MARKET SUMMARY

INDIA

- The Indian market remains active, particularly for specialized tonnage such as reefers and passenger vessels, while local steel prices have declined from the previous week.
- Recent sales of a passenger vessel and a reefer have achieved strong levels, reflecting continued interest for such specialized units.
- With Pakistan around USD 30–40/LDT higher and Bangladesh approximately USD 80–90/LDT above India, conventional tonnage remains difficult for India to attract.
- India continues to receive specialized tonnage as well as sanctioned vessels.

BANGLADESH

- The Bangladesh market remains active, although overall sentiment has moderated from the stronger levels witnessed around two weeks ago, with local prices also easing slightly during the week.
- Recycling prices are being maintained at present, although the softer local levels could become more evident in the coming week.
- Demand continues to remain strong, particularly for mid-to-large-sized vessels, with buyers actively seeking suitable tonnage.

PAKISTAN

- The Pakistan market continues to witness strong demand, with buyers keen to secure additional tonnage as requirements remain high across the recycling market.
- With steel imports from Iran having reduced drastically, the requirement for steel from ship recycling has increased considerably, further strengthening buyers' appetite for available vessels.
- Buyers are expected to remain active in the coming week as they continue to seek suitable tonnage to meet their requirements.

TURKIYE

- The Türkiye market remained at relatively low levels during the week, although overall conditions continued to remain stable with no significant change in sentiment.
- Buyer activity and market fundamentals remained broadly unchanged from the previous week, with little movement witnessed across the market.
- The coming week will be watched for any signs of improvement in activity or a shift from the prevailing stable sentiment.

BRENT CRUDE: (82.17 → 86.65) + 4.48
