YoY change in tonne-miles index

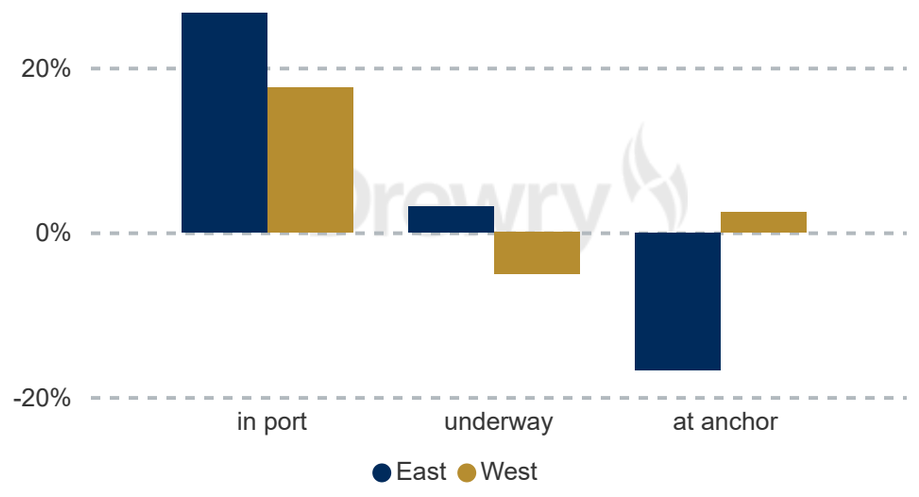

Tonne-miles index (base: week 1, 2025 =100)

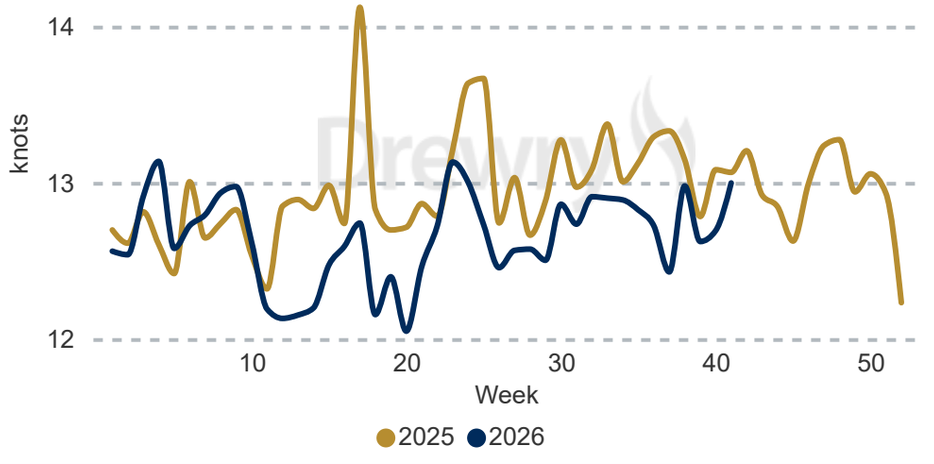

Fr vessel congestion eases as tonne-mile demand moderates

- Ballast tonnage at anchor declined sharply in the Indian Ocean and Atlantic, but remained above levels seen during the same period in 2024 and 2025.
- Laden tonnage at anchor in the Atlantic has fallen sharply over the past month, dropping below comparable levels in both 2024 and 2025.
- Global ballast speed increased over the past two weeks, but remained below 2025 levels, broadly continuing the trend seen through much of 2026.
- The tonne-mile index declined last week after rising through much of the past month, returning to levels broadly in line with the same period in 2025

S No.	Terms	Define
1	fr vessel	Fully refrigerated tankers built to carry liquefied gases at low temperature and atmospheric pressure in onboard fully refrigerated storage tanks, and are in the size range 15,000-100,000 cbm.
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO number have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight(or capacity) for that fleet
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	East of Suez Canal and comprises China, Pacific, Indian Ocean and Oceania
7	West	Region West refers to the region West of Suez Canal and comprises Atlantic region
8	BLPG1	Spot rates on Arabian Gulf–Japan route and data have been taken from Baltic Exchange
9	BLPG2	Spot rates on US-Europe route and data have been taken from Baltic Exchange
10	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
11	Moored	Vessels moored in port for loading or discharging
12	Underway	Vessels currently at sea and are currently underway towards their destination
