Utilisation

Capesize utilisation improves sharply as Atlantic activity strengthens

- Capesize utilisation rose sharply to 92.9% from 91.6% a week earlier, and also moved above the 92.5% recorded in the corresponding period last year. Capesize rates strengthened alongside the improvement in utilisation.
- Effective vessel supply tightened as congestion increased across several regions, even though global ballast and laden speeds increased during the week.
- Capesize rates also found support from stronger Atlantic cargo activity, with improving long-haul demand tightening the tonnage position. The key factor to watch next week will be whether Atlantic cargo coverage continues into December loading, which would help sustain the recent improvement in Capesize rates.

S No.	Terms	Define
1	Capesize vessel	Dry bulk vessels above 100,000 dwt
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO number have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight (or capacity)
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	East to Suez Canal, comprising China, Pacific, Indian Ocean and Oceania
7	West	West of Suez Canal, comprising Atlantic region
8	C2	Spot rates from Baltic Exchange on the Tubarao-Rotterdam route
9	C3	Spot rates from Baltic Exchange on the Tubarao-Qingdao route
10	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
11	Moored	Vessels moored in port for loading or discharging
12	Underway	Vessels currently at sea and are currently underway towards their destination
