Utilisation

Rising cargo activity supports aframax fleet emplyment

- Aframax utilisation declined 1.1 percentage points WoW, yet remained 0.3 percentage point above MoM and 1.5 percentage points YoY, while the tonne-mile index rose to 104, up 2.6% YoY. The combination of firmer utilisation and improving tonne-mile demand points to resilient crude trade activity, helping sustain fleet employment.
- Cargo absorption strengthened across both regions, with the share of laden vessels increasing by 6.5 percentage points MoM in the east and 3.2 percentage points in the west. Rising anchored capacity in the west and stable levels in the east suggest greater vessel engagement in cargo operations, while elevated laden tonnage at anchor across the Atlantic and Pacific indicates support from regional crude movements.
- Market tightness remained broadly balanced as stronger cargo activity was partly offset by improving productivity. Faster vessel repositioning continued to support effective fleet supply, limiting upward pressure on freight rates despite healthy utilisation levels.

S No.	Terms	Define
1	Aframax vessel	Crude tanker vessels which have dwt in the range of 80,000 - 120,000.
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO number have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight(or capacity) for that fleet
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	Region East of Suez Canal and comprises China, Pacific, Indian Ocean and Oceania
7	West	region West of Suez Canal and comprises Atlantic region
8	TD7	Spot rates on North Sea–UK Continent route and data have been taken from Baltic Exchange
9	TD8	Spot rates on Kuwait-Singapore route and data have been taken from Baltic Exchange
10	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
11	Moored	Vessels moored in port for loading or discharging
12	Underway	Vessels currently at sea and are currently underway towards their destination
