, with ECSA employment attracting firm demand and particularly high returns reported for trips back to the Continent and Mediterranean.

Grain cargoes remained a key driver, whilst transatlantic coal business also provided solid support, allowing Owners to maintain strong rate ideas. In ECSA, a modern 82,000 dwt

2023-built fixed for Singapore/Japan grains at USD 24,500/day plus USD 1.4m ballast bonus, whilst an 82,000 dwt 2026-built achieved USD 23,000/day plus USD 1.3m ballast bonus for similar employment.

Another 82,000 dwt 2026-built was reported at USD 22,650/day plus USD 1.265m ballast bonus, confirming continued demand for fronthaul tonnage.

Older units remained competitive, a 77,000 dwt 2014-built fixing ECSA/SE Asia at USD 22,000/day plus USD 1.2m ballast bonus.

The strongest levels were seen on ECSA-to-Europe employment: an 81,000 dwt 2015-built fixed redelivery Skaw-Gibraltar at USD 36,000/day, whilst an 82,000 dwt 2012-built achieved USD 34,000/day for Skaw-Spain, with other fixtures reported at around USD 33,500–35,000/day.

Transatlantic coal demand remained healthy, with USEC/India employment reaching USD 35,000/day and Baltimore/Amsterdam coal indicated at USD 24.00 fio.

PACIFIC BASIN

The Pacific market remained firm this week, although sentiment began to soften towards the end of the week.

Activity was seen across Indonesia, NOPAC and Australia, with rates varying by route and destination.

Indonesia saw mixed levels across the Pacific round-voyage market: a 76,426 dwt 2013-built fixed USD 16,750 for Indonesia/South China, whilst a 75,599 dwt 2011-built achieved USD 20,000 for Indonesia/South Korea.

Longer-haul business continued to attract a premium, an 81,922 dwt 2014-built fixing USD 23,750 for Indonesia/India and an 82,178 dwt 2013-built achieving USD 27,000 for the same destination.

NOPAC remained relatively steady, with rates ranging from USD 17,500 to USD 26,500: a 75,656 dwt 2005-built fixed USD 17,500 for NoPac/Singapore-Japan grains, whilst an 82,562 dwt 2008-built achieved USD 19,500.

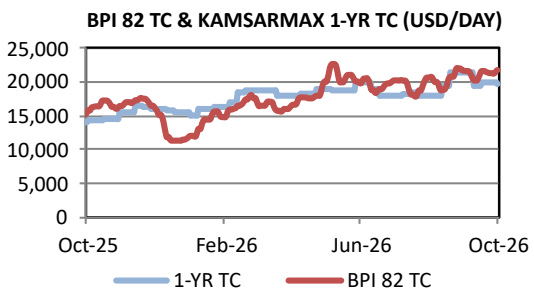

Better levels were seen on other employment, an 81,161 dwt 2015-built fixing USD 21,000 and an 82,197 dwt 2024-built achieving USD 26,500 for NoPac/Singapore-Japan.

Australia was mainly driven by East Coast business, with no clear West Coast fixtures reported.

Rates were around the low/mid-USD 20,000s, an 81,879 dwt 2016-built achieving around USD 23,500–23,750 for EC Australia/Singapore-Japan coal.

A 76,064 dwt 2012-built fixed at around USD 18,000 for Australia/Singapore-Japan, whilst an 82,181 dwt 2011-built achieved USD 21,500 plus a USD 300,000 ballast bonus for EC Australia/South Korea.

PANAMAX	Unit	9-Oct	2-Oct	W-o-W	Y-o-Y

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

The US Gulf was firm and active across all routes, with strong fronthaul demand for both petcoke and grains to the Far East and South Asia, alongside steady transatlantic activity and firming Handy rates.

Fronthaul was particularly brisk: a 66k open USG fixed a trip to Pakistan/Bangladesh with grains, a 63k open Rio Haina fixed a 70-day trip to Pakistan with grains and a 64k open Mobile fixed to India with petcoke, whilst for China a 58k open Altamira fixed a fronthaul trip with petcoke.

Transatlantic, a 63k open USG fixed to Algeria with grains, a 56k open Lake Charles to Egypt with grains and another 56k open Brownsville to Algeria with grains.

On short and regional runs, a 57k open Tolu fixed dely Miss River/NCSA grains USD 20,500.

On Handies, transatlantic levels firmed, a 40k open EC Mexico fixing APS USEC/Continent wood pellets USD 24,000.

EAST COAST SOUTH AMERICA

The ECSA Supra/Ultra market remains fairly flat, with no significant price change this week, whilst Handies, on the vessel shortage, stay particularly strong and rose.

Supra/Ultra fronthaul to Asia is active: 63/64k grain and agriproduct runs ex Santos and Upriver to Chittagong, Bangladesh and SE Asia at USD 19,250–21,000/day+USD 925k–1.1m bb, a 63k also USD 19,500/day+USD 950k bb Vietnam and a 64k open Santos USD 20,000/day+USD 1m bb Singapore-Japan.

Further afield, a 61k fixed APS Recalada/Australia grains USD 20,000/day+USD 1m bb and a 57k open Dakar heard via the Plate/Iraq in the high USD 24,000s/day+USD 1.4m bb.

Transatlantic, a 61k open Gibraltar fixed APS Itaqui/Egypt USD 36,500/day and a 59k open Pecem USD 32,000/day steel slabs to the Baltic.

Handies stay firm on all major routes: a 40k fixed APS Recalada/Algeria USD 33,500/day, another 40k Upriver/Continent in the low USD 30,000s/day and a 38k open Rio Grande USD 32,000/day WCCA.

NORTH EUROPE / CONTINENT

The Continent saw another exceptionally strong week, Owner sentiment firm across all geared segments: scrap demand lifted levels substantially on larger units, whilst Handies kept commanding healthy rates regionally and transatlantic.

On Handysize activity stayed steady, transatlantic to USG well supported: a 39k (2016) open Norway fixed DOP via Bremen/USG steel products USD 19,500/day and a 39k (2015) open Morocco USD 19,500/day APS German North Sea, similar USG redelivery; long-haul to the Far East also held firm, a modern 40k (2025) open Dunkirk via COGH in the high USD 20,000s.

On Supras/Ultras there was a very important push, particularly scrap to East Med and Turkey: a modern 65k Ultramax (2025) open Nordenham fixed via Ghent/Turkey scrap USD 37,000/day and a 60k (2016) open Antwerp USD 37,000/day to EMed; UK-open tonnage achieved higher still, a 63k (2015) open Tyne on subs for scrap to EMed USD 38,000/day and equivalent USD 40,000/day reported fixed APS Tilbury for a trip to Nemrut Bay.

BLACK SEA / MEDITERRANEAN

Russian attacks on three vessels off the Romanian and Bulgarian coasts have added further uncertainty to the Black Sea market.

Freight is certainly on the rise, the couple of dollars per metric tonne on top appearing to reflect the cost of extra war risk combined with reluctance to call Black Sea ports; speculation naturally carries weight too.

For Handysizes 35,000 dwt or more, intra-Med remains around USD 15,500/16,000 per day, even if spot cargoes have seen a few discounts.

Transatlantic trips stayed generally stable: Rio de Janeiro-Recalada remained USD 11,000 and Boston-Galveston USD 14,500/15,000, whilst the Supramax transatlantic is still USD 15,500/15,750 per day.

Trips East slowed to USD 24,500 on Supramaxes and around USD 25,500 daily for Ultramaxes.

SUPRAMAX & HANDYSIZE MARKET

MEG / INDIAN OCEAN

Indian Ocean sentiment turned bullish over 5–9 October, owners showing little inclination to discount as tonnage tightened, though trading stayed slow with participants returning from the Golden Week break.

Outbound activity was limited early on, while South Africa–China runs began paying well enough to draw ships away from the west coast of India.

Out of the Persian Gulf, the limestone trade was flat on scant fixing information.

Freight to move 50,000 mt of limestone from Mina Saqr to Paradip on the east coast of India eased to USD 19.15/mt on 5 October, recovered to USD 19.30/mt on 6 October and held there through 8 October before closing at USD 19.20/mt, down 10 cents/mt on the week.

South Africa surged. Freight to carry 50,000 mt of coal from Richards Bay Coal Terminal to Port Qasim dipped to USD 23.45/mt on 5 October, then climbed to USD 23.65/mt, USD 24.15/mt and USD 24.65/mt on successive days, closing at USD 24.70/mt, up USD 1.15/mt on the week.

Tonnage availability was limited, with charterers seeking vessels off the Indian coasts, and a 60,000 mt (plus/minus 10%) manganese ore stem from Port Elizabeth and Coega to China was worked for 28–31 October laycan.

FAR EAST

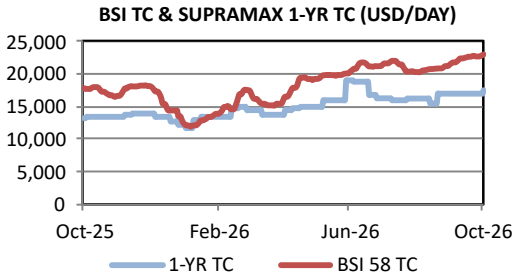

On Supramaxes/Ultramaxes it was a largely uneventful week, the segment closing quietly with Asian gains and a softer Atlantic market; despite various holidays in Asia rates improved, led by North Pacific grains, with a steady backhaul and fresh demand from Indonesia and Vietnam.

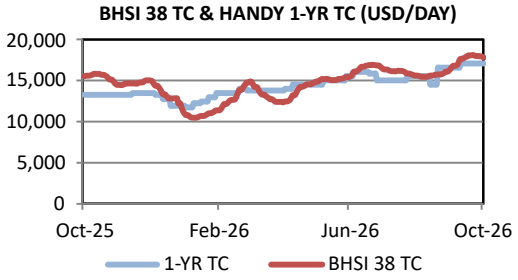

A TBN was fixed for 65,000/10 grain Vancouver/Phu My 15 November at USD 37 with Olam, a 61,000-dwt dely North China fixed a round voyage at USD 25,000 and a 64,000-dwt dely North China fixed minimum four/about six months at USD 23,500.

Handysize activity ended the week at the usual slow pace, although in the Pacific, despite regional holidays, rates remained steady in a well balanced market, with a 36,000-dwt open Panjin 7/8 October fixing a TCT to SE Asia at USD 17,000.

CRUDE TANKER MARKET

VLCC

Nothing could stop the upward trajectory in rates, up to the WS 840 level for 270,000 mt Oman/China, the WS 750 level for 260,000 mt West Africa/China and the USD 80 million level for US Gulf to China.

Suezmax

The market remained very strong and closed again at around the WS 1,000 level for 130,000 mt West Africa/UKC-Mediterranean and for 135,000 mt CPC/Mediterranean, whilst rates for 130,000 mt Guyana/transatlantic moved up to WS 985.

In the East, rates ex Gulf of Oman went up to WS 900 eastbound and allegedly to the WS 500 level to Europe via Suez.

Aframax

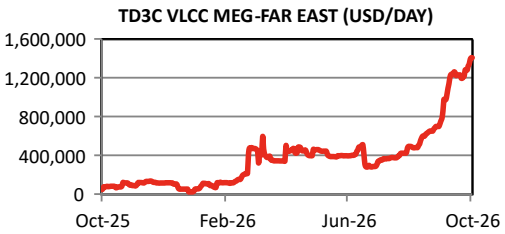

Rates reached the WS 780 level for 80,000 mt cross-Mediterranean and the WS 960 level for 70,000 mt US Gulf/Europe.

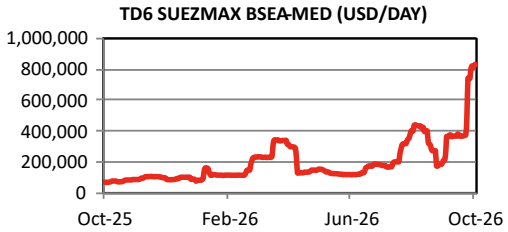

Delays for daylight-restricted tankers at the **Turkish Straits** are still at around three days both northbound and southbound.

PRODUCT TANKER MARKET

CLEAN

Handies Cross-Med

Rates hovered at around WS 350/355 during the first half of the week, closing at around WS 365 on Friday.

Sentiment remains firm, as also reflected in the paper market.

Flexies ex Med

A slow week overall, with the market lately seeming to favour time-charter employment over spot activity, and the East Med remaining tighter on both sizes.

Most Flexies are now on the Continent, leaving charterers with little choice but to look at Handies despite the rising rates.

Intermediates / Small

Likewise a slow week, the market lately seeming to favour time-charter employment over spot activity, with the East Med remaining tighter on both sizes.

DIRTY

Handies

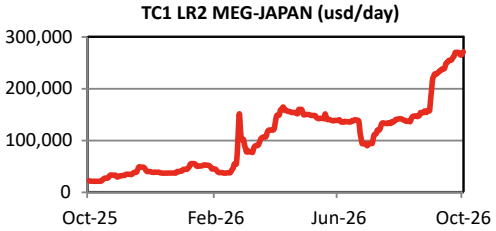

Cross-Med was stronger than ever, gaining another 20 WS points and closing at around WS 360, also supported by some natural tonnage strategically positioned and by most of the fleet already being employed from the previous week.

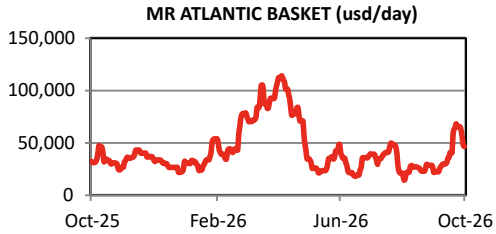

MRs

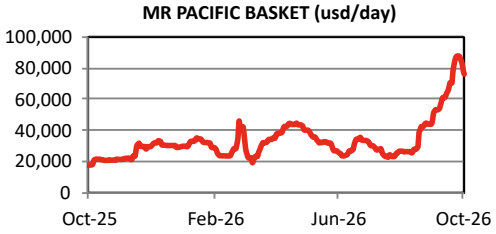

MRs followed suit, with 45,000 mt cross-Med reported at around WS 300.

CONTAINERSHIP MARKET

The container charter market remained firm during Week 41, supported by limited prompt tonnage and steady demand across the feeder sector.

Strength was particularly evident in the 1,700–3,500 TEU segment, whilst larger sizes remained broadly stable.

Overall sentiment continues to be positive, despite growing attention on the sizeable orderbook and the upcoming newbuilding deliveries.

Some reported fixtures:

AS CAROLINA, blt 2006, 2,824 teu, gearless, Fixed to OOCL for 34-36 mos at USD 29,950

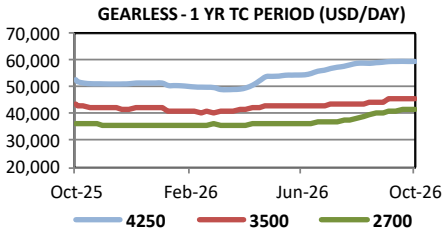

SL HARRIER, blt 2007, 1,296 teu, geared, Fixed to MAERSK for 24-26 mos at USD 21,500

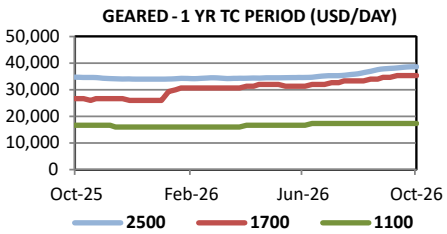

PICTOR, blt 2009, 925 teu, gearless, Extended with EIMSKIP at USD 14,500

NEWBUILDING ORDERS

Newbuilding activity this week was spread across the bulk carrier, tanker, gas carrier and car carrier sectors.

In the bulk carrier sector, U-Ming Marine Transport reportedly contracted 4x 64,000 dwt bulk carriers at New Dayang, priced at approximately USD 35.5-38.8 million each, with deliveries scheduled for December 2029.

The owner also exercised options for 2x 210,000 dwt bulk carriers at Jiangsu Hantong, priced at approximately USD 77-80 million each, with deliveries scheduled for June 2030, bringing the total order for this type to four vessels.

Seaspan reportedly contracted 2x 210,000 dwt bulk carriers at Yangzijiang Shipbuilding, with deliveries in June 2030.

Almi Marine Management was also reported to have contracted 3x 64,000 dwt bulk carriers at COSCO Shipping Heavy Industry, with deliveries scheduled between June 2029 and June 2031.

Tanker ordering was also notable. Advantage Tankers reportedly contracted 2x 114,000 dwt product tankers at Dalian Shipbuilding Industry, with deliveries scheduled for October 2029 and February 2030.

The owner also contracted 2x 50,000 dwt MR2 tankers at Guangzhou Shipyard International, priced at approximately USD 45 million each, with deliveries scheduled for June 2029.

The vessels will feature dual-fuel LNG propulsion, bringing the owner's total order at the yard to six ships.

Latsco Shipping also reportedly contracted 2x 115,000 dwt product tankers at SK Ocean Plant, priced at approximately USD 77 million each, with deliveries in June 2030.

Yangzijiang Maritime reportedly contracted 4x 114,000 dwt tankers at Jiangsu Haifeng Shipbuilding, with deliveries scheduled for April 2028.

Options are retained for two further vessels, which are expected to be exercised, potentially bringing the total order to six ships including the latest contracts.

In the gas carrier sector, SFL reportedly contracted 2x 93,000 cu.m. LPG/ammonia carriers at Jiangnan Shipyard, priced at approximately USD 108 million each, with deliveries scheduled for June 2028.

The vessels will feature dual-fuel propulsion and have secured long-term charters.

ADNOC also reportedly contracted 3x 90,000 cu.m. LPG/ammonia carriers at Hengli Heavy Industries, priced at approximately USD 108 million each, with deliveries scheduled for July 2029.

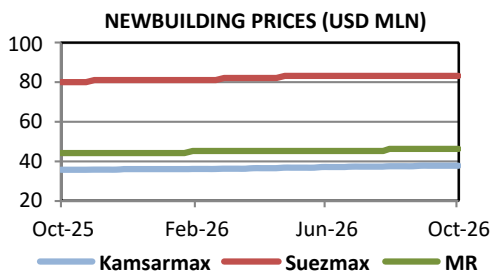

In the car carrier sector, Norwegian Car Carriers (NOCC) reportedly exercised an option for a 7,000-car capacity vessel at CIMC Raffles, priced at approximately USD 88 million, with delivery scheduled for April 2027.

The vessel will be capable of operating on gas oil and LNG and will be ammonia-ready.

Three vessels are now on order, with further options reportedly available, although the number has not been disclosed.

SECONDHAND SALES

Another active week in the second-hand market, with a number of transactions reported across both the dry bulk and tanker sectors.

In the dry bulk sector, different capesizes reported sold: ARRIKTOS 181,000 dwt 2027 Hengli Shipbuilding was reportedly sold to Chinese interests for around $90 mln.

PAN ADVANCE 179,000 dwt 2009 Hyundai was reportedly sold for around $37 mln, while GOLDEN MYRTALIA 178,000 dwt 2011 Shanghai Waigaoqiao Shipbuilding changed hands for around $40 mln.

BULK JOYANCE 176,000 dwt 2012 Jinhai was reportedly sold to Hong Kong interests for around $31.1 mln, while EKATERINI V 174,000 dwt 2012 Bohai was sold to Chinese interests for around $35 mln.

In the Panamax/Kamsarmax segment, KIRRIBILLI 82,000 dwt 2011 Tsuneishi changed hands for around $22.8 mln.

WORLD DIANA 82,000 dwt 2020 Oshima Shipbuilding was reportedly sold to Greek interests for around $40 mln.

Among smaller bulkers, SHENLI 56,000 dwt 2004 Mitsui was reportedly sold to Chinese interests for around $9.8 mln.

BAM PROTEUS 34,000 dwt 2007 Kanda Zosensho - Kawajiri changed hands for around $9.5 mln, while AM PRESTIGE 32,000 dwt 2014 Guangzhou Wenchong Shipyard was reportedly sold for around $12.5 mln.

In the tanker sector, SEA LEOPARD 314,000 dwt 2011 Daewoo changed hands for around $169 mln, while VIEIRA 307,000 dwt 2002 Hyundai was reportedly sold for around $75 mln.

Among Suezmax tankers, TIANLONG 159,000 dwt 2009 Bohai was reportedly sold for around $88 mln, while ACHILLEAS 158,000 dwt 2010 Hyundai changed hands for around $98 mln.

TATAKI 150,000 dwt 2010 New Times Shipbuilding was reportedly sold for around $97 mln.

In the Aframax/LR2 segment, ADVANTAGE ATOM 116,000 dwt 2011 Samsung was reportedly sold for around $52.5 mln, while HYDRA 106,000 dwt 2004 Sumitomo Heavy Marine - Yokosuka changed hands for around $51.5 mln.

Among smaller tankers, JAG SPARROW 75,000 dwt 2005 Hyundai was reportedly sold for around $23.5 mln.

BLUEBIRD and STARLING, both 74,000 dwt 2016 New Times Shipbuilding, were reportedly sold to Ya-sa for around $55 mln each. TORM VENTURE 74,000 dwt 2007 New Century Shipbuilding changed hands for around $23.9 mln, while GREEN PLANET 51,000 dwt 2014 Daesun was reportedly sold to Castor Maritime Ltd for around $36 mln.

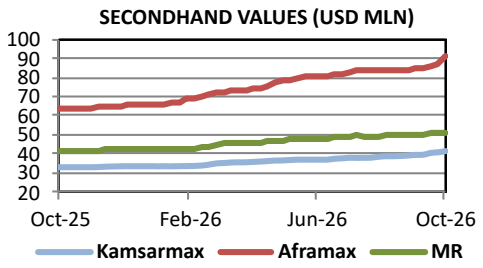

In the MR segment, MP MR TANKER 1 50,000 dwt 2011 Hyundai Mipo Dockyard was reportedly sold for around $30 mln, while LEON GRACE 50,000 dwt 2008 Hyundai Mipo Dockyard changed hands for around $23 mln.

BOW ELM 46,000 dwt 2011 SLS Shipbuilding was reportedly sold for around $29 mln, while EASTERLY JUPITER 37,000 dwt 2009 Hyundai Mipo Dockyard changed hands for around $19 mln.

Among smaller tankers, BOW VICTORY 21,000 dwt 2016 Asakawa Zosen was reportedly sold for around $29.5 mln, while SAKURA SHUCHI 20,000 dwt 2006 Fukuoka Shipbuilding - Nagasaki changed hands for around $13.5 mln.

DEMOLITION SALES

As we start the final quarter of the year, demand and sentiment across the Indian Sub Continent demolition destinations remains positive with Buyers keen to acquire tonnage but starved of Vessels of any real weight.

Echoing last weeks report, Bangladesh retains its conventional pricing top spot while Pakistan remains competitive and India continues to be the go to destination for specialist and non-ferrous-rich unit.

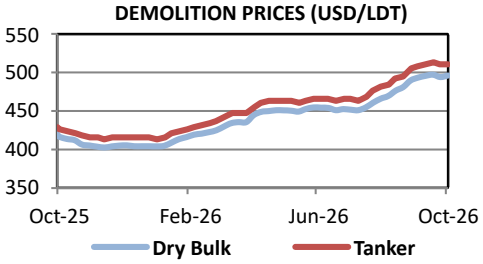

Pricing on both bulkers and tankers remains well in excess of the USD 500 per LT/LDT mark on a delivered basis.

Markets continue to await the announcement from the EU commission with the updated version of the European list of recycling facilities - with two of the Indian ship recyclers having been listed for possible inclusion.

No sales of significance to report on this week.
