

Fearnleys Dry Bulk Weekly

Apr 29, 2026

Capesize/Newcastlemax

Near-term indicators still looks toppish, but underlying fundamentals remain strong.

Top left chart: Blast furnace output fell slightly last week, whereas steel mill profitability increased. The latter suggests output will be stable around current levels in the coming weeks.

Top right chart: Shipment volumes were 7.1% higher than last year through week 17. Still strongly positive, but down from the peak earlier this year. Supply growth is at 1.5%.

Bottom left chart: The South Atlantic tightness indicator remains in toppish territory.

Bottom right chart: The laden/ballast ratio is at 1.27, suggesting the market is in toppish territory.

China - Hot Metal Output vs Share of Profitable Steel Mills (7 Weeks Lead)

Weekly Shipment Volumes

C5TC 180 vs South Atlantic Tightness Indicator

Laden/Ballast Ratio

Panamax/Kamsarmax

No significant change to near-term indicators since last week. Fundamentals are finely balanced, with shipment volume growth and fleet growth both around 4%.

Top left chart: Shipment volumes were up 4.1% year on year through week 16. The growth rate continues to decline, and now remains just slightly above the supply growth rate of 4%.

Top right chart: Last week, we suggested an eventual market dip could be followed by year-to-date highs for P5. As it turned out, the market kept rising, without any correction. The coal futures curve slipped back into contango over the last week, which indicates P5 might soon peak.

Bottom left chart: The Pacific tightness indicator turned more bearish over the last week.

Bottom right chart: The SATL tightness indicator remains at similar levels to last week, suggesting the market will be stable.

Weekly Shipment Volumes

P5 vs Newcastle Coal Futures Curve Spread (Lead 2 Months)

P5TC vs Pacific Vessel Tightness Indicator (Lead 1 Month)

P6 vs South Atlantic Vessel Tightness Indicator (Lead 1 Month)

Supramax/Ultramax

The below indicators suggest further upside is limited. Most likely, the S11TC index will drift sideways in the high teens.

Top left chart: The three-month change in the price of copper suggests upward momentum will peak this month.

Top right chart: The chart compares the ballaster/laden vessel ratio against the S11TC index. A low ballaster/laden vessel ratio reflects a tighter market balance.

Bottom left chart: The Ultramax spread over the Handysize index is quite high, which usually means further upside is limited in the near-term.

Bottom right chart: Shipment volumes were up 5.7% year on year through week 17. Supply growth is at 5.2%.

Copper Price 3 Months Change, 3 Months Lead S11TC vs Ballaster/Laden Vessel Ratio vs 3 Months Change of Supra 10TC

S11TC / HS7TC spread

Weekly Shipment Volumes

Handysize

The market could rise a bit further, but there are signs that the Ultramax market is peaking, so the Handysize market might be close to reaching a plateau.

Top left chart: The ratio between Rio-Recalada / Skaw-Passero (HS3) and SEA / Singapore-Japan (HS5) is usually a good predictor of tops and bottoms of the HS3 route. A higher ratio suggests a market top, and a lower ratio suggests a market bottom.

Top right chart: Through week 17, Handysize shipment volumes were 4.4% higher than the same period in 2025.

Bottom left chart: The correlation between the S11TC and HS7TC is over 90%. The correlation is even higher when the S11TC index is shifted forward a few days, which means that movements in the S11TC index often lead the movements of the HS7TC.

Bottom right chart: The laden/ballast ratio is an accurate measure of underlying fundamentals, shown by the high correlation it has with to HS7TC index.

HS3 vs Ratio of HS3 and HS5

Disclaimer

1. Introduction

The statistical and graphic information set forth in the analysis is compiled by Fearnresearch and based on the databases and time series supplied by Fearnresearch, the research division of Fearnleys AS, and other external sources of information. Fearnresearch compiles, processes and publishes data for the benefit of the brokering departments of Fearnleys AS and its clients. Its methodologies for collecting data, and therefore the data collected, may differ from those of other sources, and its data do not reflect all or even necessarily a comprehensive set of actual transactions occurring in the market. Certain estimates may be based on prevailing market conditions. There can be no assurance that such data reflect actual market conditions.

Data compilation, especially for earlier historical periods, is subject to limited audit and validation procedures. Both closed and open sources, interviews and market intelligence to gain information on different topics may be used. Accordingly, there can be no assurance as to the accuracy or completeness of the estimates, advice, statements and any other information contained in the analysis.

2. Risks

Research coverage of Fearnleys AS encompasses solely companies within the shipping sector. This sector is cyclical by nature and will over time presumably experience higher volatility than the overall market.

3. Confidentiality

Pursuant to Fearnleys' Code of Conduct, all employees of Fearnleys AS are subject to duty of confidentiality towards clients and with respect to handling inside information. All employees shall follow strict information handling procedures and other organizational procedures to minimize conflicts of interest within Fearnleys and between clients.

4. General Disclaimer of Liability

The analyses, estimates, advice, statement and any other information contained in the analysis are prepared and presented in good faith. However, neither Fearnresearch, Fearnleys AS nor any of their subsidiaries, associated companies, organisations, management personnel, employees, agents or independent contractors (collectively the "Fearnley Interests") shall under any circumstances be under any liability for any losses, damages or costs caused to any person, company or other legal entity arising or resulting directly or indirectly from reliance on any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information contained in the analysis resulting directly or indirectly from any negligent or gross negligent act(s) or omission (s), or wilful misconduct, committed by any of the Fearnley Interests.

In the event that a court or tribunal, notwithstanding the above liability exemptions, should hold any, some or all of the Fearnley Interests liable in damages for any inaccurate, incorrect, incomplete or misleading analyses, estimate, advice, statement or any other information, the liability shall not under any circumstances whatsoever exceed in total ten (10) times the fees payable for the analysis in question, or US\$ 100,000 (United States Dollar Hundred Thousand), whichever is the higher.

Under no circumstances whatsoever shall the individual or individuals who have caused the losses, damage or costs be held personally responsible or liable in any way. The Fearnley Interests shall under no circumstances whatsoever be liable for punitive damages.

The analysis is prepared to the benefit of the named addressee only. No other third party may rely on the analysis or any of its content without prior written approval of Fearnley Consultants AS.

Should any part of this clause be held unenforceable, non-operative or invalid by a court or tribunal, the remaining parts shall remain in full force.

5. Processing of Personal Data

The processing of personal data within Fearnleys AS is subject to strict rules and regulations. Our Privacy Policy describes the procedures for processing personal data according to the General Data Protection Regulation (GDPR). Please see our homepage for more information on this.
