Utilisation

LR2 utilisation improves as long-haul product flows remain resilient

- LR2 utilisation rose 1 percentage point to 93 WoW, and 1.6 percentage points YoY, reflecting strong fleet employment. Demand remained a key support factor, with the tonne-mile index reaching 139.8, up 10.2% YoY, highlighting sustained long-haul product movements.
- East of Suez remained the stronger market, with the share of laden vessels increasing 5.2 percentage points MoM, while the west declined by 4.4 percentage points. Higher laden and ballast tonnage at anchor in the Indian Ocean, point to a tighter vessel availability and stronger cargo absorption.
- Laden anchor days increased 16.1 on a four-week moving average basis, suggesting greater vessel absorption, while east ballast speeds rose 15.2% MoM despite bunker prices remaining elevated at $907/tonne.

S No.	Terms	Define
1	LR2 vessel	Long range coated vessels above 80,000 dwt
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO numbers have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight (or capacity)
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	East of Suez Canal, comprising China, Pacific, Indian Ocean and Oceania
7	West	West of Suez Canal, comprising Atlantic region
8	TC1	Spot rates from Baltic Exchange on ME Gulf-Japan route
9	TC8	Spot rates from Baltic Exchange on ME Gulf-UK Continent route
10	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
11	Moored	Vessels moored in port for loading or discharging
12	Underway	Vessels currently at sea and are currently underway towards their destination
