MARKET SUMMARY

INDIA

- The Indian recycling market remains quite buoyant. After a strong run, prices have stopped increasing further and remain close to last week's peak, with only a very minor downward trend.
- The recent strengthening of the US dollar over the last two days may encourage a slightly more cautious buying approach. However, there have been no vessels available for sale to Alang, India, throughout the week.
- Buyers continue to purchase sanctioned tonnage, keeping the Indian market alive. With steel from Iran still no longer coming, there is further scope for ship-recycled steel to continue its good run.

BANGLADESH

- The Bangladesh recycling market remained stable during the week, with local prices showing moderate movement and no clear upward momentum.
- Buying interest remains present, although buyers are not showing a strong willingness to chase prices aggressively.
- Buyers continue to show interest in bulk carriers and normal tonnage at moderate market levels, while maintaining a measured approach.
- Overall, the market remains steady and moderate, with no significant change in either buying activity or local price sentiment.

PAKISTAN

- The Pakistan recycling market remains buoyant, with several buyers actively looking for tonnage, but no vessels are currently available.
- Buying interest remains firm, while the continued absence of Iranian steel provides further support for ship-recycled steel.
- Overall, the market remains well-supported, with demand outweighing the limited availability of vessels.

TURKIYE

- The Turkish recycling market remained largely stable this week, with no notable change in either demand or pricing. Market activity continues at a controlled pace, with vessel availability shaped mainly by regulatory requirements and positioning.
- Yards remain comfortably covered with existing commitments, limiting the need to compete aggressively for fresh tonnage. Buyers continue to show preference for well-maintained, quality vessels, while taking a more cautious approach towards less attractive units.
- The continued weakness of the Turkish lira remains a factor in market sentiment and pricing. Nevertheless, the overall market direction remains steady, with buyers and sellers largely holding their current positions.

BRENT CRUDE: (94.31 → 104.86) + 10.55

WTI CRUDE: (89.92 → 99.78) +9.86
