

Fearnleys Dry Bulk Weekly

Nov 26, 2025

Capesize/Newcastlemax

Last week, we wrote "*Slight rebound in China's iron ore consumption last week, but the share of profitable steel mills fell further, so consumption is likely to continue trending down in the near term. Nonetheless, consumption is slightly higher year on year, which, along with higher coal shipments yoy (since the start of October) and higher bauxite shipments yoy means the market should continue outperforming last year's levels. The first 6 months of this year, the market averaged 33% lower than the first 6 months of 2024. In Q3, the market averaged at similar levels to last year, and so far in Q4, the market is about 20% higher than last year.*"

To last week's comment, we can add that inventory building in China has counteracted the negative trend in iron ore consumption since early October. Spot markets are now at year-to-date highs, and the rally might not end until the market gets too high relative to the Kamsarmax market (a ratio of about 2.5 has been the peak in the last 7 years).

Share of Profitable Steel Mills (7 Weeks Lead) vs Hot Metal Output

Iron Ore Futures Spread, 1st Month Minus 3rd Month (3 Months Lead) vs BCI5TC 60 Days Rolling Average

Cape/Newc Weekly Shipments 24 vs 25

China Iron Ore Inventories at Ports and Steel Mills

Panamax/Kamsarmax

Last week , we wrote *"Indicators look more bullish than one week ago. The coal futures curve contango has diminished along with a rise in spot prices. The South Atlantic vessel tightness indicator has turned up, suggesting a potential downtrend (which is yet to be seen) could end in early December. A continuation of sideways market movement still seems most likely, but year-to-date highs in the P5TC index could be reached before year-end."*

The coal futures curve keeps getting less backwardated, indicating there is room for more upside in the Pacific. However, spot prices have softened slightly, as China's import demand is reportedly slowing down a bit after several strong weeks. Otherwise, the North Atlantic keeps strengthening, supported by US Soybean shipments to China, but the South Atlantic tightness indicator shown below has turned down again. So overall, we are perhaps looking at minor gains in the P5TC index until year-end, but there is a chance the rally will also stall here.

Pmx/Kmx Weekly Shipment Volumes

P5 vs Newcastle Coal Futures Curve Spread (Lead 2 Months)

North Atlantic net Vessel Change vs P1A minus P5

South Atlantic Vessel Tightness Indicator (Lead 1 Month), vs P6

Supramax/Ultramax

Two weeks ago, we wrote: "Rates found support last week, reflecting that the underlying fundamentals are strong. The surge in USG rates has been particularly impressive. We still think the highs of the year are behind us, however.

In comparable years when demand growth surged during the second half of the year, like this year, the following Q1 turned out to be quite firm. 2023 into 2024, when the S11TC index bottomed at 13.500 usd pd in January, and 2020 into 2021, when markets kept rising in Q1."

Industrial metals prices have softened over the last month, and the ballaster/laden vessel ratio has turned up noticeably in the last weeks. The Jan/Feb downseason is quickly approaching, so we think at best spot levels will trend sideways until year-end.

Copper Price 3 Months Change, 3 Months Lead vs 3 Months Change of Supra 10TC

Copper Price 6 months Change, 4 Month Lead vs Supramax 1 Year TC 6 Months Change

Industrial Metals Index vs Ultramax 1 Year TC

Supra/Ultra Ballaster/Laden Vessel Ratio

1. Introduction

The statistical and graphic information set forth in the analysis is compiled by Fearnresearch and based on the databases and time series supplied by Fearnresearch, the research division of Fearnleys AS, and other external sources of information. Fearnresearch compiles, processes and publishes data for the benefit of the brokering departments of Fearnleys AS and its clients. Its methodologies for collecting data, and therefore the data collected, may differ from those of other sources, and its data do not reflect all or even necessarily a comprehensive set of actual transactions occurring in the market. Certain estimates may be based on prevailing market conditions. There can be no assurance that such data reflect actual market conditions.

Data compilation, especially for earlier historical periods, is subject to limited audit and validation procedures. Both closed and open sources, interviews and market intelligence to gain information on different topics may be used. Accordingly, there can be no assurance as to the accuracy or completeness of the estimates, advice, statements and any other information contained in the analysis.

2. Risks

Research coverage of Fearnleys AS encompasses solely companies within the shipping sector. This sector is cyclical by nature and will over time presumably experience higher volatility than the overall market.

3. Confidentiality

Pursuant to Fearnleys' Code of Conduct, all employees of Fearnleys AS are subject to duty of confidentiality towards clients and with respect to handling inside information. All employees shall follow strict information handling procedures and other organizational procedures to minimize conflicts of interest within Fearnleys and between clients.

4. General Disclaimer of Liability

The analyses, estimates, advice, statement and any other information contained in the analysis are prepared and presented in good faith. However, neither Fearnresearch, Fearnleys AS nor any of their subsidiaries, associated companies, organisations, management personnel, employees, agents or independent contractors (collectively the "Fearnley Interests") shall under any circumstances be under any liability for any losses, damages or costs caused to any person, company or other legal entity arising or resulting directly or indirectly from reliance on any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information contained in the analysis resulting directly or indirectly from any negligent or gross negligent act(s) or omission (s), or wilful misconduct, committed by any of the Fearnley Interests.

In the event that a court or tribunal, notwithstanding the above liability exemptions, should hold any, some or all of the Fearnley Interests liable in damages for any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information, the liability shall not under any circumstances whatsoever exceed in total ten (10) times the fees payable for the analysis in question, or US\$ 100,000 (United States Dollar Hundred Thousand), whichever is the higher.

Under no circumstances whatsoever shall the individual or individuals who have caused the losses, damage or costs be held personally responsible or liable in any way. The Fearnley Interests shall under no circumstances whatsoever be liable for punitive damages.

The analysis is prepared to the benefit of the named addressee only. No other third party may rely on the analysis or any of its content without prior written approval of Fearnley Consultants AS.

Should any part of this clause be held unenforceable, non-operative or invalid by a court or tribunal, the remaining parts shall remain in full force.

5. Processing of Personal Data

The processing of personal data within Fearnleys AS is subject to strict rules and regulations. Our Privacy Policy describes the procedures for processing personal data according to the General Data Protection Regulation (GDPR). Please see our homepage for more information on this.
