Suezmax utilisation strengthens as Eastern markets drive vessel employment

- Suezmax utilisation rose to 92.0% in Week 41, up 2.2 percentage points MoM and 2.0 percentage points YoY, reflecting firmer fleet employment despite a softer demand backdrop. The tonne-mile index stood at 110.0, down 6.3% YoY, indicating that while crude trade volumes remain relatively resilient, shorter-haul movements and evolving trade patterns continue to temper underlying transport demand.
- East of Suez provided the main source of support, with the share of laden vessels rising by 4.3 percentage points MoM. Increased Indian Ocean anchorage volumes and a 17.9% rise in eastern anchored capacity reflected stronger vessel absorption, while a 45.1% decline in western anchored capacity indicated improving vessel availability in the Atlantic market.
- Higher utilisation was partly offset by improving vessel availability. Laden anchor days fell 11.4% on a four-week moving-average basis, while East ballast speeds increased 5.1% MoM, supporting faster vessel turnover and greater effective fleet supply, which limited further freight-rate upside.

S No.	Terms	Define
1	Suezmax vessel	Crude tanker vessels which have dwt in the range of 120,000 - 200,000.
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO number have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight(or capacity) for that fleet
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	East of Suez Canal and comprises China, Pacific, Indian Ocean and Oceania
7	West	Region West refers to the region West of Suez Canal and comprises Atlantic region
8	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
9	Moored	Vessels moored in port for loading or discharging
10	Underway	Vessels currently at sea and are currently underway towards their destination
