Week 39/2026 (21 Sep – 28 Sep)

Comment: China's Soybean Imports

CHINA SOYBEAN IMPORTS

Soybeans are one of the most important dry bulk commodities, and account for around 3 percent of all seaborne dry bulk trade.

Total seaborne exports of soybeans in calendar (Jan-Dec) 2025 increased by +4.6% year-on-year to 159.9 mln tonnes, according to vessel tracking data from AXS Marine.

So far this year, volumes have continued to grow at a healthy pace. In Jan-Aug 2026, global loadings increased by +6.4% y-o-y to 122.6 mln t, from 115.2 mln t in Jan-Aug 2025.

This was above the 103.7 mln tonnes loaded in Jan-Aug 2023 and 108.5 mln t in Jan-Aug 2024.

The largest exporter of soybeans by far is Brazil, which accounted for 77.8% of global soybean exports by volume in Jan-Aug 2026.

In Jan-Aug 2026, total shipments from Brazil increased by +6.5% y-o-y to 95.3 mln tonnes, up from 89.5 mln tonnes in Jan-Aug 2025.

In second place are the United States, which accounted for 15.7% of global soybean exports this year.

In Jan-Aug 2026, soybean exports from the USA increased by +30.9% y-o-y to 19.3 mln tonnes, recovering from a -10.8% y-o-y decline recorded in Jan-Aug 2025.

In third place is Argentina, whose exports typically peak from May

onwards, with a 2.8% share so far in 2026, followed by Uruguay with 1.3% and Canada with 1.0%.

In Jan-Aug 2026, Argentina exported just 3.4 mln tonnes of soybeans, down -43.1% y-o-y from the 6.0 mln t in Jan-Aug 2025.

In terms of imports, the top destination for soybeans so far in 2026 is still Mainland China, accounting for 65.0% of global seaborne imports.

Imports to China increased by +2.0% y-o-y in Jan-Dec 2025 to 107.6 mln tonnes.

In Jan-Aug 2026, Chinese imports increased by +4.0% y-o-y to 75.5 mln tonnes.

Imports to the European Union declined by -6.2% y-o-y in Jan-Dec 2025 to 13.5 mln t.

In Jan-Aug 2026, however, European imports recovered by +5.2% y-o-y to 9.7 mln tonnes.

The EU now accounts for 8.3% of global seaborne soybean imports.

Let's now focus a bit more on China.

Top soybean discharge ports in China in Jan-Dec 2025 were:

Rizhao (9.6 mln t in Jan-Dec 2025), Machong (7.4 mln t), Tianjin (7.2 mln t), Zhangjiagang (7.0 mln t), Gaogang (5.4 mln t), Fangcheng (4.2 mln t), Nantong (4.2 mln t), Dongjiakou (4.0 mln t), Ningbo (3.6 mln t).

93.1% of soybean imports into China

in 2025 were loaded on Panamaxes (including Kamsarmax), 6.3% on Supramaxes, 0.3% on Post-Panamaxes.

In Jan-Aug 2026, arrivals of US soybeans into China were broadly stable, down -1.1% y-o-y to 12.3 mln tonnes, following a -10.8% y-o-y decline in Jan-Aug 2025.

This was also below the 13.9 mln t delivered from the USA to China in Jan-Aug 2024.

The USA now accounts for 16.2% of China's imports so far this year.

Brazil accounted for 75.5% of China's soybean imports in Jan-Aug 2026, with volumes from Brazil to China essentially flat at +0.4% y-o-y in that period, at 57.0 mln tonnes.

It is important to consider the seasonality of soybean crops.

Brazilian exports are shipped mostly in the Spring, from February to July, and will appear in China's import statistics from March to August.

USA exports, on the other hand, normally peak in the fourth quarter of the year, and should be the most active trade in the winter months.

With the peak Brazilian season now largely reflected in the Jan-Aug 2026 import figures, attention turns to the upcoming US export season in the fourth quarter, which will indicate whether China returns more actively to the US crop this year.

COMMODITY NEWS – DRY BULK

Indonesia's nickel production curbs leave market unconvinced

Indonesia is learning that building a dominant position in the nickel market is the easy part. Leveraging its influence over supply to control prices is proving much trickier. The Southeast Asian country now accounts for over 60% of global output of a metal used by both stainless steel makers and electric vehicle battery manufacturers.

China to cut tariffs on US farm goods, but list excludes soybeans

China is set to cut tariffs on a broad range of US agricultural goods, from corn and wheat to meat and dairy, but top import item soybeans were excluded from a tariff-reduction list its commerce ministry issued. Markets have been waiting for news on Chinese tariff cuts on US farm goods following last week's Washington summit of leaders Xi Jinping and Donald Trump.

China private crushers buy Australian canola, first deals since 2020

A private Chinese crusher bought 68,000 metric tons of new-crop Australian canola for March shipment, after a similar cargo purchased by another private processor arrived earlier this month, trade sources said, in the first such deals since trade was disrupted in 2020. "Old crop trade was dominated by COFCO but there some interest from private sector in new-crop Australian canola," said one Asia-based trader.

Wheat buyers brace for higher costs as Russia-Ukraine war drags on

Global wheat buyers holding out to replenish dwindling stocks face painfully higher costs when they return to the market in the coming weeks, with world prices soaring as the Russia-Ukraine war shows no signs of abating. Top wheat importers in Asia, the Middle East and Africa that were counting on the

Black Sea region for wheat have been finding it hard to secure supplies, as attacks on vessels and port infrastructure have brought cargo movements to a near standstill since July.

Russia can restart 80% of Black Sea grain export terminals if attacks stop

Russia could quickly restart up to 80% of its grain terminal capacity in the Black Sea and Sea of Azov if diplomatic efforts to halt mutual attacks by Russia and Ukraine result in a ceasefire, a Reuters analysis of industry data showed on Friday. But three terminals accounting for about 20% of Russia's grain export infrastructure in the area have suffered heavy damage and could take months to repair, the analysis showed.

Russia has fewer wheat buyers as Black Sea trade stalls, data shows

Fewer countries are buying Russian wheat after attacks by Russia and Ukraine in the Black Sea have kept a key export route closed since July, data from the Russian Grain Union lobby group showed on Wednesday. The data showed that only eight countries bought wheat from Russia, the world's biggest wheat exporter, in September, down from 26 a year earlier. In August, the number of buyers fell to 16 from 43 in the same month of 2025.

Ukraine looks to Baltic ports for exports, much like Russia

Ukraine is exploring the use of Baltic Sea ports for grain exports, the agriculture ministry said on Wednesday, following a similar move by Russia as both sides seek alternatives to Black Sea routes disrupted by their war. Sources have told Reuters that Russian companies are repurposing fertiliser, coal, and other cargo terminals at the country's Baltic and Arctic ports to handle grain exports after Ukrainian drone attacks disrupted shipments

through the Black Sea.

France loads first wheat for Yemen in years amid Black Sea disruption

A vessel is loading around 60,000 metric tons of wheat in France to send to Yemen, LSEG data showed on Friday, a first such shipment in four years that comes as importers seek alternatives to disrupted Black Sea supplies. A bulk carrier is due to load 20,000 tons at Dunkirk after already taking 40,000 tons at Rouen along the north coast of France, LSEG's shipping data showed.

Argentina set for near-record farm dollar windfall as global supply shocks lift grain exports

Argentina is on track for a near-record farm export windfall next year as strong crop prices, a bumper harvest and supply disruptions in rival exporting regions boost grain shipments and hard-currency inflows, the Rosario grains exchange said in a report on Friday. The farm sector could bring in about \$40 billion in export dollars in 2027, which would be the second-highest annual total on record behind only 2022, according to the report.

US harvest delays send soy processors scrambling for supplies

Soybean processors in the western US Midwest are offering hefty premiums for immediate deliveries of the oilseed as persistent rains delay the early harvest, tightening supplies and forcing some plants to scale back production, according to interviews with grain merchandisers and publicly reported company data. The scramble for soybeans has sent cash prices soaring, creating an unexpected windfall for farmers able to harvest their crops and get them to market, or sell off the last of their old crops.

COMMODITY NEWS – CRUDE OIL & PRODUCTS

Saudi Arabia restarts East-West oil pipeline, sources say

Saudi Arabia has restarted operations at its East-West Pipeline and could resume exports from the Red Sea port of Yanbu later on Tuesday, three sources briefed on the matter said, as signs mounted of an increase in Middle Eastern oil flows. The resumption of supplies on Tuesday helped to drive selling on global oil markets. Global oil benchmark Brent crude fell by more than \$2 a barrel towards \$97, its lowest since September 8.

Mideast oil exports rebound in September as Saudi Arabia boosts shipments

Crude oil exports from key Middle East producers rebounded in September to 12.8 million barrels per day, the highest since the US-Israeli war with Iran started in February, data from Kpler showed, as Saudi Arabia and the United Arab Emirates boosted exports. The rebound came following a recovery in exports via the Strait of Hormuz, which were set to hit about 7.4 million bpd this month, as Saudi Arabia diverted oil exports from the Red Sea port of Yanbu following attacks that damaged its East-West pipeline, the preliminary data showed.

Gulf of Oman ship-to-ship oil transfers reach limit as Saudi exports surge

Ship-to-ship transfers in the Gulf of Oman for Middle Eastern oil from inside the Strait of Hormuz have reached their limits after Saudi Arabia diverted exports from the Red Sea, adding to shipments from other producers, trade sources and analysts said. The increasing amount of Saudi exports this month requires more supertankers to shuttle crude through Hormuz to conduct cargo transfers, they said. That has

reduced ship availability, raising shipping costs and increasing the time cargoes are on the water before reaching refineries.

Saudi oil export strategy hits new hurdle as Red Sea insurance costs soar

The cost of insuring an oil tanker loaded from Saudi Arabia's main Red Sea port has tripled in recent weeks, industry sources told Reuters, adding to the major crude producer's struggles to find a viable channel for its exports. Saudi Arabia used its East-West pipeline to divert around 4 million barrels per day - 4% of global supply - to the Red Sea after Iran constrained Gulf exports via the Strait of Hormuz from March in response to US and Israeli air strikes.

US crude inventories rise, fuel stocks fall as refining slips, EIA says

US crude stocks rose last week while fuel inventories fell following a drop in refining activity in the Midwest, the Energy Information Administration said on Wednesday. Crude inventories rose by 3 million barrels to 426.4 million barrels in the week ended September 18, the EIA said, compared with analysts' expectations in a Reuters poll for a 641,000-barrel draw.

Trump supports diesel export ban as fuel prices hit records

US President Donald Trump said on Tuesday he backed a ban on diesel exports, as Republican candidates in some of the tightest election races in November called for the measure as a way to curb record fuel prices. Diesel prices have shot to record highs in the US and Europe as wars in Iran and Ukraine sharply cut exports from some of the biggest producers such as Russia, Saudi Arabia and the United Arab Emirates.

US Energy Secretary Wright says diesel export ban won't work

US Energy Secretary Chris Wright on Wednesday said a US ban on diesel exports would not work and could push up gasoline and jet fuel prices, a stance at odds with President Donald Trump, who is backing the idea. Diesel prices have surged to record highs due to the US-Israeli war with Iran and the conflict in Ukraine, angering farmers and other users of the fuel ahead of the midterm elections in November that will decide control of Congress.

AI challenges fuel trading's old guard: Russell

The Iran conflict has put a spotlight on the somewhat murky world of refined fuel trading as the world battles constrained supply and record-high prices. But it is AI that may bring the trading of diesel, gasoline and other products out of the shadows for good. While crude oil trading practices have been established for decades, attracting a wide range of market participants, the same cannot be said of refined products.

Global biofuel output to jump nearly 70% by 2030 due to Gulf energy crisis, study finds

Global biofuels output is expected to surge nearly 70% by 2030 from 2025 levels as major producing countries push ahead with raising blending mandates in response to the energy crisis triggered by the Iran war, a study published on Tuesday found. The study was co-authored by London-based think tank Chatham House and non-profit certification group the Forest Stewardship Council.

COMMODITY NEWS – NATURAL GAS & POWER

Global gas market pricing prolonged tightness due to Iran war, IGU executive says

Global gas markets are increasingly pricing in tight supplies well beyond winter as the Iran war disrupts Gulf liquefied natural gas exports and complicates Europe's efforts to rebuild gas inventories, a top industry executive said. The outlook comes as Europe competes with Asia for LNG cargoes while attempting to refill storage sites ahead of winter, amid continued uncertainty over the conflict's impact on exports from Qatar, one of the world's largest LNG suppliers.

EU warns of energy price crisis, asks countries to consider curbing demand, letter shows

The European Union is facing an energy price crisis as fallout from the Iran war roils oil and gas markets, the bloc's energy chief said on Friday in a letter seen by Reuters that urged countries to consider measures to curb natural gas demand. "We are facing a price crisis linking to a supply crisis," EU Energy Commissioner Dan Jorgensen said in a letter to EU countries' energy ministers.

High European gas prices push power producers back to coal

Soaring gas prices are driving European utilities back to coal, with power generation from the most polluting fuel likely to jump by a quarter in the next six months to offset a similar plunge in gas-fired generation, analysts said. The Iran-US war has choked liquefied natural gas shipments through the Strait of Hormuz, sending benchmark European gas prices above €80 per megawatt hour this month, their highest in three years.

Russia cuts natural gas output, export forecasts

Russia's economy ministry expects the country to produce and export less natural gas this year than previously forecast, according to a draft government document seen by Reuters, as Europe prepares to wind up its final Russian gas purchases. Earlier this month, Reuters reported that Russia had also downgraded its 2026 oil output forecast to a 17-year low and revised the fuel export outlook for this year and next due to the war with Ukraine.

India orders captive coal plants to maximise power output on surging demand

India has ordered more than 100 captive coal-fired power plants to operate at maximum capacity from October 1 through year-end to meet what it expects will be a rise in electricity demand. The federal power ministry's order, invoked under emergency provisions of the Electricity Act, applies to plants with installed capacity of at least 50 megawatts.

India sees coal remaining power mainstay through 2035-36

India expects coal to supply about half its electricity through 2035-36 as surging power demand forces the country to rely on thermal generation alongside a rapid expansion of renewable energy, senior power ministry officials said on Thursday. "Thermal is here to stay for a long time," said Aadhar Raj, joint secretary in India's Ministry of Power, at an industry event by the Federation of Indian Chambers of Commerce and Industry.

Lithuania plans key substation near Russia, fortified against explosive drones

Lithuania is planning defences against military drones at a key future power grid substation linking the Baltic states with western Europe in an area that intelligence sources say Russia could target with a false flag attack. The construction plans include fencing strong enough to resist an explosives-laden truck, sensors searching for possible tunnels dug by hostile actors, and concrete "sarcophagi" for transformers to withstand any drone attack, Litgrid CEO Andrius Semeskevicius told Reuters.

Zelenskiy says he discussed energy truce, efforts to end Russia war with Trump

Ukrainian leader Volodymyr Zelenskiy said on Tuesday he discussed with US President Donald Trump efforts to end the 4-year-old war with Russia, including a potential bilateral ceasefire on energy-related targets. Speaking to the media after a 40-minute meeting with Trump at UN headquarters in New York, Zelenskiy said Kyiv was ready for any format of an energy ceasefire with Moscow, but there had been no discussion of Ukraine unilaterally halting its attacks on Russian oil refineries.

CAPE SIZE MARKET

ATLANTIC AND PACIFIC BASIN

The Capesize market firmed early before retreating from midweek, all three principal iron ore routes closing lower as surging bunker prices and a succession of Asian public holidays sapped liquidity.

Japanese participants were absent from 21 to 23 September, with Chinese and South Korean markets closed later in the week.

The Western Australia–Qingdao route (170,000 mt iron ore, plus/minus 10%) gained 20 cents/wmt to USD 16.80/wmt on 21 September on strong freight derivative (FFA) gains, owners resisting lower offer ideas against a wide bid-offer spread, and held there on 22 September, when a mining major fixed several Capesizes from Dampier to Qingdao at around mid-USD 16/wmt for 8–10 October laycan and another took tonnage from Port Hedland at high-USD 16/wmt.

The route then fell 45 cents/wmt to USD 16.35/wmt on 23 September as

sentiment weakened, a further 35 cents/wmt to USD 16.00/wmt on 24 September amid surging bunker prices — Dampier–Qingdao fixed at USD 15.95/wmt for 12–14 October — and 35 cents/wmt to close at USD 15.65/wmt on 25 September, the Mid-Autumn holiday leaving exchanges sparse.

Dampier–Qingdao was reported at about USD 15.60/wmt for 13–15 October.

The route ended 95 cents/wmt below its 18 September level.

Tubarao–Qingdao firmed 10 cents/wmt to USD 42.85/wmt on 21 September and 50 cents/wmt to USD 43.35/wmt on 22 September as owners pushed offers higher on thin South Atlantic cargo volumes, one fixture being reported at mid-USD 43/wmt for mid-October onward laycan.

Confidence then eroded, the route shedding 45 cents/wmt, 40 cents/wmt and 30 cents/wmt to

close at USD 42.20/wmt, down 55 cents/wmt on the week, amid a prolonged dearth of fresh orders and an absence of firm bids.

Transatlantic enquiry remained ample, while a Newcastlemax was fixed Sept-Îles–Qingdao at around USD 47.00/wmt for 19–26 October laycan.

Saldanha Bay–Qingdao rose to USD 32.00/wmt by 22 September before easing over the remaining sessions to close at USD 31.25/wmt, down 35 cents/wmt.

PANAMAX MARKET

ATLANTIC BASIN

Atlantic sentiment strengthened further, with ECSA fronthaul continuing to attract firm demand and North Atlantic business achieving increasingly strong levels.

Modern Kamsarmaxes were particularly well positioned, grain requirements supporting both South Atlantic fronthaul and transatlantic employment, whilst South Africa/India remained another attractive alternative.

In ECSA, an 82,000 dwt 2017-built from Haldia fixed Singapore/Japan grains at around USD 25,000–25,500/day, whilst an 82,000 dwt 2021-built achieved USD 23,000/day plus USD 1.3m ballast bonus for similar employment.

An 82,000 dwt 2020-built from the Sunda Strait was also reported at USD 22,500/day, whilst older tonnage remained closer to the USD 20,000 mark.

North Atlantic rates were notably stronger: an 82,000 dwt 2025-built from ECSA fixed redelivery Skaw-Gibraltar at USD 35,500/day, matching another ECSA-positioned 79,000 dwt 2010-built at the same level for Skaw-Passero.

A modern 82,000 dwt from Brest achieved USD 34,750/day for NCSA/China, whilst an 81,000 dwt 2015-built from Cape Passero fixed NCSA/Skaw-Gibraltar at USD 21,300/day.

PACIFIC BASIN

The Pacific took a firmer tone this week, rates generally above last week's levels, particularly in Indonesia and Australia.

NOPAC remained relatively steady, whilst sentiment began to soften slightly late in the week.

Indonesia saw a clear improvement in the Pacific round-voyage market, Indo/South China and Indo/Singapore-Japan business ranging from the low-USD 13,000s to high-USD 17,000s: a 74,716 dwt 2001-built USD 17,000 for Indo/South China, a 76,414 dwt 2012-built USD 17,500, a 79,467 dwt 2011-built USD 17,500 for Indo/South China and a 76,945 dwt

2003-built USD 17,100 for Indo/Singapore-Japan.

Indo/India continued to command a clear premium, an 81,716 dwt 2014-built fixing USD 21,000 and an 82,094 dwt 2010-built USD 24,000 for Indo/WCI coal, whilst an 82,133 dwt 2026-built took USD 24,500 for Indo/India and an 82,365 dwt 2024-built USD 25,500 on the same route.

NOPAC was relatively steady, rates around the high-USD 19,000s to low-USD 20,000s: an 82,269 dwt 2007-built fixed USD 19,500 for NoPac/South China grains, or USD 20,250 for North China, and an 81,259 dwt 2012-built USD 19,000 for NoPac/Singapore-Japan, further

NoPac business concluded around the low-USD 20,000s.

Australia also improved, rates moving into the low/mid-USD 20,000s, activity mainly on East Coast Australia with no clear West Coast fixtures reported: an 82,224 dwt 2025-built USD 26,000 for EC Australia/Singapore-Japan coal, an 81,704 dwt 2017-built USD 23,000 for EC Australia/India, an 81,610 dwt 2014-built USD 20,000 for EC Australia/China, an 81,596 dwt 2020-built USD 24,000 for EC Australia/Singapore-Japan coal and an 85,180 dwt 2021-built USD 22,000 for EC Australia/Singapore-Japan.

SUPRAMAX & HANDYSIZE MARKET

US GULF / NORTH AMERICA

USG stayed very firm, strong levels across all routes, Ultramaxs seeing heavy volume on transatlantic and fronthaul trades whilst Handies held firm on South American/regional runs.

Fronthaul was brisk with multiple Far East fixtures: a 64k via Newport News/China petcoke USD 34,500, a 62k on subs via SW Pass/China grains USD 33,000, a 63k on subs via Cape

Henry/Singapore-Japan USD 32,500 and a 63k on subs via Dominican Republic/Singapore-Japan USD 32,000.

Transatlantic, a 60k secured a firm USD 35,000 APS Pascagoula/Italy petcoke, a 64k APS SW Pass/Egypt-Med coal USD 33,500 and a 61k Norfolk/Egypt grains USD 32,000.

Short and regional/WCCA rates were particularly strong: two 63k on subs

at USD 37,000 APS via Brownsville/WCCA and SW Pass/Puerto Quetzal with grains, a 60k via SW Pass/Atlantic Colombia grains USD 23,000.

Handies and regional held very firm, a 38k open Philadelphia fixing DOP St. Lawrence/Puerto Cabello USD 21,000.

EAST COAST SOUTH AMERICA

Atlantic sentiment strengthened further, ECSA fronthaul continuing to attract firm demand and North Atlantic business achieving increasingly strong levels.

Modern Kamsarmaxes were particularly well positioned, grain requirements supporting both South Atlantic fronthaul and transatlantic employment, whilst South Africa/India remained another attractive alternative.

In ECSA, an 82,000 dwt 2017-built

from Haldia fixed Singapore/Japan grains around USD 25,000–25,500/day, whilst an 82,000 dwt 2021-built achieved USD 23,000/day plus USD 1.3m ballast bonus for similar employment.

An 82,000 dwt 2020-built from Sunda Strait was also reported at USD 22,500/day, whilst older tonnage remained closer to the USD 20,000 mark.

North Atlantic rates were notably stronger: an 82,000 dwt 2025-built

from ECSA fixed redelivery Skaw-Gibraltar at USD 35,500/day, matching another ECSA-positioned 79,000 dwt 2010-built at the same level for Skaw-Passero.

A modern 82,000 dwt from Brest achieved USD 34,750/day for NCSA/China, whilst an 81,000 dwt 2015-built from Cape Passero fixed NCSA/Skaw-Gibraltar at USD 21,300/day.

NORTH EUROPE / CONTINENT

The Continent held its firm posture this week, robust scrap and grain enquiry keeping prompt tonnage well rewarded in both sizes.

On Handysize, scrap to East Med reached impressive numbers, a 40k (2025) open Denmark on subs at USD 31,500/day and a 37k (2014) open Rotterdam fixing similar around USD 30,000–31,000/day, a large Handy

open Skaw for the Turkish Black Sea reported in the high USD 20,000s. Grain was equally supported, a 37k (2018) open Gdansk fixing TCT to the Med; transatlantic held firm, a 40k (2024) open Terneuzen fixing prompt to USG at USD 19,000/day.

On Supras/Ultramax sentiment stayed positive, with no real regional disparity: fronthauls to China/South

Korea evaluated in the high USD 20,000s and Mediterranean rates traded around similar levels, a stronger Med meaning Owners saw little need to ask a heavy premium over local options.

Russian loading still commanded a massive premium, a 61k (2013) open Dublin fixing via Murmansk/New Orleans at USD 29,000/day.

BLACK SEA / MEDITERRANEAN

Last week almost the whole Black Sea was added to the High Risk Areas, so P&I began charging Owners extra premiums for calling Constanza, Varna and Bourgas too, whence most grain has lately moved; this pushed area rates up and led some Owners to stop calling Black Sea ports.

Despite the notable number of

cargoes, Owners are waiting until the last minute to fix, to benefit from the improving market.

For Handysizes 35,000 dwt or more, intra-Med has reached USD 15,500/16,000 per day.

Still on Handies, Skaw-Passero/Rio de Janeiro-Recalada is now around USD 11,000 and Boston-Galveston USD

14,000/14,500, the Supramax transatlantic improving to USD 16,000.

Trips East reached USD 25,000/25,500 on Supramaxes and around USD 26,000/26,500 daily for Ultramaxs.

SUPRAMAX & HANDYSIZE MARKET

MEG / INDIAN OCEAN

The two Indian Ocean benchmarks diverged over 21–25 September.

Trading was sluggish throughout, charterers and owners adopting a wait-and-watch stance, and activity thinned further late in the week ahead of the Coaltrans conference in Bali and the approaching Asian holidays.

Outbound activity from the east coast of India stayed limited, though rates drew support from a firm Southeast Asian market.

Out of the Persian Gulf, the limestone trade gave back part of its recent gains on scant fixing information.

Freight to move 50,000 mt of limestone from Mina Saqr to Paradip on the east coast of India eased to USD 18.75/mt on 21 September, held there through 22 September and, after minor moves either side, closed at USD 18.60/mt, down 25 cents/mt on the week.

South Africa extended its rally.

Freight to carry 50,000 mt of coal from Richards Bay Coal Terminal to Port Qasim climbed to USD 22.90/mt on 21 September and USD 23.15/mt on 22 September, peaked at USD 23.40/mt on 24 September, then eased to USD 23.20/mt, up 60 cents/mt on the week.

Fresh demand was subdued, most cargoes being worked for second-half October dates, but sentiment held positive on tighter supply.

FAR EAST

On Supramaxes/Ultramaxs it was a flat week overall, with holidays in Asia although the North Pacific stayed quite active, rates flat or a shade higher despite little business concluded: a 66,000-dwt fixed NoPac/Chittagong USD 26,000, backhauls were plentiful, a 63,000-dwt fixing dely Nansha via GoA to the Med at USD 24,000, a 64,000-dwt

dely Haldia fixed Indonesia/India at USD 22,000, Vega (2011, 55,733) fixed dely Cai Mep 1/2 October for a TCT with clinker to Bangladesh at USD 30,000 and SSI Discovery (2023, 63,712) fixed dely Ko Sichang 24/29 September for a TCT via New Caledonia to Singapore-Japan at USD 25,000 with Western Bulk Carriers; period interest remained, a 64,000-

dwt open Vietnam fixing 5/7 months USD 24,500.

In Handysize the Pacific stayed steady, ending the week on a positive note, trading receiving some support despite the holidays, a 39,000-dwt open CJK prompt fixing a TCT to WCCA at USD 21,500.

CRUDE TANKER MARKET

VLCC

The market stabilised and rates eased slightly, towards the WS 795 level for 270,000 mt Oman/China and towards the WS 510 level for 260,000 mt West Africa/China.

Suezmax

The same trend prevailed on the Suezmax market, closing at the WS 440 level for 130,000 mt West Africa/UKC-Mediterranean, still at

the WS 500 level for 135,000 mt CPC/Mediterranean and down to the WS 370 level for 145,000 mt US Gulf/transatlantic.

In the East, by contrast, rates ex Gulf of Oman moved to WS 725 eastbound and the WS 400 level to Europe via Suez.

Aframax

Rates were firmer worldwide: the Mediterranean market is still on

fire, moving up to the WS 640 level, whilst across the Atlantic rates for 70,000 mt US Gulf/Europe jumped towards the WS 700 level.

Delays for daylight-restricted tankers at the Turkish Straits are at around three days northbound and 2.5 days southbound.

PRODUCT TANKER MARKET

CLEAN

Handies Cross-Med

Handies exploded this week, closing at around WS 265 — some 75 points week on week — and showing sensitivity to grade and load port, with higher levels seen on jet/naphtha-clean units, although several tests failed.

A pretty busy week overall, also with more activity on Med/UKC runs.

Flexies ex Med

A very quiet week in the Mediterranean, with very few units and only limited activity seen towards the Continent.

It remains a very good time to have

vessels in the Med, although very few natural-size cargoes are being seen.

Intermediates / Small

A good week for the smaller sizes, with a peak in ex Western Mediterranean activity involving units even over 20.

Most of the vessels are expected to reposition mainly towards Italy/Western Mediterranean, keeping the East tighter and potentially open to a premium.

DIRTY

Handies

A steady week for Handies, with

cross-Med holding at around WS 275 despite a couple of prompt units in the Central Mediterranean having some difficulty finding employment.

A number of Owners are looking to push tonnage east, which should help keep the Mediterranean list tight going forward.

The Continent has been the firmer side, with cross-North rates now at around WS 300.

MRs

A firm week for MRs, with cross-Med rates pushing up to around WS 220.

A couple of units fixed into the Continent, helping to keep prompt tonnage

CONTAINERSHIP MARKET

The container charter market continues to move sideways at very solid levels, firmly supported by a highly restricted tonnage supply.

Whilst the volume of confirmed fixtures remains limited owing to tight forward availability, Owners maintain a very comfortable position, with increasing momentum seen in the feeder sizes.

Some reported fixtures:

ATLANTIC EXPRESS, blt 2007, 1,118 teu, 700 @14, geared, Extended with CMA CGM for 2-4 mos at USD 17,000

FU YU, blt 2024, 1,006 teu, gless, Fixed to CU LINES for 11-13 mos at USD 17,000

COFFEE STAR, blt 2008, 990 teu, 621 @14, gless, Fixed to SEA CONSORTIUM for 14-16 mos at USD 18,250

ATLANTIC GREEN, blt 2006, 868 teu, 613 @14, gless, Fixed to X-PRESS FEEDERS for 2-3 mos at USD 16,150

NEWBUILDING ORDERS

Newbuilding orders continued to flow this week;

In the container sector, Chinese owner China United Lines placed an order for 2x 14,000 teu containerships at Hudong-Zhonghua for around USD 150 million each, with deliveries scheduled for December 2028.

The vessels will be conventionally fuelled.

Greek owner Navios Maritime Partners reportedly placed an order for 4x containerships at HJ Shipbuilding for around USD 122.7 million each, with deliveries scheduled for December 2027.

No teu capacity has been confirmed at this stage.

In the tanker sector, Greek owner Latsco Shipping reportedly placed an order for 2x 115,000 dwt tankers at SK Oceanplant for around USD 77 million each, with deliveries scheduled for June and November 2030, with options retained for two more.

Greek owner Akrotiri Tankers also placed an order for 1x 157,000 dwt Suezmax tanker at New Times Shipyard for around USD 84.4 million, with delivery scheduled for June 2029.

This brings the owner's total order to two Suezmax tankers.

Swiss/Turkish owner Advantage Tankers reportedly ordered 4x 157,000 dwt Suezmax tankers at

Samsung for around USD 88.3 million each, with deliveries scheduled for October 2029.

Reports indicate that the contract was placed in July 2026.

Greek owner Dynagas reportedly ordered 4x 200,000 cbm LNG carriers at Samsung for around USD 263 million each, with deliveries scheduled for March 2029.

The vessels will feature dual-fuel propulsion.

SECONDHAND SALES

Another active week in the second-hand market, with a number of transactions reported across both the dry bulk and tanker sectors.

In the dry bulk sector, HC WISDOM 96,000 dwt 2013 Imabari Shbldg was reportedly sold for around \$24.5 mln, while LC MILADY 94,000 dwt 2011 Shanghai Waigaoqiao Shbldg changed hands for high \$14 mln.

The sister vessels RTM FLINDER 90,000 dwt 2013 Namura Shipbuilding and RTM DIAS 90,000 dwt 2013 Namura Shipbuilding were reportedly sold for around \$21.4 mln each.

Among the Kamsarmax vessels, GCL HAZIRA 82,000 dwt 2021 Nantong COSCO KHI Ship Eng was sold to European interests for high \$38 mln, while NEW WAVELET 82,000 dwt 2021 Nantong COSCO KHI Ship Eng changed hands for around \$42 mln.

BABITONGA 82,000 dwt 2019 Tsuneishi Holdings - Fukuyama was sold to Sincere Navigation for around \$38.5 mln.

Further down the sizes, GOOD HOPE MAX 77,000 dwt 2005 Sasebo was reportedly sold for mid \$12 mln, while GENEVA STAR 76,000 dwt 2009

Tsuneishi changed hands for around \$17 mln.

IPSEA COLOSSUS 59,000 dwt 2011 Kawasaki was reportedly sold for around \$20.75 mln, while YC AEQUOR 57,000 dwt 2012 Ningbo Beilun Lantian Shbldg changed hands for high \$13 mln.

The sister vessels NEW LIULINHAI 56,000 dwt 2004 Nantong COSCO KHI Ship Eng and PLACID SEA 56,000 dwt 2004 Nantong COSCO KHI Ship Eng were reportedly sold for around \$10 mln each.

PUTERI SEJATI 48,000 dwt 2002 Oshima was sold to Chinese interests for around \$6.1 mln.

CELESTE 34,000 dwt 2012 Zhejiang Jingang Shipbuilding was sold to Greek interests for around \$11.1 mln, while IVS KESTREL 33,000 dwt 2014 Kanda Kawajiri changed hands for around \$17 mln.

In the tanker sector, SEAKING 319,000 dwt 2013 Hyundai was reportedly sold to ADNOC for around \$177 mln, while VADIN 302,000 dwt 2006 Mitsui Chiba Ichihara changed hands, still to ADNOC, for around \$117 mln.

Among the Suezmax vessels, NORDIC FREEDOM 159,000 dwt 2005 Daewoo Shipbuilding & Marine was reportedly sold for around \$65 mln, while ALMI GALAXY 158,000 dwt 2012 Daewoo Shipbuilding & Marine was sold to Greek interests for around \$90 mln.

Further down the sizes, VS PROSPERA 74,000 dwt 2005 New Century Shipbuilding was sold for around \$17 mln.

OCEAN SUNRISE 49,000 dwt 2006 Iwagi Zosen changed hands for around \$17.5 mln, while ATLANTIC CROWN 47,000 dwt 2007 Hyundai Mipo Dockyard was reportedly sold for around \$19 mln.

DEMOLITION SALES

The status quo continues across the Indian Sub-Continent demolition markets which remains starved of fresh tonnage.

Despite strong improvements in scrap prices post monsoon season - charter markets across all sector continue to keep Owners happy and looking anywhere but the sub continent as their next destination. More locally, the Pakistan market

once again keeps the lead in pricing, although has cooled a touch since the highs of August.

The Bangladesh market has steadily rebuilt appetite and is likely in a position to compete with its neighbors in Gadani especially on tonnage coming from the East.

While India remains well behind on conventional units the local buyers continues to absorb specialist

Vessels such as reefers, gas carriers, green ships and non-ferrous-rich tonnage.

It is also worth to note, the industry continues to make progress in satisfying European officials as support continues towards the proposed addition of two Indian recycling facilities to the European List, although final approval remains pending.
