Utilisation

Strong long-haul product flows continue to support LR2 earnings

- LR2 utilisation remained firm at 91.9% in Week 45, while the tonne-mile index reached 142.9, up 19.5% YoY, reflecting continued strength in long-haul clean product trade. The combination of rising tonne-mile demand and elevated utilisation suggests that cargo growth is continuing to absorb available fleet capacity despite the gradual increase in fleet productivity.
- Vessel availability tightened further during the month as global tonnage at anchor declined by 1.5 mdwt on a four-week moving average basis, while anchored capacity fell by 10.0% MoM in the West and 1.0% MoM in the East. The share of laden vessels increased by 1.5 percentage points in the West, indicating stronger cargo employment and a tighter supply-demand balance in Atlantic markets.
- Market conditions remained constructive despite bunker prices remaining elevated at USD 990/tonne. Spot earnings strengthened across both TC1 and TC8 routes as lower idle capacity and robust cargo demand outweighed productivity gains. Congestion also remained elevated in the Atlantic and Indian Ocean regions, helping absorb vessel availability.

S No.	Terms	Define
1	LR2 vessel	Long range coated vessels above 80,000 dwt
2	Trading status	Status of vessels has been derived primarily from the navigation field within the AIS message. Vessels which do not have IMO numbers have not been included in the fleet. Furthermore, vessels that have not returned AIS message for at least 30 days, have been excluded from the analysis of fleet status while vessels that have not returned an AIS message for up to 30 days are assumed to have the same trading status as when last seen.
3	Laden dwt miles	Average distance travelled per week across the laden target fleet multiplied by the average vessel deadweight (or capacity)
4	Bunker price	Price of the VLSFO at Singapore Port
5	% Laden	Share of laden vessels in total fleet excluding vessels under repair
6	East	East of Suez Canal, comprising China, Pacific, Indian Ocean and Oceania
7	West	West of Suez Canal, comprising Atlantic region
8	TC1	Spot rates from Baltic Exchange on ME Gulf-Japan route
9	TC8	Spot rates from Baltic Exchange on ME Gulf-UK Continent route
10	At anchor	Vessels with navigation status ‘At Anchor’ in the waiting zone near port area
11	Moored	Vessels moored in port for loading or discharging
12	Underway	Vessels currently at sea and are currently underway towards their destination
